**Inventory of Health Care Facilities and Services  
and Need Determinations**

40 planning areas have been designated by the Health Facilities and Services Review Board for the Medical-Surgical and Pediatric, Obstetric and Intensive Care categories of service. Detailed descriptions and maps of each of these planning areas are presented below:

- 1) **Region A** (comprised of Health Service Areas 6, 7, 8 and 9)
  - A) **Planning Area A-1:** City of Chicago Community Areas of Uptown (3), Lincoln Square (4), North Center (5), Lakeview (6), Lincoln Park (7), Near North Side (8), Edison Park (9), Norwood Park (10), Jefferson Park (11), Forest Glen (12), North Park (13), Albany Park (14), Portage Park (15), Irving Park (16), Dunning (17), Montclare (18), Belmont Cragin (19), Hermosa (20), Avondale (21), Logan Square (22), O'Hare (76) and Edgewater (77).

Inventory of Health Care Facilities and Services  
and Need Determinations

- B) **Planning Area A-2:** City of Chicago Community Areas of Humboldt Park (23), West Town (24), Austin (25), West Garfield Park (26), East Garfield Park (27), Near West Side (28), North Lawndale (29), South Lawndale (30), Lower West Side (31), Loop (32), Armour Square (34), McKinley Park (59) and Bridgeport (60).

**Inventory of Health Care Facilities and Services  
and Need Determinations**

- C) **Planning Area A-3:** City of Chicago Community Areas of Near South Side (33), Douglas (35), Oakland (36), Fuller Park (37), Grand Boulevard (38), Kenwood (39), Washington Park (40), Hyde Park (41), Woodlawn (42), South Shore (43), Chatham (44), Avalon Park (45), South Chicago (46), Burnside (47), Calumet Heights (48), Roseland (49), Pullman (50), South Deering (51), East Side (52), Garfield Ridge (56), Archer Heights (57), Brighton Park (58), New City (61), West Elsdon (62), Gage Park (63), Clearing (64), West Lawn (65), Chicago Lawn (66), West Englewood (67), Englewood (68), and Greater Grand Crossing (69).

**Inventory of Health Care Facilities and Services  
and Need Determinations**

- D) **Planning Area A-4:** City of Chicago Community Areas of West Pullman (53), Riverdale (54), Hegewisch (55), Ashburn (70), Auburn Gresham (71), Beverly (72), Washington Heights (73), Mount Greenwood (74), and Morgan Park (75); Cook County Townships of Lemont, Stickney, Worth, Lyons, Palos, Calumet, Thornton, Bremen, Orland, Rich and Bloom.

Inventory of Health Care Facilities and Services  
and Need Determinations

E) **Planning Area A-5: DuPage County.**

Inventory of Health Care Facilities and Services  
and Need Determinations

- F) **Planning Area A-6:** Cook County Townships of River Forest, Oak Park, Cicero, Berwyn, Riverside, Proviso, Leyden and Norwood Park.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

- G) **Planning Area A-7:** Cook County Townships of Maine, Elk Grove, Schaumburg, Palatine and Wheeling.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

- H) **Planning Area A-8:** City of Chicago Community Areas of Rogers Park (1) and West Ridge (2); Cook County Townships of Northfield, New Trier, Niles and Evanston.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

