APPEND DOCUMENTATION AS ATTACHMENT-3, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

Organizational Relationships

Provide (for each co-applicant) an organizational chart containing the name and relationship of any person or entity who is related (as defined in Part 1130.140). If the related person or entity is participating in the development or funding of the project, describe the interest and the amount and type of any financial contribution.

APPEND DOCUMENTATION AS ATTACHMENT-4, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

Flood Plain Requirements

[Refer to application instructions.]

Provide documentation that the project complies with the requirements of Illinois Executive Order #2005-5 pertaining to construction activities in special flood hazard areas. As part of the flood plain requirements please provide a map of the proposed project location showing any identified floodplain areas. Floodplain maps can be printed at www.FEMA.gov or www.illinoisfloodmaps.org. **This map must be in a readable format.** In addition please provide a statement attesting that the project complies with the requirements of Illinois Executive Order #2005-5 (<http://www.hfsrb.illinois.gov>).

APPEND DOCUMENTATION AS ATTACHMENT -5, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

Historic Resources Preservation Act Requirements

[Refer to application instructions.]

Provide documentation regarding compliance with the requirements of the Historic Resources Preservation Act.

APPEND DOCUMENTATION AS ATTACHMENT-6, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

DESCRIPTION OF PROJECT

1. Project Classification

[Check those applicable - refer to Part 1110.40 and Part 1120.20(b)]

Part 1110 Classification:

- ☒ Substantive
- ☐ Non-substantive

2. Narrative Description

Provide in the space below, a brief narrative description of the project. Explain **WHAT** is to be done in **State Board defined terms**, **NOT WHY** it is being done. If the project site does **NOT** have a street address, include a legal description of the site. Include the rationale regarding the project's classification as substantive or non-substantive.

New Lenox Endoscopy, LLC; SGNL, LLC and Southwest Gastroenterology, S.C. (collectively, the "Applicants") seek authority from the Illinois Health Facilities and Services Review Board to establish an ambulatory surgical treatment center limited to gastroenterology with 3 procedure rooms and 9 recovery stations in a medical building located at 678 Cedar Crossing Drive, New Lenox, IL (the "Endoscopy Center"). The Endoscopy Center will consist of 4,697 gross square feet of clinical space and 1,614 gross square feet of non-clinical space for a total of 6,311 gross square feet of rentable space.

This project is classified as a substantive project because it proposes to establish a new health care facility.

Project Costs and Sources of Funds

Complete the following table listing all costs (refer to Part 1120.110) associated with the project. When a project or any component of a project is to be accomplished by lease, donation, gift, or other means, the fair market or dollar value (refer to Part 1130.140) of the component must be included in the estimated project cost. If the project contains non-reviewable components that are not related to the provision of health care, complete the second column of the table below. Note, the use and sources of funds must equal.

Project Costs and Sources of Funds			
USE OF FUNDS	CLINICAL	NONCLINICAL	TOTAL
Preplanning Costs			
Site Survey and Soil Investigation			
Site Preparation			
Off Site Work			
New Construction Contracts			
Modernization Contracts			
Contingencies			
Architectural/Engineering Fees			
Consulting and Other Fees	\$22,500	\$7,500	\$30,000
Movable or Other Equipment (not in construction contracts)	\$194,800	\$55,200	\$250,000
Bond Issuance Expense (project related)			
Net Interest Expense During Construction (project related)			
Fair Market Value of Leased Space or Equipment	\$1,294,073	\$430,549	\$1,724,622
Other Costs To Be Capitalized			
Acquisition of Building or Other Property (excluding land)			
TOTAL USES OF FUNDS	\$1,511,373	\$493,249	\$2,004,622
SOURCE OF FUNDS	CLINICAL	NONCLINICAL	TOTAL
Cash and Securities	\$217,300	\$62,700	\$280,000
Pledges			
Gifts and Bequests			
Bond Issues (project related)			
Mortgages			
Leases (fair market value)	\$1,294,073	\$430,549	\$1,724,622
Governmental Appropriations			
Grants			
Other Funds and Sources			
TOTAL SOURCES OF FUNDS	\$1,511,373	\$493,249	\$2,004,622
NOTE: ITEMIZATION OF EACH LINE ITEM MUST BE PROVIDED AT ATTACHMENT-7, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.			

Provide the following information, as applicable, with respect to any land related to the project that will be or has been acquired during the last two calendar years:

Project Status and Completion Schedules

Indicate the stage of the project's architectural drawings:

- Anticipated project completion date (refer to Part 1130.140): July 31, 2018

☐ Purchase orders, leases or contracts pertaining to the project have been executed.

☐ Project obligation is contingent upon permit issuance. Provide a copy of the contingent "certification of obligation" document, highlighting any language related to CON Contingencies

☒ Project obligation will occur after permit issuance.

