HEALTH FACILITIES &
SERVICES REVIEW BOARD

To whom it may concern,

I support the Transitional Care of Arlington Heights project.

Top Quality Care and Expertise

Transitional Care Center of Arlington Heights will provide post-hospital care to high acuity patients who are increasingly forced to leave hospitals "sicker and quicker" these days. Some go home with limited home care and have no family members available to provide the additional support they need. Others who need this important level of care may need to go outside the area for services.

Holistic Approach in a Wellness Center Setting

While there are other excellent acute rehabilitation facilities in the area, many are either fully occupied, only serve acute needs, are outdated or are restricted to serving special populations. Furthermore, not all are capable of handling the high acuity patient that will be served by Transitional Care Center of Arlington Heights or the patient who prefers to recover in a non-institutional/nursing home setting.

Healing our Residents and Helping our Economy

The development of Transitional Care Center of Arlington Heights will bring innovation and address a specific and under-served need in the Arlington Heights and surrounding communities while rounding out a complement of fine medical services.

I appeal to you and members of the Health Facilities and Services Review Board to lend your support to this new project.

Sincerely,

Sharon L. DeVault