I) **Planning Area A-9: Lake County.**

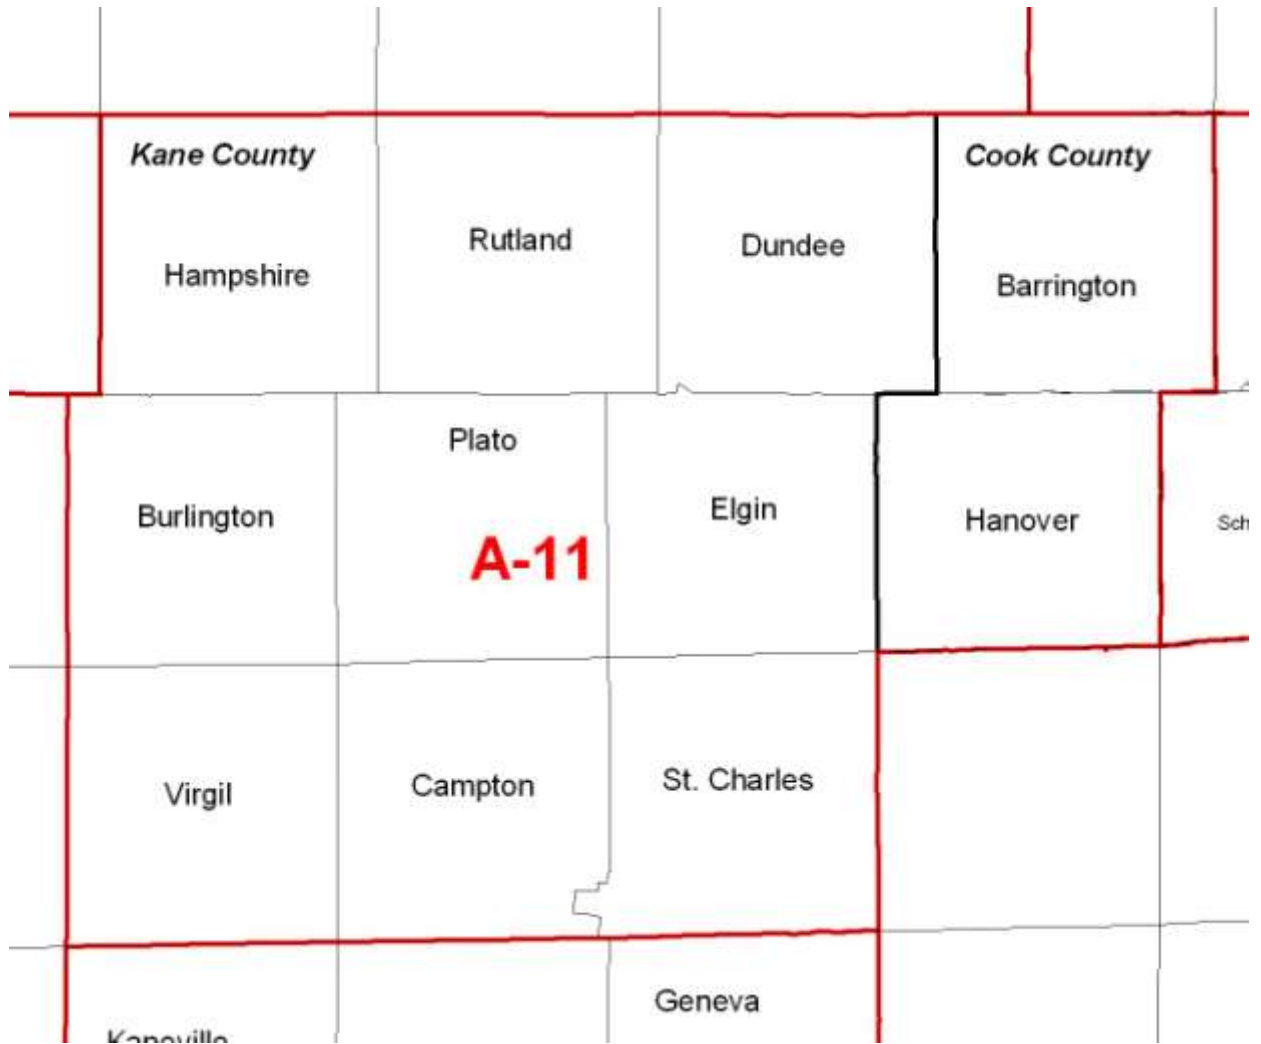

Inventory of Health Care Facilities and Services  
and Need Determinations

J) Planning Area A-10: McHenry County.

Inventory of Health Care Facilities and Services  
and Need Determinations

- K) **Planning Area A-11:** Cook County Townships of Barrington and Hanover; Kane County Townships of Hampshire, Rutland, Dundee, Burlington, Plato, Elgin, Virgil, Campton and St. Charles.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

- L) **Planning Area A-12:** Kendall County; Kane County Townships of Kaneville, Black Berry, Aurora, Big Rock, Sugar Grove, Batavia and Geneva.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

M) **Planning Area A-13:** Grundy and Will Counties.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

N) **Planning Area A-14:** Kankakee County.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

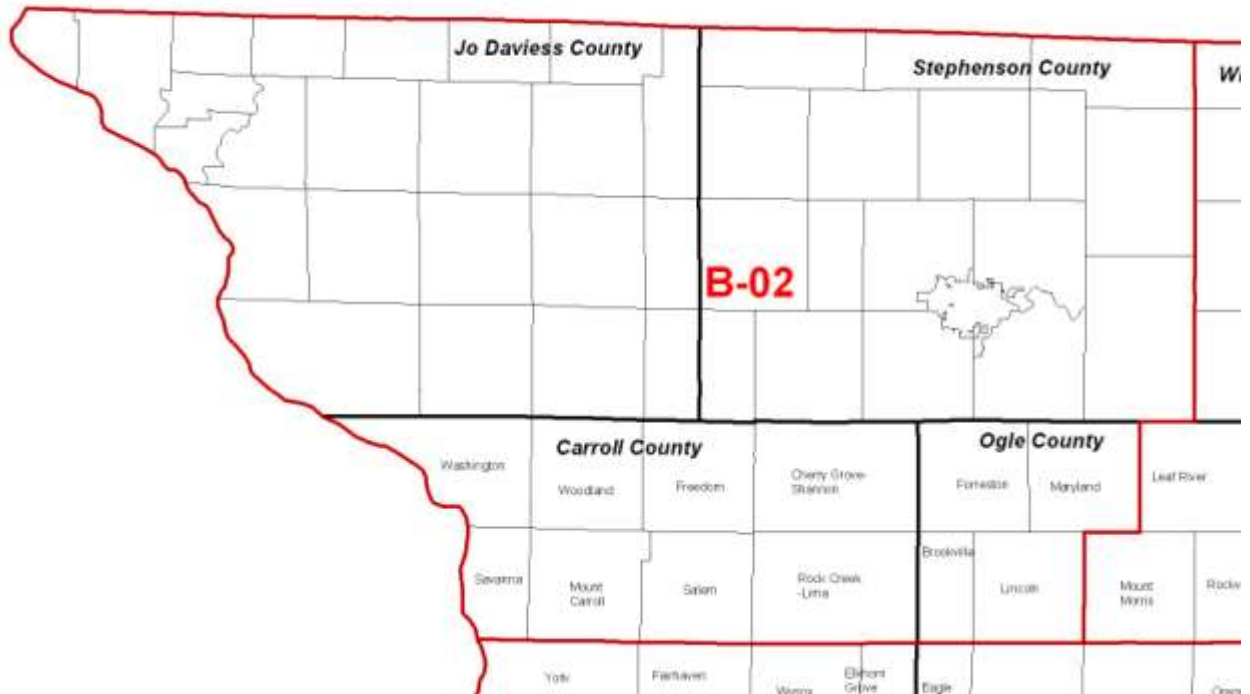

2) **Region B** (comprised of Health Service Area 1)

- A) **Planning Area B-1:** Boone and Winnebago Counties; DeKalb County Townships of Franklin, Kingston, and Genoa; Ogle County Townships of Monroe, White Rock, Lynnville, Scott, Marion, Byron, Rockvale, Leaf River and Mount Morris.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

- B) **Planning Area B-2:** Jo Daviess and Stephenson Counties; Ogle County Townships of Forrester, Maryland, Lincoln, and Brookville; Carroll County Townships of Washington, Savanna, Woodland, Mount Carroll, Freedom, Salem, Cherry Grove-Shannon and Rock Creek-Lima.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

- C) **Planning Area B-3:** Whiteside County; Lee County Townships of Palmyra, Nelson, Harmon, Hamilton, Dixon, South Dixon, Marion, East Grove, Nachusa, China, Amboy, May, Ashton, Bradford, Lee Center, and Sublette; Carroll County Townships of York, Fairhaven, Wysox, and Elkhorn Grove; Ogle County Townships of Eagle Point, Buffalo, Pine Creek, Oregon-Nashua, Pine Rock, Woosung, Grand Detour, Taylor, Lafayette, Lee County Townships of Dixon, Nachusa, China, Bradford, Nelson, South Dixon, Harmon, Marion, Amboy, Lee Center, Hamilton, East Grove, May, and Sublette.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

- D) **Planning Area B-4:** Lee County Townships of Reynolds, Alto, Viola, Willow Creek, Brooklyn, and Wyoming; DeKalb County Townships of Paw Paw, Victor, Somonauk, Sandwich, Shabbona, Clinton, Squaw Grove, Milan, Afton, Pierce, Malta, DeKalb, Cortland, Mayfield, South Grove and Sycamore; Ogle County Townships of Flagg and Dement.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

3) **Region C** (comprised of Health Service Areas 2 and 10)

- A) **Planning Area C-1:** Woodford, Peoria, Tazewell, and Marshall Counties; Stark County Townships of Goshen, Toulon, Penn, West Jersey, Essex, Valley and Essex.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

- B) **Planning Area C-2:** LaSalle, Bureau, and Putnam Counties; Stark County Townships of Elmira and Osceola.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

C) **Planning Area C-3:** Henderson, Warren and Knox Counties.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

D) **Planning Area C-4:** McDonough and Fulton Counties.