State Agency Submittals - Not Applicable

☐ Cancer Registry

☐ APORS

☐ All formal document requests such as IDPH Questionnaires and Annual Bed Reports been submitted

☐ All reports regarding outstanding permits

53566288.1

Cost Space Requirements

Provide in the following format, the department/area **DGSF** or the building/area **BGSF** and cost. The type of gross square footage either **DGSF** or **BGSF** must be identified. The sum of the department costs **MUST** equal the total estimated project costs. Indicate if any space is being reallocated for a different purpose. Include outside wall measurements plus the department's or area's portion of the surrounding circulation space. **Explain the use of any vacated space.**

Dept. / Area	Cost	Gross Square Feet		Amount of Proposed Total Gross Square Feet That Is:			
		Existing	Proposed	New Const.	Modernized	As Is	Vacated Space
REVIEWABLE							
Medical Surgical							
Intensive Care							
Diagnostic Radiology							
MRI							
Total Clinical							
NON REVIEWABLE							
Administrative							
Parking							
Gift Shop							
Total Non-clinical							
TOTAL							
APPEND DOCUMENTATION AS <u>ATTACHMENT-9</u> , IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.							

Facility Bed Capacity and Utilization Not Applicable

Complete the following chart, as applicable. Complete a separate chart for each facility that is a part of the project and insert following this page. Provide the existing bed capacity and utilization data for the latest **Calendar Year for which the data are available**. Include **observation days in the patient day totals for each bed service**. Any bed capacity discrepancy from the Inventory will result in the application being deemed **incomplete**.

CERTIFICATION

The application must be signed by the authorized representative(s) of the applicant entity. The authorized representative(s) are:

- in the case of a corporation, any two of its officers or members of its Board of Directors;
- in the case of a limited liability company, any two of its managers or members (or the sole manager or member when two or more managers or members do not exist);
- in the case of a partnership, two of its general partners (or the sole general partner, when two or more general partners do not exist);
- in the case of estates and trusts, two of its beneficiaries (or the sole beneficiary when two or more beneficiaries do not exist); and
- in the case of a sole proprietor, the individual that is the proprietor.

This Application for Permit is filed on the behalf of New Lenox Endoscopy, LLC* in accordance with the requirements and procedures of the Illinois Health Facilities Planning Act. The undersigned certifies that he or she has the authority to execute and file this application for permit on behalf of the applicant entity. The undersigned further certifies that the data and information provided herein, and appended hereto, are complete and correct to the best of his or her knowledge and belief. The undersigned also certifies that the permit application fee required for this application is sent herewith or will be paid upon request.

SECTION III – BACKGROUND, PURPOSE OF THE PROJECT, AND ALTERNATIVES - INFORMATION REQUIREMENTS

This Section is applicable to all projects except those that are solely for discontinuation with no project costs.

Criterion 1110.230 – Background, Purpose of the Project, and Alternatives

READ THE REVIEW CRITERION and provide the following required information:

BACKGROUND OF APPLICANT

1. A listing of all health care facilities owned or operated by the applicant, including licensing, and certification if applicable.
2. A certified listing of any adverse action taken against any facility owned and/or operated by the applicant during the three years prior to the filing of the application.
3. Authorization permitting HFSRB and DPH access to any documents necessary to verify the information submitted, including, but not limited to: official records of DPH or other State agencies; the licensing or certification records of other states, when applicable; and the records of nationally recognized accreditation organizations. **Failure to provide such authorization shall constitute an abandonment or withdrawal of the application without any further action by HFSRB.**
4. If, during a given calendar year, an applicant submits more than one application for permit, the documentation provided with the prior applications may be utilized to fulfill the information requirements of this criterion. In such instances, the applicant shall attest the information has been previously provided, cite the project number of the prior application, and certify that no changes have occurred regarding the information that has been previously provided. The applicant is able to submit amendments to previously submitted information, as needed, to update and/or clarify data.

APPEND DOCUMENTATION AS ATTACHMENT-11, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM. EACH ITEM (1-4) MUST BE IDENTIFIED IN ATTACHMENT 11.

PURPOSE OF PROJECT

1. Document that the project will provide health services that improve the health care or well-being of the market area population to be served.
2. Define the planning area or market area, or other, per the applicant's definition.
3. Identify the existing problems or issues that need to be addressed, as applicable and appropriate for the project. [See 1110.230(b) for examples of documentation.]
4. Cite the sources of the information provided as documentation.
5. Detail how the project will address or improve the previously referenced issues, as well as the population's health status and well-being.
6. Provide goals with quantified and measurable objectives, with specific timeframes that relate to achieving the stated goals **as appropriate.**

For projects involving modernization, describe the conditions being upgraded if any. For facility projects, include statements of age and condition and regulatory citations if any. For equipment being replaced, include repair and maintenance records.

