A Full-Time Equivalent of a staff member's employment is calculated by dividing the number of hours that person worked by the typical hours worked by a full-time staff member in that position. For example, if a staff member worked 16 hours in the pay period, and a full-time employee would typically work 40 hours, that staff person accounted for 0.4 Full-Time Equivalent (FTE).

Due to the wide range of services provided in long-term care facilities, we have included 2 aggregated employment categories: Other Healthcare Personnel, for health-related staff not listed separately, and Other Non-Health Personnel, for staff not directly involved in the provision of health care to patients.
