- WORK CONDITIONING

Again, we have serious concerns about the detrimental impact the new Vista Hospital in Lindenhurst would have on our hospital, other area providers and most importantly, patients throughout all of Lake County. With already six hospitals, two FECs, several surgery centers, countless medical office buildings and physician offices in Lake County, there is simply no need for a new hospital. Moreover, we believe it would drive up health care costs and dilute the quality of health care already available to residents all over the country.

If this project is approved, it will significantly impact Condell's patient volumes, and will weaken the quality of care available to patients of Lake County. The fact is that patients of Lake County are already well-served by the existing hospitals and health care facilities.

There's a public hearing on November 15, 2012 in Lake Villa, in which members of the Illinois Health Facilities and Services Review Board will hear testimony for and against Vista's proposed project. The Board weighs the opinion of the general public and local leaders heavily. We will be working with interested parties on testimony and letters highlighting the concerns with the application and negative impact it will have not only on our hospital, but on providers and patients throughout Lake County.

SERVICES REVIEW BOARD**

RE: Letter of Opposition, Project # 12-081, Vista Medical Center – Lindenhurst

Dear Mr. Galassie,

I am writing in **opposition** to Vista Health System's proposal for a new hospital in Lake County. As an area physician, my patients are my number one priority. I am concerned that a new hospital in Lake County is not in their best interests, as it will duplicate existing services, result in an unnecessary increase in patient transfers, and jeopardize quality of care to patients in the area.

No question, healthcare is trending away from inpatient care. Procedures that once required an overnight stay can now be done on an outpatient basis. Ambulatory care centers are the way of the future – particularly in areas like Lake County that already have an excess of inpatient beds.

It is also important to note that Vista's proposed hospital offers only limited services and would not meet specialty care needs. For many high-level health services, patients would have to transfer to another regional facility like Advocate Condell Medical Center in Libertyville. This proposed facility will result in an increase in unnecessary patient transfers.

No one will argue that access to care is critical. However, in time-sensitive medical situations, all county residents are already within 15 minutes of emergency departments. Among those emergency departments is Vista's current Freestanding Emergency Center in Lindenhurst. Plain and simple, Lake County residents are already well-served when it comes to healthcare.

It is with my patients in mind that I oppose this project. Not only does it fail to bring new resources to the community, it jeopardizes the high-quality care that residents of Lake County currently enjoy.

Sincerely,

RE: Letter of Opposition, Project # 12-081, Vista Medical Center – Lindenhurst

Dear Mr. Galassie,

I am writing to **oppose** the new Lindenhurst hospital proposed by Vista Health System. As someone who is concerned with preserving healthcare quality in Lake County, I believe that it is clear that a new hospital here would jeopardize vital services and programs, harming the existing infrastructure at the expense of new and unneeded project.

Right now, Lake County has six full-service hospitals. The county is also home to Freestanding Emergency Centers, ambulatory surgery centers and medical office buildings, where physicians see patients close to their homes every day. This is a well-served region—with just enough patients to sustain the major hospitals. Adding another full-service hospital represents an unnecessary and irresponsible expenditure of healthcare dollars.

Further, the proposed project wouldn't provide anywhere near the same level of services as Advocate Condell Medical Center in Libertyville. But it would take away patients, which would hurt other hospitals' abilities to provide excellent healthcare for Lake County.

I oppose this project for the citizens of Lake County. We must preserve the critical services and programs that communities deserve. A new and unneeded hospital would upset a fundamental balance, and I ask you to deny it.

I am concerned that a new hospital in Lake County is not in their best interests, as it will duplicate existing services, result in an unnecessary increase in patient transfers, and jeopardize quality of care to patients in the area.

No question, healthcare is trending away from inpatient care. Procedures that once required an overnight stay can now be done on an outpatient basis. Ambulatory care centers are the way of the future – particularly in areas like Lake County that already have an excess of inpatient beds.

It is also important to note that Vista's proposed hospital offers only limited services and would not meet specialty care needs. For many high-level health services, patients would have to transfer to another regional facility like Advocate Condell Medical Center in Libertyville. This proposed facility will result in an increase in unnecessary patient transfers.

No one will argue that access to care is critical. However, in time-sensitive medical situations, all county residents are already within 15 minutes of emergency departments. Among those emergency departments is Vista's current Freestanding Emergency Center in Lindenhurst. Plain and simple, Lake County residents are already well-served when it comes to healthcare.

It is with my patients in mind that I oppose this project. Not only does it fail to bring new resources to the community, it jeopardizes the high-quality care that residents of Lake County currently enjoy.

Sincerely,

Jasmina Oberhaus, DO

RE: Letter of Opposition, Project # 12-081, Vista Medical Center – Lindenhurst

Dear Mr. Galassie,

November 8, 2012

I am writing in **opposition** to Vista Health System's proposal for a new hospital in Lake County. As an area physician, my patients are my number one priority. I am concerned that a new hospital in Lake County is not in their best interests, as it will duplicate existing services, result in an unnecessary increase in patient transfers, and jeopardize quality of care to patients in the area.

No question, healthcare is trending away from inpatient care. Procedures that once required an overnight stay can now be done on an outpatient basis. Ambulatory care centers are the way of the future – particularly in areas like Lake County that already have an excess of inpatient beds.

It is also important to note that Vista's proposed hospital offers only limited services and would not meet specialty care needs. RE: Letter of Opposition, Project # 12-081, Vista Medical Center – Lindenhurst

Dear Mr. Galassie,

I am writing to **oppose** the new Lindenhurst hospital proposed by Vista Health System. As someone who is concerned with preserving healthcare quality in Lake County, I believe that it is clear that a new hospital here would jeopardize vital services and programs, harming the existing infrastructure at the expense of new and unneeded project.

Right now, Lake County has six full-service hospitals. The county is also home to Freestanding Emergency Centers, ambulatory surgery centers and medical office buildings, where physicians see patients close to their homes every day. This is a well-served region—with just enough patients to sustain the major hospitals. Adding another full-service hospital represents an unnecessary and irresponsible expenditure of healthcare dollars.

Further, the proposed project wouldn't provide anywhere near the same level of services as Advocate Condell Medical Center in Libertyville. But it would take away patients, which would hurt other hospitals' abilities to provide excellent healthcare for Lake County.

I oppose this project for the citizens of Lake County. We must preserve the critical services and programs that communities deserve. A new and unneeded hospital would upset a fundamental balance, and I ask you to deny it.

Sincerely,