APPEND DOCUMENTATION AS ATTACHMENT-12, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM. EACH ITEM (1-6) MUST BE IDENTIFIED IN ATTACHMENT 12.

ALTERNATIVES

- 1) Identify **ALL** of the alternatives to the proposed project:

Alternative options **must** include:

- A) Proposing a project of greater or lesser scope and cost;
 - B) Pursuing a joint venture or similar arrangement with one or more providers or entities to meet all or a portion of the project's intended purposes; developing alternative settings to meet all or a portion of the project's intended purposes;
 - C) Utilizing other health care resources that are available to serve all or a portion of the population proposed to be served by the project; and
 - D) Provide the reasons why the chosen alternative was selected.
- 2) Documentation shall consist of a comparison of the project to alternative options. The comparison shall address issues of total costs, patient access, quality and financial benefits in both the short term (within one to three years after project completion) and long term. This may vary by project or situation. **FOR EVERY ALTERNATIVE IDENTIFIED THE TOTAL PROJECT COST AND THE REASONS WHY THE ALTERNATIVE WAS REJECTED MUST BE PROVIDED.**
 - 3) The applicant shall provide empirical evidence, including quantified outcome data that verifies improved quality of care, as available.

APPEND DOCUMENTATION AS ATTACHMENT-13. IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

SECTION IV - PROJECT SCOPE, UTILIZATION, AND UNFINISHED/SHELL SPACE

Criterion 1110.234 - Project Scope, Utilization, and Unfinished/Shell Space

READ THE REVIEW CRITERION and provide the following information:

SIZE OF PROJECT:

1. Document that the amount of physical space proposed for the proposed project is necessary and not excessive. **This must be a narrative.**
2. If the gross square footage exceeds the BGSF/DGSF standards in Appendix B, justify the discrepancy by documenting one of the following:
 - a. Additional space is needed due to the scope of services provided, justified by clinical or operational needs, as supported by published data or studies;
 - b. The existing facility's physical configuration has constraints or impediments and requires an architectural design that results in a size exceeding the standards of Appendix B;
 - c. The project involves the conversion of existing space that results in excess square footage.

Provide a narrative for any discrepancies from the State Standard. A table must be provided in the following format with Attachment 14.

SIZE OF PROJECT				
DEPARTMENT/SERVICE	PROPOSED BGSF/DGSF	STATE STANDARD	DIFFERENCE	MET STANDARD?

APPEND DOCUMENTATION AS ATTACHMENT-14, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

PROJECT SERVICES UTILIZATION:

This criterion is applicable only to projects or portions of projects that involve services, functions or equipment for which HFSRB has established utilization standards or occupancy targets in 77 Ill. Adm. Code 1100.

Document that in the second year of operation, the annual utilization of the service or equipment shall meet or exceed the utilization standards specified in 1110. Appendix B. A narrative of the rationale that supports the projections must be provided.

A table must be provided in the following format with Attachment 15.

UTILIZATION					
	DEPT./ SERVICE	HISTORICAL UTILIZATION (PATIENT DAYS) (TREATMENTS) ETC.	PROJECTED UTILIZATION	STATE STANDARD	MET STANDARD?
YEAR 1					
YEAR 2					

APPEND DOCUMENTATION AS ATTACHMENT-15, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

UNFINISHED OR SHELL SPACE:

Provide the following information:

1. Total gross square footage of the proposed shell space;
2. The anticipated use of the shell space, specifying the proposed GSF to be allocated to each department, area or function;
3. Evidence that the shell space is being constructed due to
 - a. Requirements of governmental or certification agencies; or
 - b. Experienced increases in the historical occupancy or utilization of those areas proposed to occupy the shell space.
4. Provide:
 - a. Historical utilization for the area for the latest five-year period for which data are available; and
 - b. Based upon the average annual percentage increase for that period, projections of future utilization of the area through the anticipated date when the shell space will be placed into operation.

APPEND DOCUMENTATION AS ATTACHMENT-16, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

ASSURANCES:

Submit the following:

1. Verification that the applicant will submit to HFSRB a CON application to develop and utilize the shell space, regardless of the capital thresholds in effect at the time or the categories of service involved.
2. The estimated date by which the subsequent CON application (to develop and utilize the subject shell space) will be submitted; and
3. The anticipated date when the shell space will be completed and placed into operation.

