1. That the total estimated project costs and related costs will be funded in total with cash and equivalents, including investment securities, unrestricted funds, received pledge receipts and funded depreciation; or
2. That the total estimated project costs and related costs will be funded in total or in party by borrowing because:
 - a. A portion or all of the cash and equivalents must be retained in the balance sheet asset accounts in order to maintain a current ratio of at least 2.0 times for hospitals and 1.5 times for all other facilities; or
 - b. Borrowing is less costly than the liquidation of existing investments, and the existing investments being retained may be converted to cash or used to retire debt within a 60-day period.

B. Conditions of Debt Financing N/A

This criteria is applicable only to projects that involve debt financing. The applicant shall document that the conditions of debt financing are reasonable by submitting a notarized statement signed by an authorized representative that attests to the following, as applicable:

1. That the selected form of debt financing for the project will be at the lowest net cost available;
2. That the selected form of debt financing will not be at the lowest net cost available, but is more advantageous due to such terms as prepayment privileges, no required mortgage, access to additional indebtedness, term (years), financing costs and other factors;
3. That the project involves (in total or in part) the leasing of equipment or facilities and that the expenses incurred with leasing a facility or equipment are less costly than constructing a new facility or purchasing new equipment.

C. Reasonableness of Project and Related Costs N/A

Read the criterion and provide the following:

1. Identify each department or area impacted by the proposed project and provide a cost and square footage allocation for new construction and/or modernization using the following format (insert after this page).

COST AND GROSS SQUARE FEET BY DEPARTMENT OR SERVICE									
Department (list below)	A	B	C	D	E	F	G	H	Total Cost (G + H)
	Cost/Square Foot New	Mod.	Gross Sq. Ft. New	Circ.*	Gross Sq. Ft. Mod.	Circ.*	Const. \$ (A x C)	Mod. \$ (B x E)	
Contingency									
TOTALS									

* Include the percentage (%) of space for circulation

D. Projected Operating Costs N/A

The applicant shall provide the projected direct annual operating costs (in current dollars per equivalent patient day or unit of service) for the first full fiscal year at target utilization but no more than two years following project completion. Direct cost means the fully allocated costs of salaries, benefits and supplies for the service.

E. Total Effect of the Project on Capital Costs N/A

The applicant shall provide the total projected annual capital costs (in current dollars per equivalent patient day) for the first full fiscal year at target utilization but no more than two years following project completion.

APPEND DOCUMENTATION AS ATTACHMENT 42, IN NUMERICAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

XI. Safety Net Impact Statement N/A

SAFETY NET IMPACT STATEMENT that describes all of the following must be submitted for ALL SUBSTANTIVE AND DISCONTINUATION PROJECTS:

1. The project's material impact, if any, on essential safety net services in the community, to the extent that it is feasible for an applicant to have such knowledge.
2. The project's impact on the ability of another provider or health care system to cross-subsidize safety net services, if reasonably known to the applicant.
3. How the discontinuation of a facility or service might impact the remaining safety net providers in a given community, if reasonably known by the applicant.

Safety Net Impact Statement shall also include all of the following:

1. For the 3 fiscal years prior to the application, a certification describing the amount of charity care provided by the applicant. The amount calculated by hospital applicants shall be in accordance with the reporting requirements for charity care reporting in the Illinois Community Benefits Act. Non-hospital applicants shall report charity care, at cost, in accordance with an appropriate methodology specified by the Board.
2. For the 3 fiscal years prior to the application, a certification of the amount of care provided to Medicaid patients. Hospital and non-hospital applicants shall provide Medicaid information in a manner consistent with the information reported each year to the Illinois Department of Public Health regarding " Inpatients and Outpatients Served by Payor Source" and " Inpatient and Outpatient Net Revenue by Payor Source" as required by the Board under Section 13 of this Act and published in the Annual Hospital Profile.
3. Any information the applicant believes is directly relevant to safety net services, including information regarding teaching, research, and any other service.

A table in the following format must be provided as part of Attachment 43.

Safety Net Information per PA 96-0031			
CHARITY CARE			
Charity (# of patients)	Year	Year	Year

XII. Charity Care Information

Charity Care Information MUST be furnished for ALL projects.

1. All applicants and co-applicants shall indicate the amount of charity care for the latest three **audited** fiscal years, the cost of charity care and the ratio of that charity care cost to net patient revenue.
2. If the applicant owns or operates one or more facilities, the reporting shall be for each individual facility located in Illinois. If charity care costs are reported on a consolidated basis, the applicant shall provide documentation as to the cost of charity care; the ratio of that charity care to the net patient revenue for the consolidated financial statement; the allocation of charity care costs; and the ratio of charity care cost to net patient revenue for the facility under review.
3. If the applicant is not an existing facility, it shall submit the facility's projected patient mix by payer source, anticipated charity care expense and projected ratio of charity care to net patient revenue by the end of its second year of operation.