Inventory of Health Care Facilities and Services  
and Need Determinations

E) **Planning Area C-5:** Rock Island, Henry and Mercer Counties.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

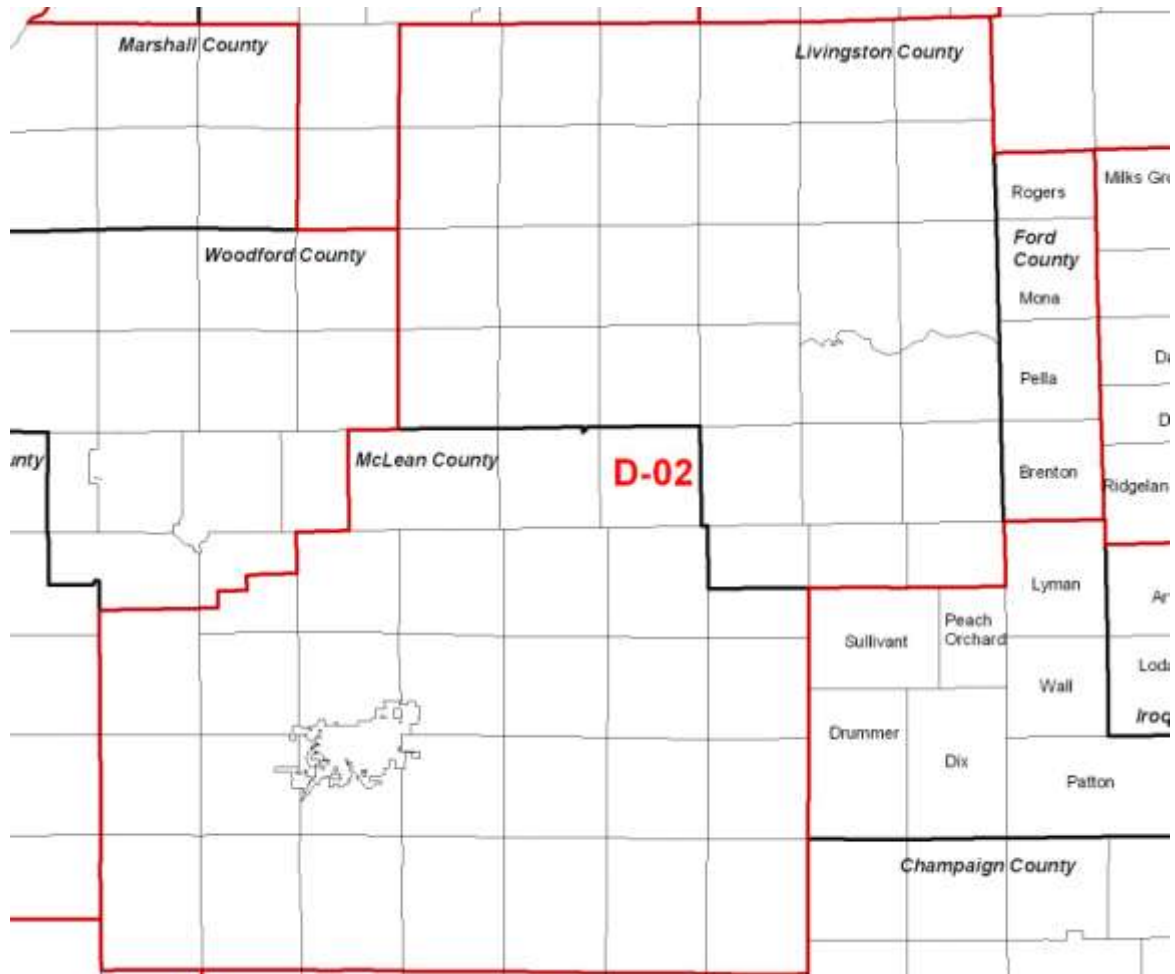

4) **Region D** (comprised of Health Service Area 4)

- A) **Planning Area D-1:** Champaign, Douglas, and Piatt Counties; Ford County Townships of Lyman, Sullivant, Peach Orchard, Wall, Drummer, Dix, Patton, and Button; Iroquois County Townships of Loda, Pigeon Grove and Artesia.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

- B) **Planning Area D-2:** Livingston and McLean Counties; Ford County Townships of Rogers, Mona, Pella and Brenton.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

- C) **Planning Area D-3:** Vermilion County; Iroquois County Townships of Milks Grove, Chebanse, Papineau, Beaverville, Ashkum, Martinton, Beaver, Danforth, Douglas, Iroquois, Crescent, Middleport, Belmont, Concord, Sheldon, Ash Grove, Milford, Stockland, Fountain Creek, Lovejoy, Prairie Green, Onarga and Ridgeland.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

D) **Planning Area D-4:** DeWitt, Macon, Moultrie and Shelby Counties.

Inventory of Health Care Facilities and Services  
and Need Determinations

E) **Planning Area D-5:** Coles, Cumberland, Clark and Edgar Counties.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

5) **Region E** (comprised of Health Service Area 3)

- A) **Planning Area E-1:** Logan, Menard, Mason, Sangamon, Christian and Cass Counties; Brown County Townships of Ripley, Cooperstown, and Versailles; Schuyler County Townships of Littleton, Oakland, Buena Vista, Rushville, Browning, Hickory, Woodstock, Bainbridge and Frederick.

Inventory of Health Care Facilities and Services  
and Need Determinations

B) **Planning Area E-2:** Macoupin and Montgomery Counties.

Inventory of Health Care Facilities and Services  
and Need Determinations

C) **Planning Area E-3:** Greene, Jersey and Calhoun Counties.

