STATE BOARD STAFF REPORT **CHANGE OF OWNERSHIP EXEMPTIONS**

I. The Exemption Application

The Illinois Health Facilities Planning Act defines a change of ownership as “a change in the person who has ownership or control of a health care facility’s physical plant and capital assets. A change in ownership is indicated by the following transactions: sale, transfer, acquisition, lease, change of sponsorship or other means of transferring control (20 ILCS 3960/3).

The Act also states “The State Board shall establish by regulation the procedures and requirements regarding issuance of exemptions. An exemption shall be approved when information required by the Board by rule is submitted. Projects eligible for an exemption, rather than a permit, include, but are not limited to, change of ownership of a health care facility. For a change of ownership of a health care facility between related persons, the State Board shall provide by rule for an expedited process for obtaining an exemption. In connection with a change of ownership, the State Board may approve the transfer of an existing permit without regard to whether the permit to be transferred has yet been obligated, except for permits establishing a new facility or a new category of service (20 ILCS 3960/6 (b)).

For the applicants to successfully address the exemption to permit for a change of ownership of a health care facility the applicants must provide the following information;

- The name and address of the health care facility;
- The name and address of the applicants;
- The Certificates of Good Standing for the applicants;
- The licensee and owner of the site of the health care facility;