"Charity care" means care provided by a health care facility for which the provider does not expect to receive payment from the patient or a third-party payer. (20 ILCS 3960/3) Charity Care must be provided at cost.

A table in the following format must be provided for all facilities as part of Attachment 44.

Criterion 1110.230 Background, Purpose of Project and Alternatives

PURPOSE OF PROJECT

1. The purpose of the project is to provide convenient lower cost alternative to outpatient orthopedic procedures that are appropriate for a surgery center setting (see attached list of orthopedic procedures to be performed at the existing ASC).

The purpose of this project is not only to offer the benefit of savings to patients but to also reduce the amount of anxiety and travel time for patients. Although there are two other freestanding surgical facilities in Springfield where orthopedic procedures are performed within the immediate area, they are utilized by those physicians associated with them, and Dr. Watson is not so associated. There are also scheduling difficulties in hospital settings due to the limited number of surgical suites in a hospital and the large number of physicians within the community who perform more urgent surgical procedures at hospitals than those proposed to be referred to the existing surgicenter. The Applicant's ophthalmologic physicians perform their procedures at St. John's Hospital while only some are performed at Memorial Medical Center. Dr. Watson performs most of his surgeries at St. John's and Memorial. The latter hospital is renovating its surgery center due to issues with volume and space. It does not oppose this project based on communication between its administration and the Applicant's sole member - Dr. Sandra Yeh.

Below is a listing of the top five CPT codes and historical volume for Dr. Watson. The chart is comparing the Applicants proposed charges (CY 2011) to the hospitals existing charges. A complete charge commitment is attached to Attachment 27.

CPT Code	Description	Number of Procedures	2011 Proposed Charge/Proc.	Hosp. Charge/Proc.	Potential Savings
23420	Rotator Cuff	25	\$4,500.00	\$6,700.00	\$2,200.00
29826	Shoulder Scope	20	\$4,600.00	\$9,986.72	\$5,386.72
29877	Knee Scope	20	\$3,000.00	\$9,768.40	\$6,768.40
29881	Knee Scope	20	\$3,000.00	\$9,768.40	\$6,768.40
64721	Carp. Tunnel	45	\$2,000.00	\$4,647.80	\$2,647.80

The above chart illustrates that there are significant cost savings to be realized by patients if these procedures are performed at the proposed ASC.

2. The planning area is based on the zip codes served by Dr. Watson, who will be the orthopedic surgeon referring patients. See attached zip code and patient origin information.

3. See above.

4. See above.

5. The project will allow for ASC appropriate orthopedic procedures to be performed in a surgery setting without taking operating room time at the two hospitals that would otherwise accommodate Dr. Watson's patients. There are two (2) other surgery centers in the service area which offers orthopedics but Dr. Watson has never performed surgery there, is not credentialed to do so and both are closed facilities. These facilities are the Koke Mills Orthopedic Center and

the Springfield Clinic. Neither hospital nor the existing ASCs in the area that offer orthopedic services object to the proposed project.

6. There are no measurable goals, however see previous chart reflecting the cost of the top five procedures to be performed at a hospital versus a surgicenter.

Illinois Health Facilities and Services Review Board
525 West Jefferson Street 2nd floor
Springfield, IL 62761

Dear Illinois Health Facilities and Services Review Board,

I am a Board Certified Orthopedic Surgeon. In the past 12 months I have referred 300 surgical procedures to St. John's Hospital. If the application to add orthopedic surgery to Prairie SurgiCenter Associates is approved, I intend to refer 280 procedures a year to the SurgiCenter. These surgeries would be as referenced on the attached document. Also attached is the patient origin by zip codes for all of the surgeries I referred over the past 12 month period. I anticipate the surgeries I refer to the SurgiCenter would also be scattered throughout these zip codes, with a concentration living in Springfield or immediate surrounding areas.

I am not a member of the physician groups that own and operate the Koke Mill Orthopedic surgery center in Springfield or the Springfield Clinic which offers orthopedic surgery as part of its multi-specialty surgery center. I have not referred patients there in the past and do not anticipate doing so in the future as those clinics are limited to the physicians who are part of the surgery centers ownership/operations. I do not believe that my referrals to Prairie SurgiCenter Associates will negatively impact the hospitals where I currently send my patients because the types of procedures I will refer to the surgery center are not the type of procedures that hospitals wish to dedicate OR time to. They are relatively minor surgical procedures that are best suited for a surgery center setting and that will allow patients better through put and registration experiences, ease of parking access and lower costs. Further, Prairie SurgiCenter Associates has indicated that I can do all of my procedures on Friday, which is ideal for the return to work on that following Monday (as opposed to having to work with hospitals to reserve time for these minor procedures which sometimes then must occur during the week causing a patient to take a day or two off work to recuperate)

