SECTION A

**IN-CENTER HEMODIALYSIS
Category of Service**

Planning Process for In-Center Hemodialysis Category of Service

For the In-Center Hemodialysis category of service:

1. The planning areas are the designated Health Service Areas
2. The utilization standard is a facility must operate at a minimum of 80 percent utilization rate, assuming three patient shifts per day per renal dialysis station operating six days a week.

**Inventory of Health Care Facilities and Services
and Need Determinations**

3. The need for end stage renal disease (ESRD) stations is calculated for a five-year period from the base year. The need for additional treatment stations is determined utilizing the following methodologies:
 - a. Five-year Projection:
 - i. Establish a minimum institutional dialysis rate by dividing the total number of institutional dialysis patients in the base year by the State base year estimated population in thousands and multiply the result by .6 (60%).
 - ii. Determine each planning area's experienced institutional dialysis rate by dividing the number of patients receiving dialysis in the base year by the planning area estimated population in thousands for the base year.
 - iii. Multiply each planning area's projected population in thousands five (5) years from the base year by the greater of the minimum institutional dialysis rate or the experienced institutional dialysis rate for the planning area to determine the estimated number of institutional dialysis patients.
 - iv. Multiply the planning area's estimated number of institutional dialysis patients by a factor of 1.33 (estimated increase in prevalence) to determine the projected number of institutional dialysis patients in the planning area for the projected year.
 - v. Multiply the projected number of institutional dialysis patients by 156 to determine the projected number of institutional procedures
 - vi. Divide the projected number of institutional procedures by 749 to determine the projected number of stations needed for the projected year.
 - vii. Subtract the number of existing stations from the projected number of needed stations to determine the excess or additional stations needed.

SECTION B

**NON-HOSPITAL BASED AMBULATORY SURGERY
Category of Service**

Planning Process for Non-Hospital Based Ambulatory Surgery Category of Service

For the Non-Hospital Based Ambulatory Surgery category of service:

1. The planning areas are the designated Health Service Areas
2. No utilization standard has been established.

**Inventory of Health Care Facilities and Services
and Need Determinations**

**Illinois Health Facilities and Services Review Board
Illinois Department of Public Health**

12/22/2023

Page B - 3

3. No service need formula has been established. Need is only a facility need and it is the responsibility of the applicant to document.

**Inventory of Health Care Facilities and Services
and Need Determinations**

**Non-Hospital Based Ambulatory Surgery Category of Service
by Health Service Area**
