HEALTH FACILITIES AND SERVICES REVIEW BOARD
525 WEST JEFFERSON ST, SPRINGFIELD, ILLINOIS 62761 • (217) 782-3516 FAX: (217) 785-4111

BOARD MEETING: February 26, 2026	PROJECT NO: 25-049	PROJECT COST: Original: \$0
FACILITY NAME: Schwab Rehabilitation Hospital	CITY: Chicago	
TYPE OF PROJECT: Substantive - Discontinuation		HSA: VI

DESCRIPTION: The Applicants (Schwab Rehabilitation Hospital and Care Network, Sinai Health System) propose discontinuing the licensed 92-bed Schwab Rehabilitation Hospital at 1401 S. California Avenue, Chicago, Illinois. There is no cost to this project, and the expected completion date is December 31, 2026.

Information regarding this Application for Permit can be found at this link:
<https://hfsrb.illinois.gov/project.25-049-schwab-rehabilitation.html>

EXECUTIVE SUMMARY

PROJECT DESCRIPTION:

- The Applicants (Schwab Rehabilitation Hospital and Care Network, Sinai Health System) propose discontinuing the licensed 92-bed Schwab Rehabilitation Hospital at 1401 S. California Avenue, Chicago, Illinois. There is no cost to this project, and the expected completion date is December 31, 2026.

WHY THE PROJECT IS BEFORE THE STATE BOARD:

- The project is before the State Board because the Applicants propose the discontinuation of a 92-bed rehabilitation hospital.

SUMMARY:

- In November 2025, Sinai Chicago submitted a letter of intent to discontinue the individual operating license for Schwab Rehabilitation Hospital and integrate it under the single license of Mount Sinai Hospital Medical Center, Chicago. The primary reasons for this change are that aligning operations under a single license allows Sinai Chicago to unify administrative and billing functions, reducing duplicative infrastructure and management costs. The move promotes better integration of rehabilitation services with acute care specialties such as neurology, orthopedics, and trauma. As a safety-net provider, the system is seeking ways to improve financial stability during challenging economic times. The Applicants state that the change is designed to preserve comprehensive rehabilitation services at the existing campus without reducing the workforce, licensed beds, or patient access. All services are planned to continue without interruption at the current Schwab site, and the Sinai Health System will retain current Schwab employees.
- The Applicants addressed a total of six criteria and have successfully addressed them all.

Project #25-049
State Board Staff Report
Schwab Rehabilitation

APPLICATION/CHRONOLOGY/SUMMARY	
Applicants	Schwab Rehabilitation Hospital and Care Network, Sinai Health System
Facility Name	Schwab Rehabilitation Hospital
Location	1401 S. California, Chicago, Illinois
Permit Holder	Schwab Rehabilitation Hospital and Care Network, Sinai Health System
Licensee/Operating Entity	Schwab Rehabilitation
Owner of Site	Sinai Health System
Application Received	December 12, 2025
Project Completion Date	December 31, 2026
Can the Applicants Request a Deferral?	Yes

I. Project Description

Schwab Rehabilitation at 1401 S. California Ave., Chicago, is seeking the State Board's approval to discontinue operations as a licensed Rehabilitation Hospital. Schwab Rehabilitation will discontinue operations under its license. Mount Sinai Hospital Medical Center of Chicago will concurrently file a Certificate of Need application to establish the comprehensive physical rehabilitation service on its campus. Inpatient and outpatient rehabilitation services will continue to be performed at the physical plant where Schwab Rehabilitation is located. Clinicians will remain in their current roles throughout this transition, and there will be no disruption in service availability at the site. There will be no cost to discontinuing operations at this location.

II. Summary of Findings

- A. The State Board Staff finds the project is in conformance with all relevant provisions of Part 1110.
- B. The State Board Staff finds the provisions of Part 1120 do not apply to this project because there is no cost.

III. General Information

Sinai Health System is a non-profit "safety-net" healthcare system serving the West and Southwest sides of Chicago. Sinai Health System includes Mount Sinai Hospital (a Level I trauma center), Holy Cross Hospital, Schwab Rehabilitation Hospital, and Sinai Children's Hospital. Sinai Health System is focused on health equity and serving underserved, predominantly African American and Latino communities. Sinai Health

System operates the Sinai Urban Health Institute for research on health disparities and the Sinai Community Institute for social services.