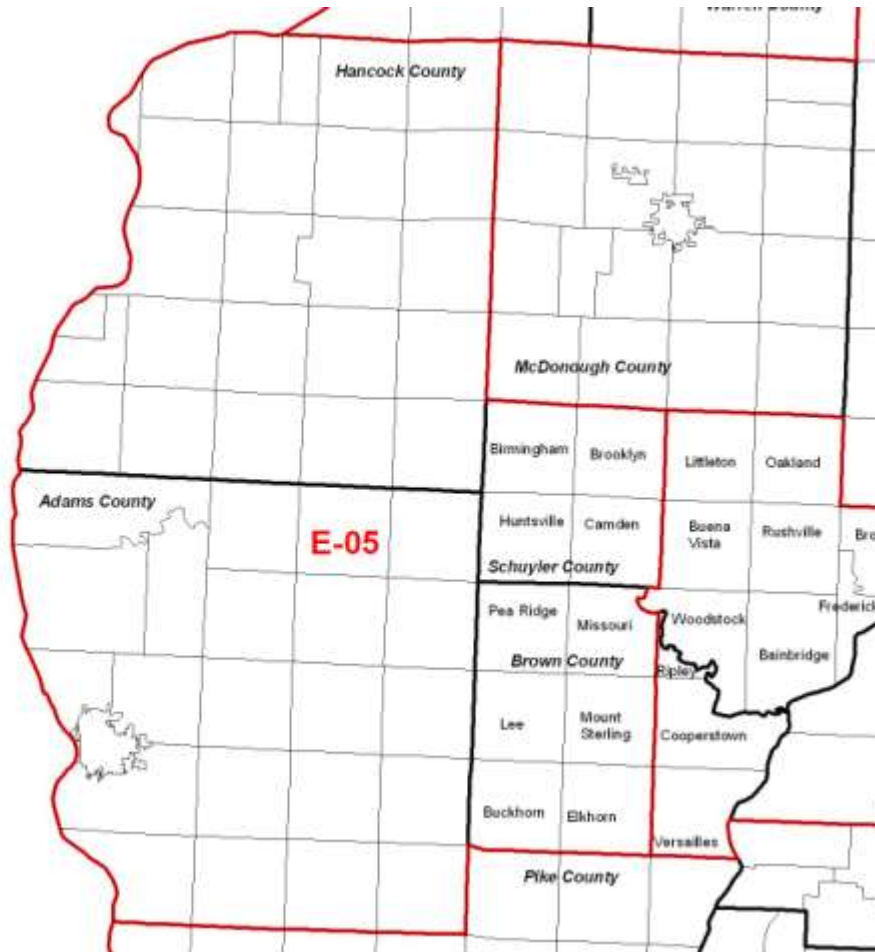

**Inventory of Health Care Facilities and Services  
and Need Determinations**

D) **Planning Area E-4:** Pike, Scott and Morgan Counties.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

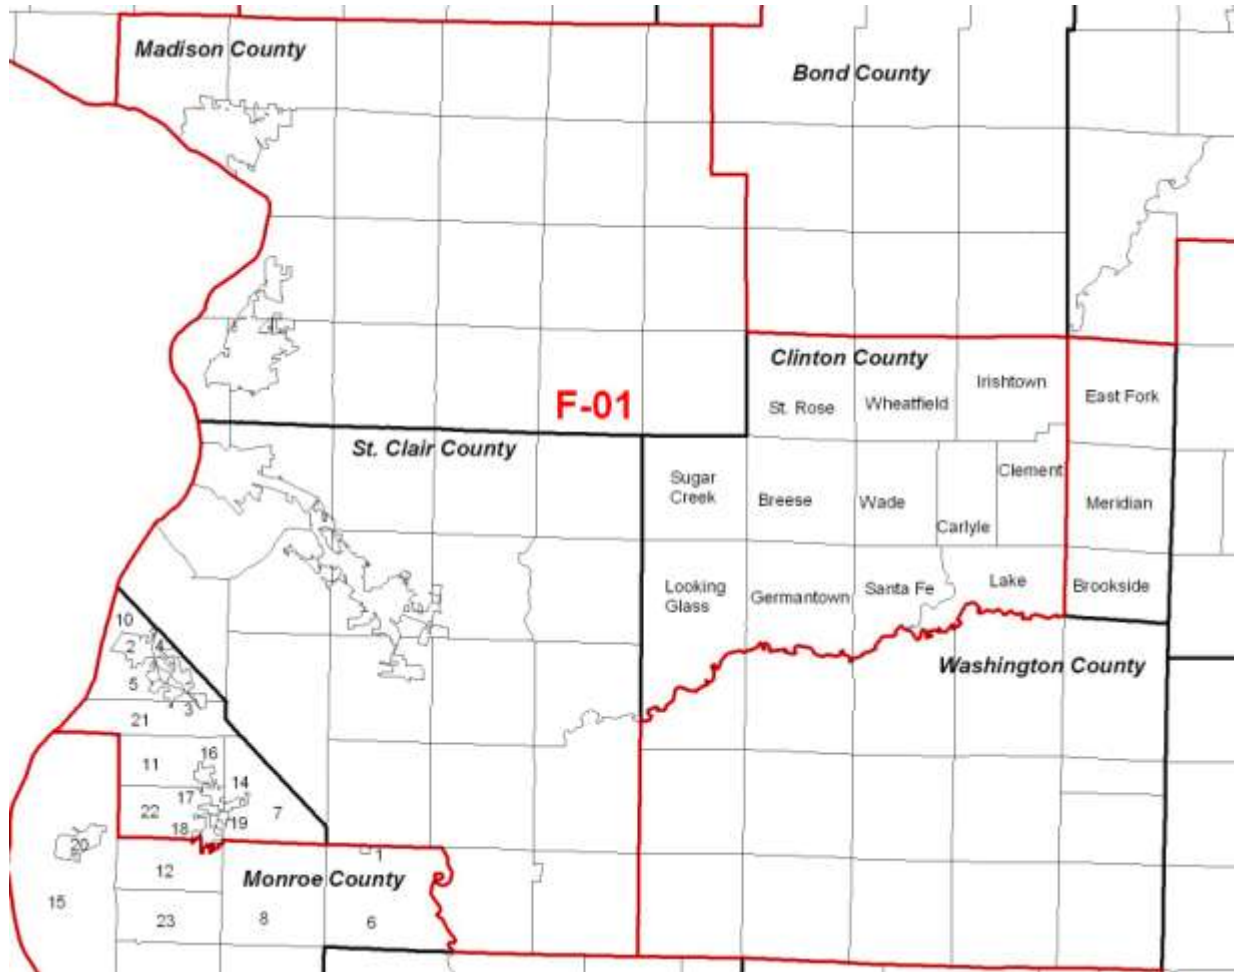

- E) **Planning Area E-5:** Adams and Hancock Counties; Schuyler County Townships of Birmingham, Brooklyn, Camden, and Huntsville; Brown County Townships of Pea Ridge, Missouri, Lee, Mount Sterling, Buckhorn and Elkhorn.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