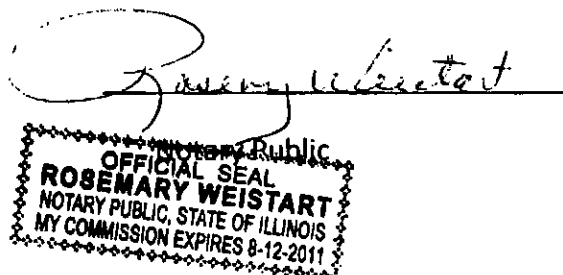

I appreciate the Board's consideredation.

Subscribed to and sworn to me this 23

Sincerely,

day of November 2010.

Michael Watson, M.D.

Attention: Jack Vinson, Administrator

Dear Dr. Yeh:

Memorial Medical Center has no objections to your plan to offer orthopedic surgery in your outpatient surgery center. Based on our understanding of the project, we do not anticipate it would impact the surgical orthopedic volume at Memorial Medical Center.

We therefore support your certificate of need application to add orthopedic surgery capabilities at your outpatient surgery center.

Sincerely,

Criterion 1110.230 Background, Purpose of Project and Alternatives

ALTERNATIVES

The only alternative to the addition of orthopedic procedures to the existing ASC would be for Dr. Watson to continue to provide the services at area hospitals. This is not good for patients because the services typically cost more, are difficult to schedule and require a more cumbersome registration process. Existing local hospitals (St. John's and Memorial - which are the only hospitals Dr. Watson refers to) are sufficiently utilized and do not object to the referral of the nominal procedures Dr. Watson will refer to the surgicenter (280 a year). Dr. Watson does not refer to other Springfield surgicenters as they either do not offer orthopedic procedures/services or are closed facilities. The cost of this alternative is zero.

The chosen alternative of the proposed project is for the addition of a surgical specialty to a limited specialty free-standing ambulatory surgical treatment center consisting of two surgery suites. The primary objective is to utilize the existing surgicenter's ORs as an alternative delivery setting for less intensive orthopedic surgical care. By providing a less costly alternative for the selected surgical procedures, the proposed facility will reduce per unit costs of health care for patients utilizing the facility. This also allow the hospitals in Springfield to have OR time available for procedures that require a hospital based OR.

In recent years independent free-standing ambulatory surgery centers have gained increasing acceptance as settings for the performance of certain scheduled elective surgical procedures. Such centers typically offer services similar to the surgical department of a hospital; are staffed with qualified surgical nurses and other medical and administrative personnel; are equipped with state-of-the-art medical instruments; and are utilized by independent physicians who are granted staff privileges based on their professional credentials.

Free-standing ambulatory surgery centers offer certain distinct advantages over hospital-based inpatient or outpatient surgery. The demand for such surgical facilities will continue to grow for the following reasons:

- 1) Cost Savings
- 2) More Productive Use of Resources
- 3) Patient Satisfaction/Patient Privacy

An ambulatory surgery center frees the patient and the physician from competing for operating room time, which is particularly relevant for minor procedures that while not appropriate for a physician office setting do not require the hospital services of an acute care facility.

The current surgicenter serves four ophthalmologic surgeons who practice within the Prairie Eye Center physician's eye practice. The surgicenter just recently opened and to date 479 procedures have been performed by three physicians through 11/30/2010. The surgicenter has 2 ORs and one procedure room. The ophthalmologic surgeons could keep the surgicenter busy full time, but for strategic reasons would prefer to allow one (1) OR to be used for orthopedic surgery on

a time frame of approximately one (1) day a week (280 procedures a year at one hour surgery time). These procedures will be reserved for Fridays, so that patients can recuperate over the weekend and return to work on the following Monday. Most patients who have eye surgery must be seen the next day, and so Friday is a good day for one of the 2 ORs to be dedicated to orthopedic procedures. The ophthalmologic procedures that were initially going to be performed in the OR on a regular basis may be referred to local hospitals and so in a large sense this is a zero sum game with respect to impact on area hospitals. Also, given efficiency in performing the procedures, many of the eye procedures will still be done at the surgery center despite the performance of orthopedic procedures as well. Dr. Watson, the orthopedic surgeon who will refer patients, does not currently refer any patients to local surgicenters, and hence there will be absolutely no impact on them. The cost of the chosen alternative is zero.

