Dear Editor:

The purpose of my letter is to bring attention to the situation concerning the proposed building of a new dialysis facility in Danville. As a long time dialysis patient, I feel qualified to weigh in on the subject as one who has in depth knowledge of the processes and procedures involved.

I have been a patient of Dr. Sodhi and received my dialysis from Danville Dialysis for over 7 years. Dr. Sodhi is one of the most compassionate, caring individuals that I have ever met. He always has time to discuss any concerns or problems that I am having with dialysis, my health, or my well-being in general. He treats all of his patients with respect and dignity. In my opinion he is a "top notch" doctor.

Danville Dialysis is a very clean, modern facility where all patients receive excellent care. The staff there always treats me like family when I go for my dialysis treatments. Great care is taken to make sure all dialysis patients are monitored carefully and receive individualized care just for their particular health needs. I really cannot say enough good things about the care I have received from them.

I have had occasion to travel out of state and attended other dialysis facilities. These have not been positive experiences for me. The care and attention to detail that I experience here at Danville Dialysis is the exception and not the norm at many other dialysis centers. That is why I have many misgivings about a new facility coming to town. I do not wish to lose my good care.

RE: PROPOSED DaVITA DIALYSIS FACILITY
Project 15-003 Vermilion County Dialysis (DaVita)

Dear Board Members:

My name is Justin Hile.

I am a supporter of *Danville Dialysis Services* (DDS) in Danville, Illinois, a locally owned and run dialysis facility that has served our community faithfully for 13 years. I strongly oppose the application by Vermilion County Dialysis, known as DaVita, which has no direct ties or vested interest in our central Illinois community.

The dedicated staff of Danville Dialysis Services have always done their best to provide high quality kidney care. Availability of a locally owned and managed dialysis facility benefits not only patients, but also the entire community. As a community we know that if any of us were to need dialysis, Danville has a locally owned, state-of-the-art dialysis facility ready to care for us when we need it.

I understand that DDS has room for additional patients and that a new facility in town is NOT needed. Worse yet, as I see it, a DaVita facility may put Danville Dialysis Services out of business or diminish its ability to provide a full range of dialysis services.

I urge you to put our community first, and to deny the DaVita application.

Sincerely,

Signature