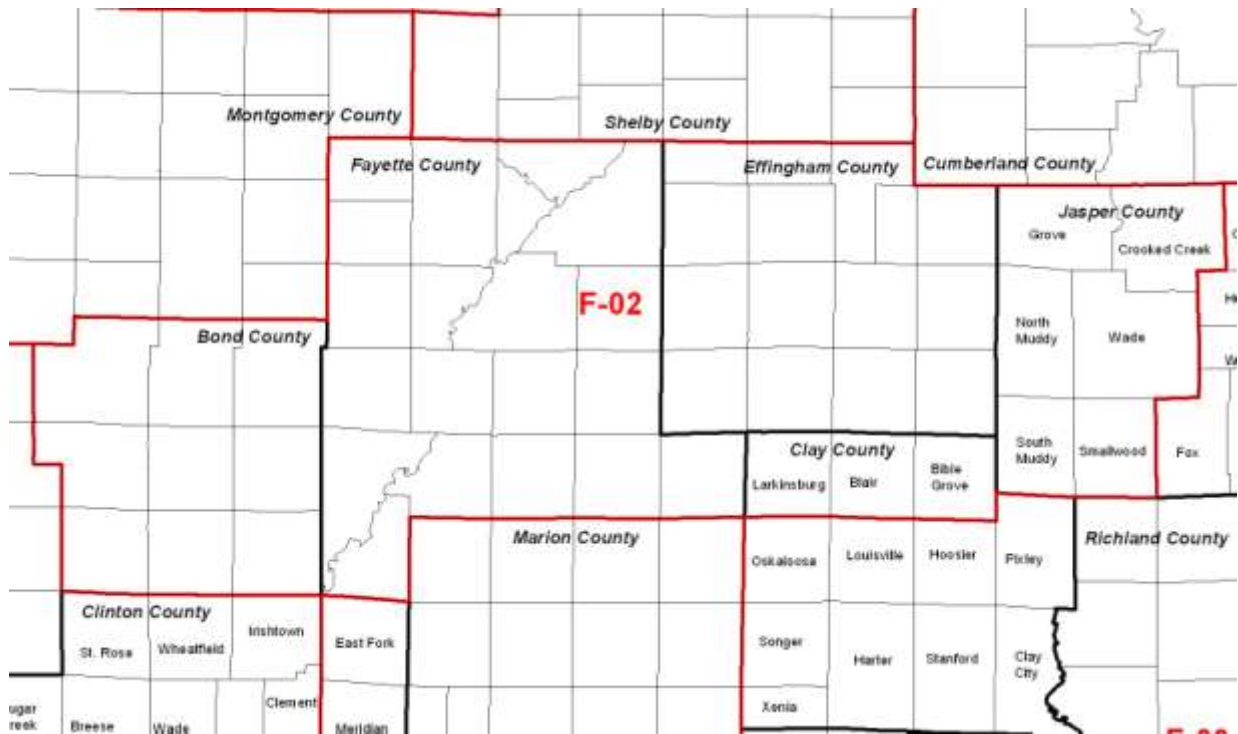

6) **Region F** (comprised of Health Service Areas 5 and 11)

A) **Planning Area F-1:** Madison and St. Clair Counties; Monroe County Precincts 2, 3, 4, 5, 7, 10, 11, 14, 16, 17, 18, 19, 21, and 22; Clinton County Townships of Sugar Creek, Looking Glass, Germantown, Breese, St. Rose, Wheatfield, Wade, Sante Fe, Lake, Irishtown, Carlyle and Clement.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

- B) **Planning Area F-2:** Bond, Fayette, and Effingham Counties; Clay County Townships of Blair, Bible Grove, and Larkinsburg; Jasper County Townships of Grove, North Muddy, South Muddy, Smallwood, Wade and Crooked Creek.