UTILIZATION					
	DEPT./ SERVICE	HISTORICAL UTILIZATION (PATIENT DAYS) (TREATMENTS) ETC.	PROJECTED UTILIZATION	STATE STANDARD	MET STANDARD?
YEAR 1	Surgery 2 ORs	3,000 plus surgical hours	3,000 plus surgical hours	3,000 plus surgical hours	Yes
YEAR 2	Surgery 2 ORs	3,000 plus surgical hours	3,000 plus surgical hours	3,000 plus surgical hours	Yes

This utilization chart reflects projected utilization for 2 ORs for ophthalmologic procedures certified to by Drs. Yeh and Farris in project No. 08-049 which resulted in approval of the ASC (see Attachment 27). Since that time Dr. Rauscher has joined and been active Dr. Yeh's ophthalmologic practice, and one new physician just recently joined the practice. Also, Dr. Watson has certified to referral of 280 procedures a year with one year preparation and surgical time with clean up. There were ample ophthalmologic procedures to support the 2 ORs when the surgicenter was proposed (see attached from previous application), and now there are even more procedures available to be performed at the surgicenter.

SECTION III. GENERAL REVIEW CRITERIA

E. Criterion 1110.230.e, Size of Project

1. For any department involved in this project that has a square footage which exceeds the State Norm found in Appendix B of Part 1110 or if no State Norm is shown in Appendix B, provide:

According to the 77 Illinois Administrative Code, Chapter II, Section 1110. Appendix B of subchapter a, ASTC's have a State norm of 2,750 GSF per treatment room (based upon 1,500 hours) and 180 GSF per recovery station based on a maximum of 4 stations per operating room. The Applicant has justified the hours for three rooms. This would equate a maximum of 9,870 total GSF (8,250 GSF for 3 operating rooms and 1,620 for 9 recovery stations). The proposed project of 6,888 gross square feet is less than the allowable amount. Therefore, this item is not germane.

- N/A a. a rationale explaining how the proposed square footage was determined;
- N/A b. copies of any standards used to determine appropriate square footage;
- N/A c. architectural drawings showing any design impediments in the existing facility; and
- N/A d. if the project is for the conversion of beds from one category of service to another an explanation as to why the excess space within the facility cannot be more appropriately used for other purposes.

SECTION III. GENERAL REVIEW CRITERIA

E. Criterion 1110.230.e, Size of Project (Continued ii)

2. If the project involves a category of service for which the State Board has established utilization targets, provide the following:

a. projected utilization for the first two years of operation after project completion;

Year	2010	2011
Procedures	4,980	6,480
Surgery Hours	7,270	9,460
ORs Justified	4.8	6.3

b. an explanation regarding how these projections were developed;

The utilization projections were developed from the current utilization of the Applicant's physician office. This project is also the result (Prairie Eye & Lasik Center's concentration of all physician practices in the proposed area) which is centrally located within the 10-County geographic service area. Together, the Applicant's practice has been growing rapidly. Appended as **ATTACHMENT GRC-6A** are three charts representing procedures by CPT code specifically listing cataracts, upper lid blepharoplasties, and Muellerectomies, which are three of the most common procedures. These historical procedures show that the physician's practice has been growing at an annual rate of 20% and 30% respectively since calendar year 2005. However, for this project the Applicant is only using the rather conservative projection which averages 4%. The proposed physician referral is also conservative when considering that

SECTION III. GENERAL REVIEW CRITERIA

E. Criterion 1110.230.e, Size of Project (Continued iii)

historically the two primary physicians have performed 2,957 procedures and for this project they will only refer 2,524 procedures to this ASTC without taking into consideration an potential growth in their respective case loads. It should be noted that the balance of the Applicant's case loads will be performed at an area hospital as appropriate based on the patients location. The idea is to provide healthcare in a flexible, most optimal, and cost effective manner. The above projections were calculated by taking the number of procedures (2,524) multiplied by the average time per procedure (87.6 min/60 min per hr.). This number is then divided by the total possible time available for surgery (250 days/year multiplied by 7.5 hrs/day). The final number was then divided by the total available number of operating rooms (3). Thus, by the second full year of operation, the Applicant will more than reach the optimal rate of 80 percent.

The procedure load projected also includes the potential number of cases that the addition of Fredrick Rauscher, M.D. will have on the practice although the justification of need is only based upon the "qualified" historical case load of 2,524 procedures. Appended as **ATTACHMENT GRC-6B** is a potential physician referral letter from Dr. Rauscher documenting that it would appear reasonable to assume that his addition could potentially refer at a minimum, another 856 surgical cases annually. These numbers are based in the Applicant's

historical experience. Up until recently, the Applicant's physicians group had a glaucoma specialist employed. Unfortunately, the group was not able to be retained. Although Dr. Rauscher will be coming on board in August 2008 regardless of the approval of this CON or not, having a freestanding surgical center for this limited purpose will enable this group along with all other area ophthalmologists groups to attract and retain the much needed specialist in this field.

c. copies of any contracts with new physicians or professional staff;

Appended as ATTACHMENT GRC-6C, is a new contract between Fredrick Rauscher, M.D. and Prairie Eye Center, the Applicant's physicians group. Dr. Rauscher is expected to start practicing in Springfield on July 20, 2008.

d. a list of any new procedures which will affect the workload of the facility.