Schwab Rehabilitation Hospital was established in 1912 as Rest Haven Memorial Hospital. In 1948, it became an affiliate of the Jewish Federation of Metropolitan Chicago, focusing on treating long-term illnesses. In 1972, the hospital was officially affiliated with Mount Sinai Hospital, creating a comprehensive care network that extends from primary care through rehabilitation. In 1998, a new facility opened at its current West Side location, introducing advanced features like seven treatment gyms, a therapeutic indoor pool, and an award-winning rooftop therapeutic garden (Permit 94-069).

Sinai Health System proposed discontinuing the independent licensee of the 92-bed Schwab Rehabilitation Hospital to integrate its services under the license of its Mount Sinai Hospital. Schwab Rehabilitation Hospital is located on the Mount Sinai Hospital campus under Medicare's 250-yard rule.

IV. **250-Yard Rule- Hospital Campus**

The Medicare "250-yard rule" remains a regulatory standard used by the Centers for Medicare & Medicaid Services (CMS) to define the boundaries of a hospital campus for both emergency care obligations and billing purposes. The rule generally states that any facility or area located **within 250 yards of a hospital's main buildings** is considered on-campus. Under the Emergency Medical Treatment and Labor Act (EMTALA), a hospital's legal obligation to provide a medical screening exam is triggered if a person presents anywhere on the hospital campus, including parking lots, sidewalks, and driveways within 250 yards of the main building. Facilities within this 250-yard radius are classified as "on-campus" provider-based departments. These locations are generally eligible for higher reimbursement rates under the Hospital Outpatient Prospective Payment System (OPPS) compared to off-campus facilities. Services provided at "off-campus" locations (those 250 yards or more from the main campus) may be subject to lower "site-neutral" payment rates unless they meet specific grandfathered exceptions or are dedicated emergency departments. The rule excludes explicitly sure entities from being part of the "campus," even if they are physically within the 250-yard boundary:

- Independent physician offices, non-medical establishments like restaurants or gift shops.
- Other separately participating Medicare entities, like skilled nursing facilities (SNFs).

Definitions related to provider-based status are found at 42 CFR 413.65(a)(2):

Campus: means the physical area immediately adjacent to the provider's main buildings, other places and structures that are not strictly contiguous to the main buildings but are located within 250 yards of the main buildings, and any other areas determined on an individual case basis, by the CMS regional office, to be part of the provider's campus. (Source: Pub. 100-07 State Operations)

V. Health Service Area

Schwab Rehabilitation is in Health Service Area VI, Rehabilitation Planning Area, which is the City of Chicago.

VII. Discontinuation

These criteria pertain to the discontinuation of categories of service and health care facilities.

- A) 77 Ill. Code 1110.290 (a) – Information Requirements
- B) 77 Ill. Code 1110.290 (b) – Reasons for Discontinuation
- C) 77 Ill. Code 1110.290 (c) – Impact on Access

A) Information Requirements

The applicant shall provide at least the following information:

- 1) Identification of the categories of service and the number of beds, if any, that are to be discontinued.
- 2) Identification of all other clinical services that are to be discontinued.
- 3) The anticipated date of discontinuation for each identified service or for the entire facility.
- 4) The anticipated use of the physical plant and equipment after discontinuation occurs;
- 5) The anticipated disposition and location of all medical records about the services being discontinued, and the length of time the documents will be retained.
- 6) For applications involving discontinuation of an entire facility, certification by an authorized representative that all questionnaires and data required by HFSRB or the Illinois Department of Public Health (IDPH) (e.g., annual questionnaires, capital expenditures surveys, etc.) will be provided through the date of discontinuation and that the required information will be submitted no later than 60 days following the date of discontinuation.