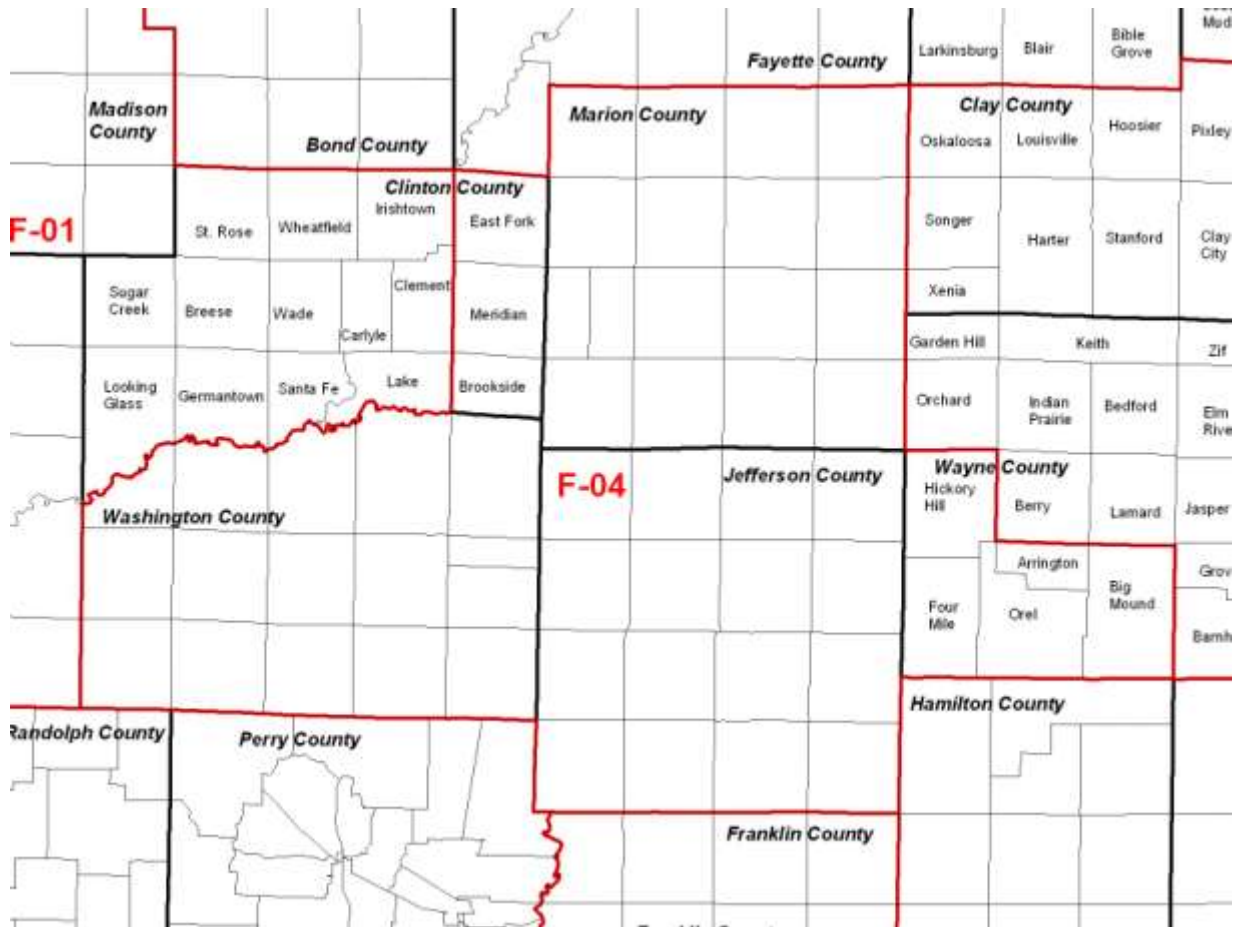

Inventory of Health Care Facilities and Services  
and Need Determinations

- C) **Planning Area F-3:** Crawford, Lawrence, Richland, Wabash, and Edwards Counties; Jasper County Townships of Hunt City, Willow Hill, Ste. Marie, Fox, and Grandville; Clay County Townships of Louisville, Songer, Xenia, Oskaloosa, Hoosier, Harter, Stanford, Pixley, and Clay City; Wayne County Townships of Orchard, Keith, Garden Hill, Berry, Bedford, Lamard, Indian Prairie, Zif, Elm River, Jasper, Mount Erie, Massillon, Leech, Barnhill and Grover.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

- D) **Planning Area F-4:** Marion, Jefferson, and Washington Counties; Wayne County Townships of Big Mound, Orel, Hickory Hill, Arrington and Four Mile; Clinton County Townships of East Fork, Meridian and Brookside.

Inventory of Health Care Facilities and Services  
and Need Determinations

- E) **Planning Area F-5:** Hamilton, White, Gallatin, Hardin, and Saline Counties; Pope County Townships of Eddyville #6 and Golconda #2.

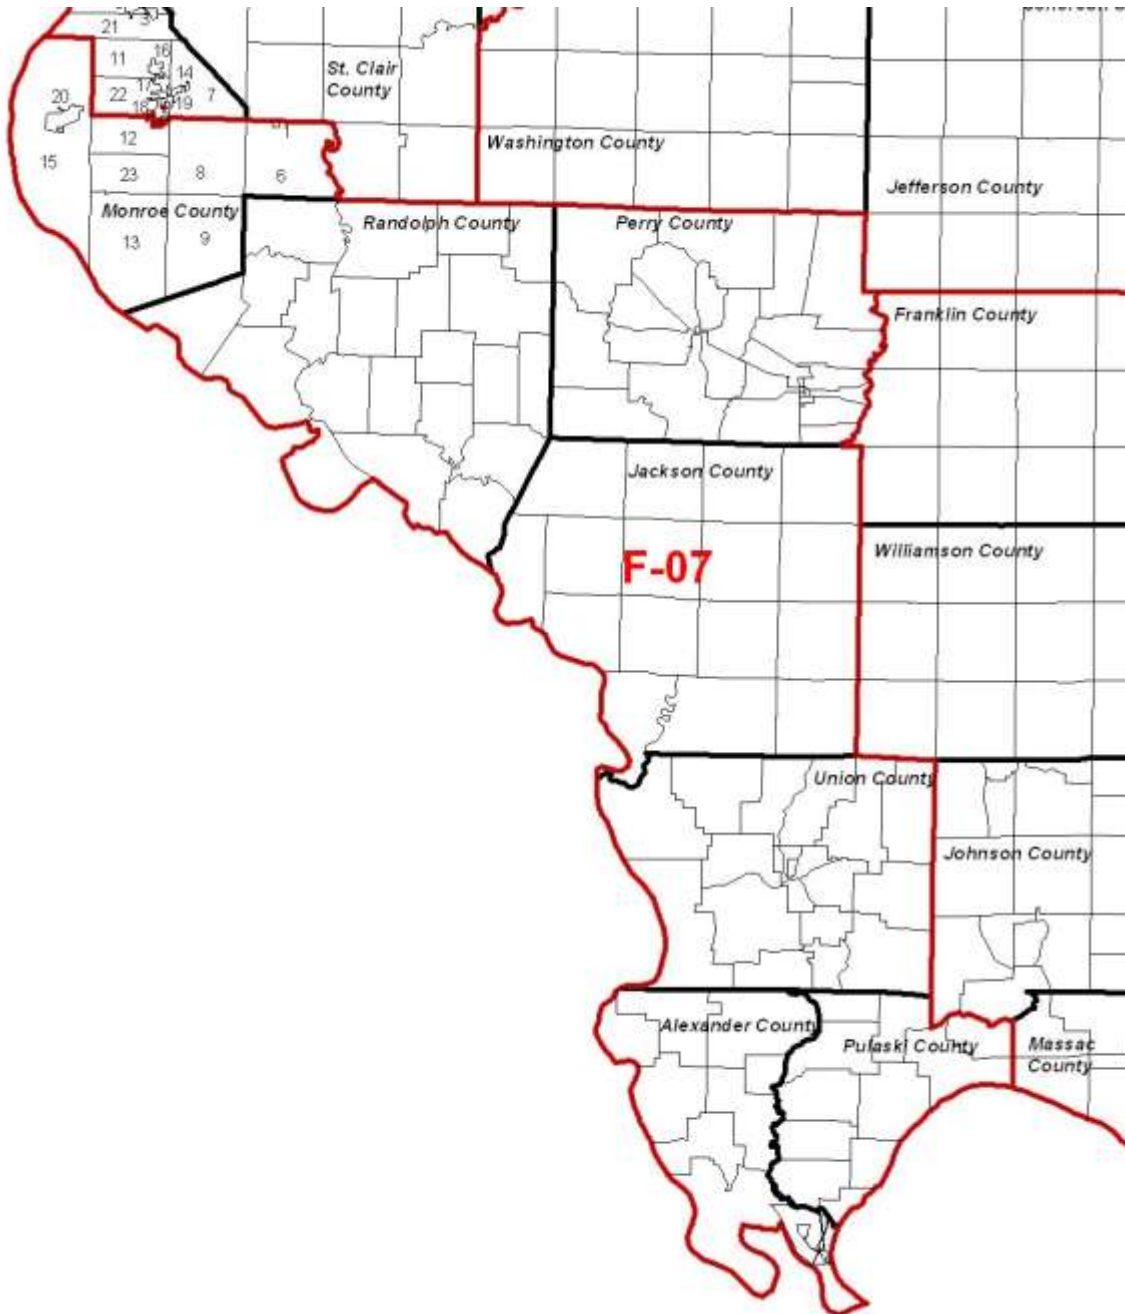

Inventory of Health Care Facilities and Services  
and Need Determinations

- F) **Planning Area F-6:** Franklin, Williamson, Johnson, and Massac Counties; Pope County Townships of Jefferson #4, Webster #5, Golconda #1 and Golconda #3.

