

## **CURRENT BED DEFINITIONS OF THE STATE BOARD**

"Authorized Hospital Bed Capacity" means the number of beds recognized for planning purposes at a hospital facility, as determined by HFSRB. The operational status of authorized hospital beds is identified as physically available, reserve, or transitional, as follows:

"Physically Available Beds" means beds that are physically set up, meet hospital licensure requirements, and are available for use. These are beds maintained in the hospital for the use of inpatients and that furnish accommodations with supporting services (such as food, laundry, and housekeeping). These beds may or may not be staffed, but are physically available.

"Reserve Beds" means beds that are not set up for inpatients, but could be made physically available for inpatient use within 72 hours.

"Transitional Beds" means beds for which a Certificate of Need (CON) has been issued, but that are not yet physically available, and beds that are temporarily unavailable due to modernization projects that do not require a CON.

"Authorized Long-Term Care Bed Capacity" means the number of beds by category of service, recognized and licensed by IDPH for long-term care.