The facility is approved for 92 comprehensive physical rehabilitation beds, which will be discontinued. The facility currently offers inpatient and outpatient rehabilitation services, which will be discontinued upon approval of the application. The Applicants propose to discontinue services upon approval by the State Board and regulatory agencies, to ensure no service disruption for patients. Inpatient rehabilitation services will continue to be offered at the physical plant under the Mount Sinai Hospital Medical Center of Chicago, Illinois Department of Public Health license, upon Board approval. The medical records will continue to be maintained in an electronic medical records system for 10 years, as required by state statute. Included in the Application for permit are copies of the notices sent to the municipality where the facility is located, the State Representative and State Senator for the district where the health care facility is located, and the Director of Public Health, and the Director of Health Care and Family Services.

B) Reasons for Discontinuation

The applicant shall document that the discontinuation is justified by providing data that verifies that one or more of the following factors (and other factors, as applicable) exist with respect to each service being discontinued:

- 1) Insufficient volume or demand for the service.
- 2) Lack of sufficient staff to adequately provide the service.
- 3) The facility or the service is not economically feasible, and continuation impairs the facility's financial viability.
- 4) The facility or the service is not in compliance with licensing or certification standards.

The Applicants state that discontinuing services under the Schwab Rehabilitation license is proposed to integrate Schwab's inpatient rehabilitation services into the Mount Sinai Hospital Medical Center of Chicago IDPH license. According to the Applicants, this change is being proposed because maintaining separate licenses for facilities operating as a unified system is no longer operationally efficient. Consolidating services under a single hospital license will streamline regulatory compliance and reduce administrative and operational redundancies, and strengthen the long-term financial and clinical viability of rehabilitation services in the West and Southwest Sides of Chicago. The discontinuation is not due to reduced demand, staffing constraints, or an intent to eliminate services. All rehabilitation services will continue to be

provided at the same physical campus where care has historically been delivered. The integration will allow Sinai Health System to simplify oversight, enhance care coordination, and ensure continued access to high-quality rehabilitation care. No workforce reductions or service reductions are anticipated as part of this transition.

C) Impact on Access – Review Criterion

The applicant shall document whether discontinuation of each service or the entire facility will adversely affect residents' access to care in the facility's market area. The facility's market area, for purposes of this Section, is the established radii outlined in 77 Ill. Adm. Code 1100.510(d). Factors that indicate an adverse impact upon access to service for the population of the facility's market area include, but are not limited to, the following:

- 1) The service will no longer exist within the established radii outlined in 77 Ill. Adm. Code 1100.510(d) of the applicant facility.
- 2) Discontinuation of the service will result in creating or increasing a shortage of beds or services, as calculated in the Inventory of Health Care Facilities, which is described in 77 Ill. Adm. Code 1100.70 and found on HFSRB's website.
- 3) Facilities or a shortage of other categories of service are determined by the provisions of 77 Ill. Adm. Code 1100 or other Sections of this Part.
- d) The applicant shall provide copies of notification letters sent to other resources or health care facilities that offer the same services as those proposed for discontinuation and that are located within the established radii outlined in 77 Ill. Adm. Code 1100.510(d). The notification letter must include at least the anticipated date of discontinuation of the service, and the total number of patients that received care, or the number of treatments provided

The Applicants state that the proposed discontinuation of the Schwab Rehabilitation license will not adversely affect residents' access to care in the facility's market area. Schwab Rehabilitation is a 92-bed freestanding rehabilitation hospital that delivers a full continuum of inpatient and outpatient rehabilitative services, including care for patients recovering from stroke, spinal cord injury, orthopedic and neurosurgical trauma, amputation, and other disabling conditions.

Mount Sinai is a comprehensive acute-care and a safety-net teaching hospital located on Chicago's West Side that provides a broad spectrum of medical, surgical, and diagnostic services, including obstetric, behavioral health, and Level I trauma services. Given the close operational and clinical integration between the two institutions, realigning inpatient rehabilitation services under the Mount Sinai license represents a structural change, not a reduction in services, capacity, *or* access. All inpatient rehabilitation services currently provided under the Schwab Rehabilitation license at 1401 S. California Avenue will continue to be provided at the exact physical location without interruption, relocation, or reduction of beds or staffing. Patients will continue to have full access to the same rehabilitative programs, interdisciplinary teams, and continuity of care. No changes to admission policies, referral patterns, payer mix, or service availability are anticipated. This licensure realignment supports a full continuum of care, strengthening coordination between acute care and post-acute rehabilitation services while maintaining all existing access points for residents in the market area. As a result, discontinuing the Schwab Rehabilitation license will not adversely affect access to care for any population served.

