RE: Project 11-016
ARA McHenry Dialysis Center

Dear Mr. Constantino:

This letter is being provided in support of the above-referenced project, and in response to review criterion 1110.1430b3B.

Enclosed please find three tables that identify, by initials, the patients that I referred for chronic dialysis during 2008, 2009, and 2010; identifying the patients' ZIP Code of residence, as well as the ESRD facility to which they were referred. A total of 176 patients were referred during that 3-year period.

Also attached is a listing of patients that will, in all probability, and under my direct care, initiate dialysis at the McHenry facility during ARA McHenry Dialysis Center's first 24 months of operation. Once initiating dialysis, I would expect virtually all of these patients to continue on dialysis during the facility's first two years of operation. The patients on this list represent only those "pre-ESRD" patients currently in my practice, and one would expect other patients to enter the practice within the next twelve months that would also initiate dialysis during the first 24 months of ARA McHenry Dialysis Center's opening.

While my practice experiences an over-all rate of 13-14% of dialysis patients leaving dialysis annually, I would anticipate the number of patients leaving ARA McHenry during its first two years of operation to be negligible, since they will be largely patients initiating dialysis, rather than patients that have been on dialysis for a number of years.

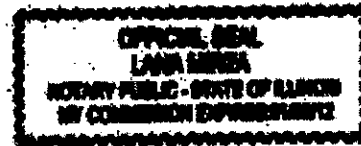

The prospective dialysis recipients identified on the attached list have not been provided in support of any on ESRD project.

The information provided in this letter is true and correct, to the best of my knowledge.

Sincerely, *M. Zahid*