There are not any new procedures which will affect the workload of the facility, therefore, this item is not applicable.

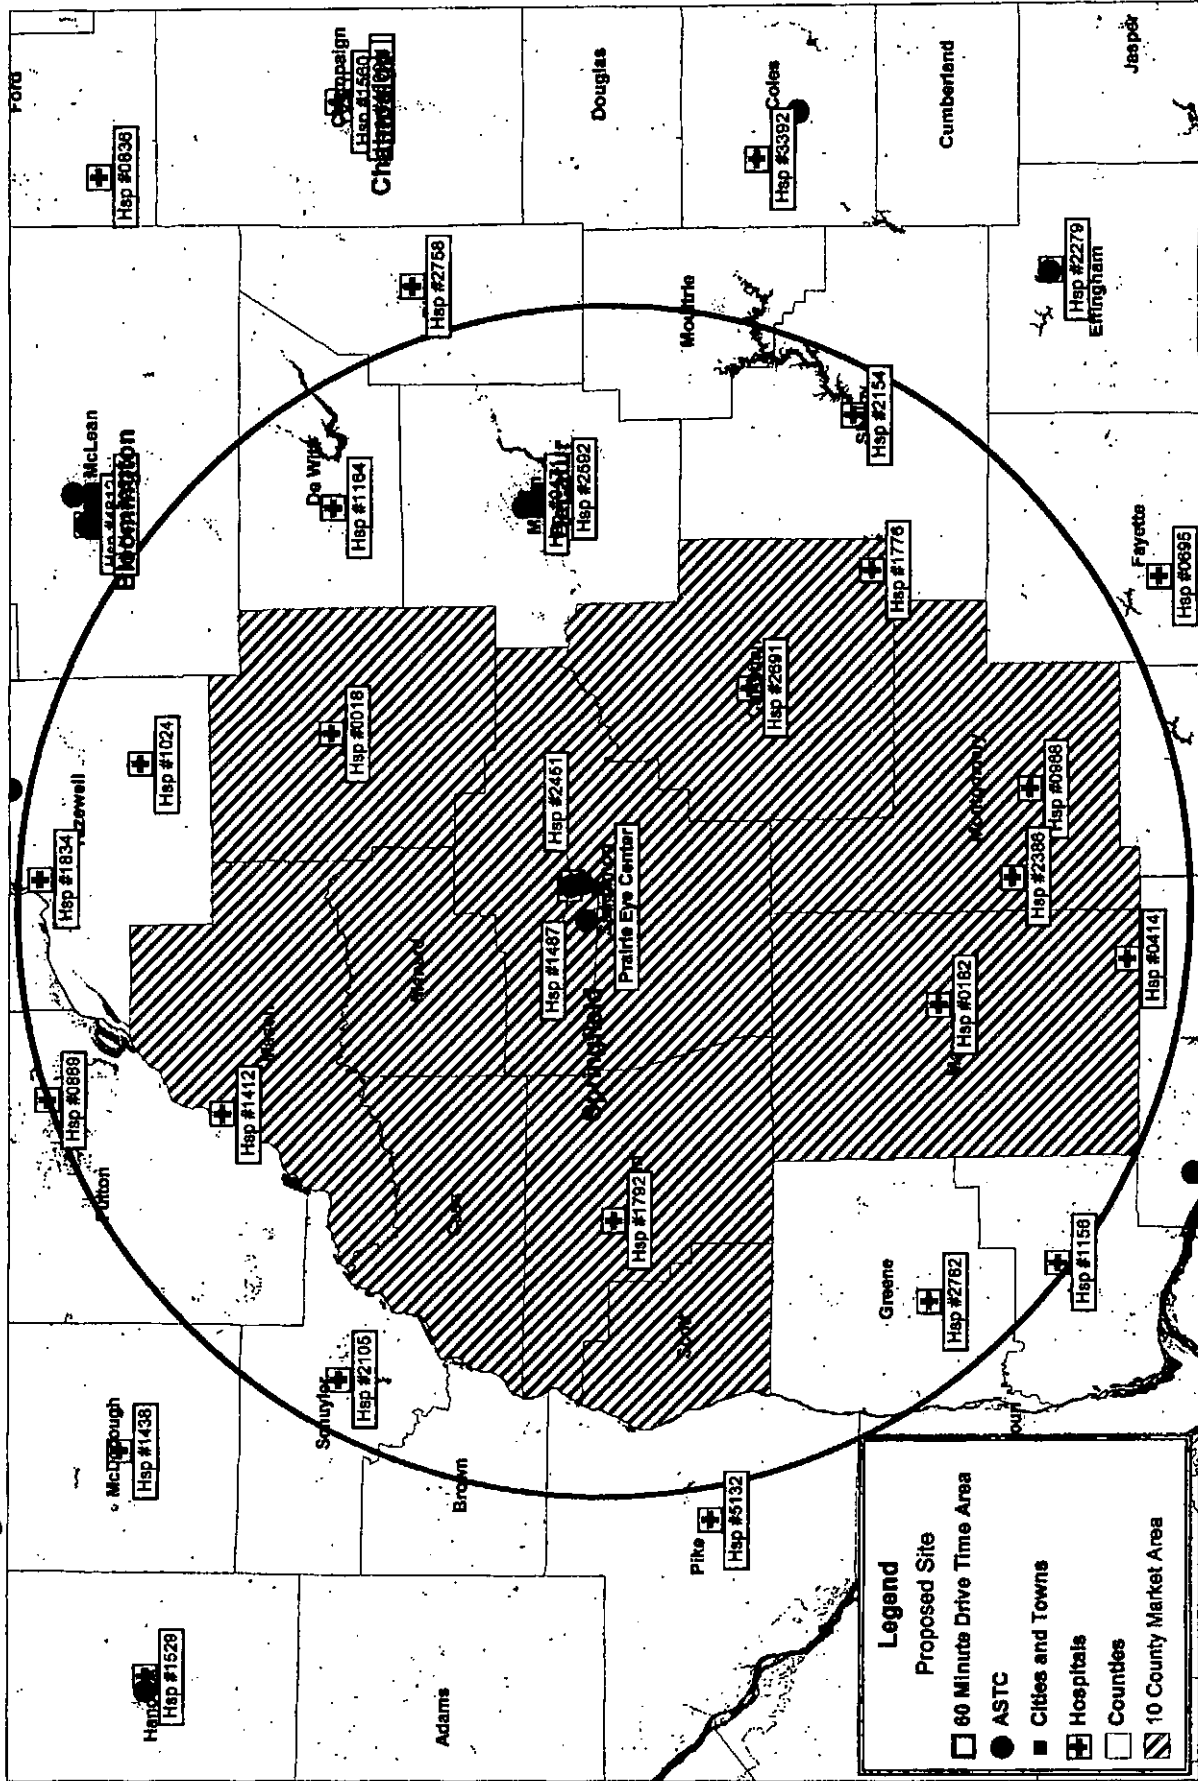

ATTACHMENT GRC-6

Geographic Service Area

The geographic service area for the entire ASC is as presented in the original CON application. Dr. Watson's patients, as referenced in the patient origin information by zip code previously attached, all fall within this GSA (see attached). Dr. Watson's referrals will all come from the immediate Springfield area.

Criterion 1110.1540 Treatment Room Need Assessment

The existing ASC has 2 operating rooms.

Attached is information from the original application indicating the intent to refer 200 - 250 monthly procedures (or 2,524-3,000 procedures annually) to the proposed surgery center and still be able to refer or perform cases at area hospitals for those residents whom it would best serve. Also attached is a list of the top seven most common ophthalmologic procedures to calculate the average time per procedure. Utilizing the State's "Treatment Room Need Assessment" three rooms are required. Please refer to the calculations following:

$$\begin{aligned} & (2.524 \text{ cases annually} * 87.6 \text{ min.}) / 60 \text{ min/hr.} \\ & \quad 250 \text{ days/Yr.} \times 7.5 \text{ Hrs/Day} \times .80 \\ = & \quad 3.694 \text{ hours of surgery annually} \quad = 2.5 \text{ rooms or 3 operating rooms.} \\ & \quad 1,500 \text{ hours} \end{aligned}$$

It should be noted that these two ophthalmologic surgeons referral projections were a *minimum* estimate of the number of patients that will be referred annually to the proposed facility. In addition a new ophthalmologic surgeon, Dr. Rauscher, has joined Dr. Yeh's medical practice since the ASC application was approved and is actively referring surgeries.

Dr. Watson will add 280 referrals a year to these numbers which will assure appropriate utilization of the existing 2 ORs.

**SECTION XVII. REVIEW CRITERIA RELATING TO NON-HOSPITAL
AMBULATORY SURGERY**

D. Criterion 1110.1540.d, Treatment Room Need Assessment

1. The number of procedure rooms proposed.

This project is for the proposal of two surgical rooms and one minor procedure room, thus, a total of three operating rooms.

2. The estimated time per procedure including cleanup and setup time and the methodology used in arriving at this figure.