Inventory of Health Care Facilities and Services  
and Need Determinations

- G) **Planning Area F-7:** Randolph, Perry, Jackson, Union, Alexander, and Pulaski Counties;  
Monroe County Precincts 1, 6, 8, 9, 12, 13, 15, 20 and 23.

Page A-2

For the Medical-Surgical and Pediatric category of service:

1. 40 Medical-Surgical and Pediatric planning areas have been designated by the Health Facilities and Services Review Board as illustrated by this map (detailed descriptions can be found in the Board Administrative Rules).

**Inventory of Health Care Facilities and Services  
and Need Determinations**

2. Occupancy target rates for Medical-Surgical and Pediatric category of service:

Modernization:		Additional Beds:	
Medical-Surgical		Medical-Surgical	
1-25 beds	60%	1-99 beds	80%
26-99 beds	75%	100-199 beds	85%
100-199 beds	85%	200+ beds	90%
200+ beds	90%		
Pediatric		Pediatric	
1-30 beds	65%	1-99 MS beds	80%
31+ beds	75%	100-199 MS beds	85%
		200+ MS beds	90%

3. Bed need for Medical-Surgical and Pediatric care is calculated by first calculating a three-year average (base year plus 2 prior years) utilization of Medical-Surgical and Pediatric services in the area for five age groups: 0-14 years, 15-44 years, 45-64 years, 65-74 years and 75+ years. The three-year age group average utilizations are divided by the planning area base year population estimate for each age group to produce *age group utilization rates*. The age group utilization rates are multiplied by the projected planning area populations for each age group five (5) years from the base year to calculate projected patient days for each age group. These are added to produce a projected total Medical-Surgical and Pediatric patient days for the projection year.

Next, a migration adjustment factor is calculated for the planning area. This is done by subtracting the number of patients from outside the planning area receiving services at area hospitals (in-migration) from the number of area residents receiving services at hospitals outside the planning area (out-migration). The difference between these figures is multiplied by the State average for length of stay for Medical-Surgical and Pediatric patients to calculate *migration patient days*. This is multiplied by an adjustment factor of 0.50. If out-migration exceeds in-migration, the adjusted migration days are added to the projected total patient days for the area. If in-migration exceeds out-migration, the adjusted days are subtracted from the projected total patient days for the planning area.

The migration-adjusted projected patient days for the planning area are divided by 365 (days in projection year) to calculate the projected Average Daily Census for Medical-Surgical and Pediatric services for the planning area. The Average Daily Census is divided by the target occupancy rate for additional beds (if the projected Average Daily Census is less than 100, the target occupancy rate is 80% or 0.8; if the projected Average Daily Census is between 100 and 199, the target occupancy is 85% (0.85); otherwise, the target occupancy rate is 90% (0.90)) to calculate the projected number of Medical-Surgical and Pediatric beds needed in the planning area.

If the calculated number of beds needed is greater than the number of authorized beds, there is a need for additional beds. If the number of authorized beds exceeds the calculated number of beds needed, there is an excess of beds in the planning area.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

**Illinois Health Facilities and Services Review Board  
Illinois Department of Public Health**

**10/26/2021**

**Page B-1**

**OBSTETRICS/GYNECOLOGY  
Category of Service**

**Inventory of Health Care Facilities and Services  
and Need Determinations**

For the Obstetric category of service:

1. 40 Obstetric care planning areas have been designated by the Health Facilities and Services Review Board as illustrated by this map (detailed descriptions can be found in the Board Administrative Rules).

**Inventory of Health Care Facilities and Services  
and Need Determinations**

2. Occupancy target rates:

1-10 Obstetric beds in area	60%
11-25 Obstetric beds in area	75%
26 or more Obstetric beds in area	78%

3. Bed need for the Obstetric category of service is determined by first multiplying the base year fertility rate for the planning area by the projected female population of child-bearing age (15-44 years) five (5) years from the base year to calculate projected planning area births, which are multiplied by 0.99 to adjust for births occurring in hospitals. This figure is multiplied by an average maternity length of stay of 2.5 days to calculate *projected maternity patient days* for the planning area.

The projected maternity patient days for the planning area are divided by 365 (days in projection year) to calculate a projected maternity average daily census, which is divided by the planning area target occupancy rate 0.6 (60%) if the maternity average daily census is 10 or less; 0.75 (75%) if the maternity average daily census is between 11 and 25; otherwise, 0.78 (78%) to determine the projected number of Obstetric beds needed for maternity patients.

Next, the number of gynecology beds needed is calculated by first dividing the number of base year gynecology patient days by the planning area estimated base year female population aged 15+ to determine a *gynecology use rate*. This rate is multiplied by the projected planning area female population aged 15+ five (5) years from the base year to calculate projected gynecology patient days for the planning area. The projected patient days are divided by 365 to get the average daily census, which is divided by 0.9 to adjust for a 90% occupancy target to produce the projected number of Obstetric beds needed for gynecology patients.

Next, an Obstetric migration adjustment is calculated by subtracting the number of Obstetric patients entering the planning area from outside the area from the number of planning area residents leaving the area to receive Obstetric services in another planning area. The difference between the migration numbers is multiplied by the average length of stay of 2.5 days to get migration patient days. The migration patient days are divided by 365 to get an average daily migration. This number is multiplied by an adjustment factor of 0.85 to calculate the migration bed adjustment.

If more Obstetric patients are leaving the area than the number coming into the area, the migration bed adjustment is added to the projected beds needed for maternity patients and the projected beds needed for gynecology patients to determine the Obstetric bed need for the planning area. If more Obstetric patients are entering the area than are leaving the area, the migration bed adjustment is subtracted from the sum of maternity and gynecology beds needed to produce the Obstetric bed need for the planning area.

