**HEALTH FACILITIES &
SERVICES REVIEW BOARD**

Re: USRC Hickory Hills, LLC; Project No. 16-026

Dear Ms. Avery:

In response to the Department's completeness review of Applicants' application for a certificate of need permit for the referenced Project ("Application"), I enclose the following substitute pages to the Application.

- safety net/charity care statements,
- project completion date,
- transfer agreement,
- reasonableness of project costs chart,
- projected operating costs chart,
- total effect of project on capital costs chart, and
- other correcting earlier information.

Please insert these pages into the Application in place of the current pages. I believe these additional documents will complete the Application. If there is anything missing, please let me know, and I will get it to you right away.

Additionally, on behalf of Applicants, I respectfully request that the Illinois Health Facilities and Services Review Board (the "Board") grant expedited review of the Application and consider the Application at the Board's October meeting. The project proposes to establish a 13-station dialysis facility in Hickory Hills. Currently, there is an unmet need for 60 dialysis stations, which the proposed project will help relieve. It is critical for Applicants to have their Application heard at the Board's October meeting. If the Board does not consider the Application until its December meeting, winter conditions will significantly prolong the completion of the project and delay area residents access to the dialysis services they need.

In addition, in their negotiations for leased space and in arranging for proceeding timely with the project, Applicants relied on the Board's published meeting dates and the dates IDPH must determine an application in order to put it on the agenda for those

meeting dates. If the Board does not consider at its October meeting, Applicants will have to expend considerable time and resources to revisit these earlier efforts, which might jeopardize the project going forward.

I appreciate your consideration of our request for expedited review. If you have any questions or need any additional information, please contact me.

Respectfully,

Maldistribution

This Project will not result in maldistribution, because there is not an excess of stations in HSA 007. On the contrary, this area has a need for 54 additional stations, as published in the IDPH Revised Needs Determinations for ESRD Stations, dated May 11, 2016. A copy of the relevant page of the Long-Term Care Bed Inventory Update is included in this attachment.

The ratio of stations to population does not exceed one and one-half times the State average.

The ratio of stations to population within a 30-minute drive time of the proposed facility does not exceed one and a half times the State average. According to the most-recently available IDPH Revised Needs Determinations for ESRD Stations and the 2010 census-population statistics, the state station to population ratio is currently 1 station per 2,918 persons. One and one-half times the state average equals 1 station per 1,945 persons. The calculated station to population ratio within the 30-minute drive time of the proposed facility is 1 station per 2,011 persons. Therefore, the station to population ratio within the 30-minute drive time of the proposed facility does not exceed one and one-half times the State average, showing that there is not a maldistribution of stations in the 30-minute drive time of the proposed facility.

The calculation for the state station to population ratio utilizes 2010 census data for the State of Illinois and the total station count in the IDPH Revised Needs Determinations for ESRD Stations, dated May 11, 2016. The calculation of the station to population ratio for facilities within a 30-minute drive time includes all facilities and zip codes identified in the Unnecessary Duplication of Services attachment.

9528 S. Roberts Road, Hickory Hills, Illinois 60475

Total Number of Stations for Facilities within a 30 Minute Drive Time	1,006
Total Population for Zip Codes within a 30 Minute Drive Time	2,023,455
Ratio of Stations to Population	1/2,011

State of Illinois

Total Number of Stations in the State of Illinois	4,396
Total Population in the State of Illinois	12,830,632
Ratio of Stations to Population	1/2,918
One and One-Half Times Ratio of Stations to Population	1/1,945

Impact of Project on Other Area Providers

The addition of 13 ESRD stations at the Facility Dialysis Facility would account for only 1.3% of the total shift capacity in the unadjusted 30-minute drive time area and 0.99% of the total shift capacity in HSA 7. Assuming the Facility achieved immediately 80% utilization (9,734 shifts per year), the facility would only make a 1.03% difference in the 30-minute drive time occupancy levels and less than a 0.8% difference in the total shift capacity of HSA 7. This increase in stations is fractional compared to the number of licensed stations in the area, thus it is unlikely that the addition of these stations will lower the utilization of other area providers, both those who are operating above 80% and those operating below 80%.

Additionally, HSA 7 has a station need of 60 stations, as IDPH published in its Revised Needs Determinations for ESRD Stations, dated May 11, 2016.

Applicant bases these calculations on the 1,312 stations in the IDPH Revised Needs Determinations for ESRD Stations, dated May 11, 2016, and the 30-minute drive time facilities as identified in Attachment 26 Unnecessary Duplication of Services. Shift capacity of each station is 3 shifts per day, 6 days a week, 52 weeks a year.

Staff Recruitment

U.S. Renal Care Inc. recruits facility personnel using various job posting websites as well as a recruitment tool maintained on the corporate website (available at http://www.usrenalcare.com/us_renal_care_careers.htm).

Training

Applicant maintains rigorous orientation and training requirements for all staff of dialysis facilities. Clinical staff receive comprehensive orientation training in multiple areas (policies related to orientation and competencies are included in this attachment). Such staff is also required to comply with any federal or state training requirements necessary for certification in their respective fields. In addition, U.S. Renal maintains both corporate and facility level training requirements for facility staff. A sample of U.S. Renal Care's orientation and training materials follow this page. For example, all staff members are subject to corporate requirements for annual competency assessments, quarterly assignments, and mandatory training programs.

Staffing Plan

Applicant maintains staffing ratios in compliance with state requirements for the state in which Applicant maintains a dialysis facility. Included in this attachment is the U.S. Renal Care policy regarding staffing ratios, which demonstrates the requirement for on-duty RNs when the patients are present and maintenance of direct patient care providers in compliance with state regulations. In the case of Illinois Applicant will maintain a ratio of one direct patient care provider to every four patients.