Appended as ATTACHMENT GRC-3B, is a listing of the Applicant's 7 most common procedures. The cited time includes preparation time, actual surgery time, and clean-up time, which together, total an average of 87.6 minutes per procedure or 1.46 hours per procedure. It should be noted that this time is consistent with the time represented at the local hospital (St. John's).

**SECTION XVII. REVIEW CRITERIA RELATING TO NON-HOSPITAL
AMBULATORY SURGERY**

C. Criterion 1110.1540.c, Projected Patient Volume

Read the criterion and provide signed letters from physicians that contain the following:

1. The number of referrals anticipated annually for each specialty.

Please refer to the physician referral letters appended as **ATTACHMENT GRC-3C**. The two primary physicians have the single specialty of Ophthalmology. Their referral letters are projecting a range of 211-250 monthly referrals to the proposed ASTC annually. In addition, these doctors will continue referring cases to area hospitals.

2. For the past 12 months, the name and address of health care facilities to which patients were referred, including the number of patients referred for each surgical specialty by facility.

The following is a summary of physician referral letters as taken from **ATTACHMENT GRC-3A**. Sandra Yeh, M.D. performed 1,997 outpatient surgical procedures during the past year. Most of these procedures were completed at St. John's Hospital in Springfield with a minimum number of surgical cases at Memorial Medical Center. All of Dr. Stuart Farris cases (960) were performed at St. John's Hospital. Statistically, 85% of all cases originated from within the identified 10-county designated area or less than 60 minutes.

The combined total of all procedures of clients who live within the identified market area for those procedures that were performed in a licensed facility equate to **2,524** cases, which can justify 2.5 or 3 operating rooms based on the project time per

case. Furthermore, these two physicians have indicated that in the future they project they could refer between 211 and 250 cases monthly or a combined annual projected referral of 2,532 – 3,000 procedures. These referrals are only based upon historical procedures within the market area and do not include the justification of the growth experienced by the practice as well as the population growth pattern specifically for the 65+ age group (see ATTACHMENT GRC-1H for the demographic statistics). During the past couple of years both physicians' practices had increased as had their surgical cases. Please refer to the charts by CPT codes illustrating the increase in volume between years 2005 to present. Refer to ATTACHMENT GRC-6A. In addition, a new physician is scheduled to begin practice in August 2008. This physician, Dr. Fredrick Rauscher is a highly trained glaucoma specialist from one of the countries most prestigious programs. Because of the difficult time in obtaining sufficient block surgery time at both hospitals, it is very difficult to recruit specialized physicians. Dr. Rauscher is projecting a case load of approximately 75 patients a month or over 900 cases in his first year. This is based on his specialty in glaucoma, and the practice's historical utilization prior to losing its last glaucoma specialist.

3. A statement that the projected patient volume will come from with the proposed GSA.

As originally indicated there are presently three physicians performing surgical

procedures with one of the physician performing all of his cases within an office setting. As indicated in the item above and in the physician referral letters appended as **ATTACHMENT GRC-3C**, these doctors have performed 2,524 procedures that are qualified to be used to justify this project. The qualified procedures account for over **3,694** hours which justifies three operating rooms from within the designated market area.

4. A statement that the information in the referral letter is true and correct to the best of his or her belief.

As indicated in the items above and in the physician referral letters appended as **ATTACHMENT GRC-3A**, these doctors have all certified their referral letters with true and accurate statements and all signatures have been notarized.

Criterion 1110.1540 Target Population

This criterion is inapplicable as the applicant is not proposing a surgicenter. The target population will be the same as that approved on application for project No. 08-049 which allowed establishment of the proposed surgicenter. See previous information provided on the largest GSA for the surgicenter as well as Dr. Watson's letter reflecting all of the OP procedures he will refer to the surgicenter all currently done at St. John's Hospital in Springfield. Dr. Watson's patients generally will come from the Springfield area. He currently has surgical privileges at only two hospitals (St. John's and Memorial both in Springfield, Illinois). Ninety five percent (95%) of Dr. Watson's patients are from zip codes 62702, 62711, 62703, 62712, 62629, 62707 and 62561.

Criterion 1110.1540 Projected Patient Volume

See previously attached data from initial application regarding the ophthalmologic surgeries to be performed. If necessary, some of these procedures may be performed at area hospitals to allow time for the orthopedic procedures proposed.

See attached correspondence, certified to by Dr. Watson who proposes referring 280 patients in the next 12 months to the surgery center.