If the projected number of Obstetric beds needed in a planning area is greater than the number of authorized Obstetric beds in the area, there is a need for additional beds. If the number of authorized beds is greater than the projected beds needed, there is an excess of beds in the planning area.

**10/26/2021**

**Page C-1**

**INTENSIVE CARE  
Category of Service**

**Inventory of Health Care Facilities and Services  
and Need Determinations**

For the Intensive Care category of service:

4. 40 Intensive Care planning areas have been designated by the Health Facilities and Services Review Board as illustrated by this map (detailed descriptions can be found in the Board Administrative Rules).

**Inventory of Health Care Facilities and Services  
and Need Determinations**

2. The occupancy target rate is 60%.
3. Bed need is determined by first calculating the three-year average (base year plus 2 prior years) Intensive Care utilization for the planning area. This average utilization is divided by the estimated planning area base year total population to calculate a use rate for the planning area. The calculated use rate is multiplied by the projected total population of the planning area five (5) years from the base year to find the projected Intensive Care patient days for the area.

The projected patient days are divided by 365 (days in projection year) to calculate the projected Average Daily Census for Intensive Care services. The projected Average Daily Census is divided by 0.6 (60% occupancy target utilization rate) to calculate the projected number of Intensive Care beds needed in the planning area.

If the projected number of Intensive Care beds needed is greater than the authorized Intensive Care beds in the planning area, there is a need for additional beds. If the number of authorized Intensive Care beds is greater than the projected number of Intensive Care beds needed, there is an excess of Intensive Care beds in the planning area.

For the Comprehensive Physical Rehabilitation category of service:

1. The planning areas are the designated Health Service Areas.

2. The target occupancy rate is 85% utilization.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

3. Bed need for Comprehensive Physical Rehabilitation is calculated by first determining the State minimum utilization rate. This is calculated by dividing the state total patient days for Comprehensive Physical Rehabilitation by the State estimated total population to get an overall use rate. This overall rate is multiplied by 0.6 (60%) to establish the *State minimum utilization rate*.

The *actual utilization rate* for the planning area is calculated by dividing area base year patient days for Comprehensive Physical Rehabilitation by the planning area total estimated base year population. The actual utilization rate is compared to the State minimum use rate; the *planned use rate* is the greater of the two.

The planned use rate is multiplied by the area projected total population five (5) years from the base year to calculate the projected patient days for the planning area. The patient days are divided by 365 to find the Average Daily Census, which is divided by 0.85 (85% utilization target) to determine the projected number of Comprehensive Physical Rehabilitation beds needed in the planning area. This number is compared to the current authorized Comprehensive Physical Rehabilitation beds to determine if additional beds are needed or if there is an excess of beds in the planning area.

Category of Service**

**Inventory of Health Care Facilities and Services  
and Need Determinations**

For the Acute Mental Illness category of service:

1. For the area covered by Health Service Areas 6, 7, 8, and 9, the planning areas are the Medical-Surgical/Pediatrics planning areas A-01 through A-14. For the remainder of the state, the planning areas are the Health Service Areas 1, 2, 3, 4, 5, 10 and 11.

**Inventory of Health Care Facilities and Services  
and Need Determinations**

2. Occupancy target is 85% utilization.
3. Bed need for Acute Mental Illness category of service is calculated by first multiplying the projected planning area population five (5) years from the base year by a minimum bed rate of .11 per 1,000 population to establish the minimum number of Acute Mental Illness beds needed in the planning area.

Next, the actual utilization rate is calculated by dividing the planning area base year patient days by the planning area base year total estimated population. This actual base year utilization rate is multiplied by the projected planning area population five (5) years from the base year to find projected patient days. This patient days figure is divided by 365 to determine Average Daily Census, which is divided by 0.85, to factor in the 85 percent target utilization rate, to arrive at projected beds needed for the planning area.

The planning area Acute Mental Illness bed need is the greater of the calculated minimum bed need and the projected bed need based on actual utilization figures. The planned use rate is multiplied by the projected area population to find projected patient days. The patient days are divided by 365 to calculate Average Daily Census, which is divided by 0.85 (85% utilization target) to project the number of Acute Mental Illness beds needed.

The number of Acute Mental Illness beds needed in the planning area is compared to the number of authorized Acute Mental Illness beds in the planning area to determine if there is a need for additional beds or if there are excess beds in the planning area.

Page G - 2

For the Long-Term Acute Care category of service:

1. The planning areas are designated as: Health Service Area 1; the combination of Health Service Areas 2 and 10; the combination of Health Service Areas 3 and 4; the combination of Health Service Areas 5 and 11; and the combination of Health Service Areas 6, 7, 8 and 9.

2. The target occupancy rate is 85% utilization.
3. Bed need for Long-Term Acute Care category of service is calculated by first establishing the State minimum use rate for Long-Term Acute Care. The total Long-Term Acute Care base year patient days for the state are divided by the total State base year population to find the State

**Inventory of Health Care Facilities and Services  
and Need Determinations**

utilization rate for the base year. This number is multiplied by 60% (0.6) to get the State minimum use rate.

Next, the base year use rate for the planning area is calculated by dividing the base year Long-Term Acute Care patient days for the area by the base year population in the area. This use rate is compared to the State base year minimum use rate. Whichever is greater is used in calculating the projected need for Long-Term Acute Care services.

The actual base year use rate or the State minimum user rate, whichever is greater, is multiplied by the planning area total population for the projection year (base year plus 5 years) to calculate the projected Long-Term Acute Care patient days for the projection year.

The projected patient days are divided by 365 to find the projected Average Daily Census for Long-Term Acute Care patients. This figure is divided by 85% (0.85) to adjust for the target occupancy rate for this category of service. This produces the projected number of beds needed to meet the projected demand in the planning area.

If the projected number of beds needed exceeds the current authorized beds in the planning area, the planning area has a calculated need for additional Long-Term Acute Care beds. If the authorized beds are greater than the projected need, the planning area has an excess supply of beds.

For the Open Heart Surgery category of service:

1. The planning areas are the designated Health Service Areas

2. Utilization standards:
  - Adult - minimum of 200 open heart procedures per year within 3 years of start-up.
  - Child - minimum of 75 open heart procedures per year within 3 years of start-up.
3. Need for additional open heart surgery services is determined by at least 200 patients per year referred to other open heart surgery services following cardiac catheterization at the applicant facility or a minimum of 750 cardiac catheterizations performed per year at the applicant facility.