VIII. Background of the Applicant, Purpose of Project, Safety Net Impact Statement

- A)** 77 Ill. Adm. Code 1110.110 (a) – Background of the Applicants
- B)** 77 Ill. Adm. Code 1110.110 (b) – Purpose of the Project
- C)** 77 Ill. Adm. Code 1110.110 (c) – Safety Net Impact Statement

A) Background of Applicants

An applicant must demonstrate that it is fit, willing, and able, and has the qualifications, background, and character to provide a proper standard of health care service for the community. [20 ILCS 3960/6] In evaluating the applicant's qualifications, background, and character, HFSRB shall consider whether adverse action has been taken against the applicant, including corporate officers or directors, LLC members, partners, and owners of at least 5% of the proposed health care facility, or against any health care facility owned or operated by the applicant, directly or indirectly, within 3 years preceding the filing of the application. A health care facility is considered "owned or operated" by every person or entity that owns, directly or indirectly, an ownership interest. If any person or entity owns any option to acquire stock, the stock shall be considered to be owned by that person or entity (see 77 Ill. Adm. Code 1100 and 1130 for definitions of terms such as "adverse action", "ownership interest", and "principal shareholder").

The Applicants have not had an adverse action directly or indirectly for the prior three years preceding the filing of this Application for Permit. The Applicants appear to be fit, willing, and able, and have the qualifications, background, and character to provide a proper standard of health care service for the community.

B) Purpose of the Project

The applicant shall document that the project will provide health services that improve the health care or well-being of the population to be served in the market area. The applicant shall define the planning area, market area, or other area, as the applicant defines it.

The purpose of the project is to integrate Schwab Rehabilitation services under the Mount Sinai Hospital Medical Center of Chicago, Illinois Department of Public Health license.

C) Safety Net Impact Statement

All health care facilities, except skilled and intermediate long-term care facilities licensed under the Nursing Home Care Act, shall provide a safety net impact statement, which shall be filed with an application for a substantive project (see Section 1110.40). Safety net services are offered by health care providers or organizations that deliver care to persons with barriers to mainstream health care, including lack of insurance, inability to pay, special needs, ethnic or cultural characteristics, or geographic isolation. [20 ILCS 3960/5.4]

Safety Net Statement

To the best of the applicant's knowledge, the project will not significantly impact essential safety-net services in the community, including efforts to address racial and healthcare disparities. The applicant does not expect any adverse effects on these services. Although the facility will cease operations after Board approval, services at this location will remain available at nearby hospitals and providers serving the same populations. Any impact on racial and healthcare disparities is likely minimal because this does not involve ending the unique service line in the long term, and access for Medicaid, Medicare, uninsured, or underinsured patients will not decrease. Based on what the applicant reasonably knows, the discontinuation won't create gaps that worsen disparities, delay care, or limit access to safety-net services. The impact on other providers' ability to cross-subsidize safety-net services is also expected to be negligible, as no high-margin or specialized services necessary for supporting safety-net functions will be eliminated. The applicant does not foresee any adverse effects on existing safety-net providers, as services will continue at the exact location with the same providers, accessible to Sinai Health System patients and others in the

Chicagoland area. Since other safety-net providers depend on services from Schwab, which will remain available, the discontinuation should not strain resources, affect utilization, or hinder nearby hospitals' capacity to provide safety-net services.

Methodology Notes

Statutory Radius: Per 77 Ill. Adm. Code 1100, radius is determined by county classification: 10 miles (Metro - Cook, DuPage, Kane, Lake, Will), 17 miles (Mid-size counties), 21 miles (Rural counties).

Gap Analysis: Positive values (+) indicate surplus; parentheses indicate shortage. Need calculated per State Health Plan formulas.

Data Source: 2024 Annual Hospital Survey responses submitted to HFSRB.