Illinois Health Facilities and Services Review Board

Dear Illinois Health Facilities and Services Review Board,

I am a Board Certified Orthopedic Surgeon. In the past 12 months I have referred 300 surgical procedures to St. John's Hospital. If the application to add orthopedic surgery to Prairie SurgiCenter Associates is approved, I intend to refer 280 procedures a year to the SurgiCenter. These surgeries would be as referenced on the attached document. Also attached is the patient origin by zip codes for all of the surgeries I referred over the past 12 month period. I anticipate the surgeries I refer to the SurgiCenter would also be scattered throughout these zip codes, with a concentration living in Springfield or immediate surrounding areas.

I am not a member of the physician groups that own and operate the Koke Mill Orthopedic surgery center in Springfield or the Springfield Clinic which offers orthopedic surgery as part of its multi-specialty surgery center. I have not referred patients there in the past and do not anticipate doing so in the future as those clinics are limited to the physicians who are part of the surgery centers ownership/operations. I do not believe that my referrals to Prairie SurgiCenter Associates will negatively impact the hospitals where I currently send my patients because the types of procedures I will refer to the surgery center are not the type of procedures that hospitals wish to dedicate OR time to. They are relatively minor surgical procedures that are best suited for a surgery center setting and that will allow patients better through put and registration experiences, ease of parking access and lower costs. Further, Prairie SurgiCenter Associates has indicated that I can do all of my procedures on Friday, which is ideal for the return to work on that following Monday (as opposed to having to work with hospitals to reserve time for these minor procedures which sometimes then must occur during the week causing a patient to take a day or two off work to recuperate)

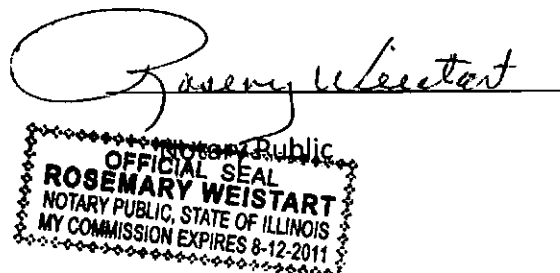

I appreciate the Board's consideredation.

Subscribed to and sworn to me this 23

Sincerely,

day of November 2010.

Dear Dr. Yeh:

It is my hope that I will soon be able to perform outpatient surgery at the new Prairie Surgical Center. This would be a great benefit for my orthopedic patients, as many of them have ambulatory deficiencies that make it difficult to get in and out of a large hospital. I welcome this convenience for them.

As you know, I did perform approximately 300 outpatient surgeries within the last year. If I did have privileges at your surgery center, I anticipate that approximately 10% of these outpatient surgeries would still be performed at St. John's Hospital. A breakdown of CPT codes is enclosed.

Although I do a variety of outpatient surgeries, the vast majority of these cases are less than 30 minutes, and I anticipate that an average estimated time per procedure, including cleanup and setup, would be about 45 minutes. The additional efficiency provided by your surgery center would be a great benefit for my busy schedule.

Approximately 25% of all my outpatient surgeries are Medicare, and approximately 25% are performed through Worker's Compensation. Approximately 48% of all outpatient surgeries for my are with either HMOs or PPOs, and 2% are either Medicaid or charity care.

Analysis from last year's data reveals the vast majority of cases that I perform are on patients that reside in the Springfield area and surrounding communities. A breakdown by zip code follows:

62702 - 30%
62711 - 25%
62703 - 20%
62712 - 9%
62629 - 5%
62707 - 3%
62561 - 3%
Other - 5%

Essentially, all of my outpatient surgeries within the last year have been performed at St. John's Hospital. Although I do have block time at St. John's Hospital, there are many times that my specific schedule does not allow me to fit cases within the blocks efficiently. The expected blocks available at your surgery center should allow my patients to have their surgeries scheduled promptly, with less scheduling difficulties.

I look forward to working with you in the near future, and the information provided in this letter is true and correct to the best of my belief.

Sincerely,

Michael D. Watson M.D.

Criterion 1110.1540 Impact On Other Facilities

See Attached.

There is no known opposition to the project.

Some orthopedic surgical procedures currently done by Dr. Watson at St. John's by Dr. Watson may be done by him at the surgicenter. However, as previously mentioned, these procedures are more appropriate for a surgicenter and will allow St. John's to use its ORs for hospital based surgeries.

Criterion 1110.1540 (h) Change in Scope of Service

Orthopedic surgery is an available service in the GSA. However, for the reasons previously stated herein the proposed procedures will reduce costs and provide for a better patient experience if performed in an ASC setting as opposed to in an acute care hospital.

Further, Dr. Watson has not and will not refer his patients to other surgicenters in the area as they do not offer orthopedic services, are too highly utilized to accommodate his patient refers or will not allow him to admit patients due to closed credentialing.

Prairie Surgical Associates, LLC is for profit entity. However, it provides care to all patients regardless of ability to pay. 25% of Dr. Watson's patients are Medicare and, 2% are Medicaid/self pay (based on his private practice data).
