It would be a very big mistake to close our hospital. Our pts. have no where else to go and no one wants to take them but us. We take very good care of our pts. and we need to continue to do so. We need to expand our hospital - God knows we have the room - instead of closing it. We could serve the public better and become a world class institution on our beautiful campus. Please don't close our hospital, I fear there will be people dying in the streets if we do. Thank you