APPEND DOCUMENTATION AS ATTACHMENT-17, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

SECTION VII - SERVICE SPECIFIC REVIEW CRITERIA

This Section is applicable to all projects proposing establishment, expansion or modernization of categories of service that are subject to CON review, as provided in the Illinois Health Facilities Planning Act [20 ILCS 3960]. It is comprised of information requirements for each category of service, as well as charts for each service, indicating the review criteria that must be addressed for each action (establishment, expansion and modernization). After identifying the applicable review criteria for each category of service involved, read the criteria and provide the required information, AS APPLICABLE TO THE CRITERIA THAT MUST BE ADDRESSED:

H. Non-Hospital Based Ambulatory Surgery

This section is applicable to all projects proposing to establish or modernize a non-hospital based ambulatory surgical treatment center or to the addition of surgical specialties.

1. Criterion 1110.1540(a), Scope of Services Provided

Read the criterion and complete the following:

- a. Indicate which of the following types of surgery are being proposed:

<input type="checkbox"/> Cardiovascular	<input type="checkbox"/> Obstetrics/Gynecology	<input type="checkbox"/> Pain Management
<input type="checkbox"/> Dermatology	<input type="checkbox"/> Ophthalmology	<input type="checkbox"/> Podiatry
<input checked="" type="checkbox"/> Gastroenterology	<input type="checkbox"/> Oral/Maxillofacial	<input type="checkbox"/> Thoracic
<input type="checkbox"/> General/Other	<input type="checkbox"/> Orthopedic	<input type="checkbox"/> Otolaryngology
<input type="checkbox"/> Neurology	<input type="checkbox"/> Plastic	<input type="checkbox"/> Urology

- b. Indicate if the project will result in a ☒ limited or ☐ a multi-specialty ASTC.

2. Criterion 1110.1540(b), Target Population

Read the criterion and provide the following:

- On a map (8 1/2" x 11"), outline the intended geographic services area (GSA).
- Indicate the population within the GSA and how this number was obtained.
- Provide the travel time in all directions from the proposed location to the GSA borders and indicate how this travel time was determined.

3. Criterion 1110.1540(c), Projected Patient Volume

Read the criterion and provide signed letters from physicians that contain the following:

- The number of referrals anticipated annually for each specialty.
- For the past 12 months, the name and address of health care facilities to which patients were referred, including the number of patients referred for each surgical specialty by facility.
- A statement that the projected patient volume will come from within the proposed GSA.
- A statement that the information in the referral letter is true and correct to the best of his or her belief.

4. Criterion 1110.1540(d), Treatment Room Need Assessment

Read the criterion and provide:

a. The number of procedure rooms proposed.

b. The estimated time per procedure including clean-up and set-up time and the methodology used in arriving at this figure.

5. Criterion 1110.1540(e), Impact on Other Facilities

Read the criterion and provide:

a. A copy of the letter sent to area surgical facilities regarding the proposed project's impact on their workload. **NOTE:** This letter must contain: a description of the project including its size, cost, and projected workload; the location of the proposed project; and a request that the facility administrator indicate what the impact of the proposed project will be on the existing facility.

b. A list of the facilities contacted. **NOTE:** Facilities must be contacted by a service that provides documentation of receipt such as the US. Postal Service, FedEx or UPS. The documentation must be included in the application for permit.

6. Criterion 1110.1540(f), Establishment of New Facilities

Read the criterion and provide:

a. A list of services that the proposed facility will provide that are not currently available in the GSA; or

b. Documentation that the existing facilities in the GSA have restrictive admission policies; or

c. For co-operative ventures,

a. Patient origin data that documents the existing hospital is providing outpatient surgery services to the target population of the GSA, and

b. The hospital's surgical utilization data for the latest 12 months, and

c. Certification that the existing hospital will not increase its operating room capacity until such a time as the proposed project's operating rooms are operating at or above the target utilization rate for a period of twelve full months; and

d. Certification that the proposed charges for comparable procedures at the ASTC will be lower than those of the existing hospital.

7. Criterion 1110.1540(g), Charge Commitment

Read the criterion and provide:

a. A complete list of the procedures to be performed at the proposed facility with the proposed charge shown for each procedure.

b. A letter from the owner and operator of the proposed facility committing to maintain the above charges for the first two years of operation.

8. Criterion 1110.1540(h), Change in Scope of Service

Read the criterion and, if applicable, document that existing programs do not currently provide the service proposed or are not accessible to the general population of the geographic area in which the facility is located.

APPEND DOCUMENTATION AS ATTACHMENT-27, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

The following Sections **DO NOT** need to be addressed by the applicants or co-applicants responsible for funding or guaranteeing the funding of the project if the applicant has a bond rating of A- or better from Fitch's or Standard and Poor's rating agencies, or A3 or better from Moody's (the rating shall be affirmed within the latest 18 month period prior to the submittal of the application):

- Section 1120.120 Availability of Funds – Review Criteria
- Section 1120.130 Financial Viability – Review Criteria
- Section 1120.140 Economic Feasibility – Review Criteria, subsection (a)

VIII. - 1120.120 - Availability of Funds

The applicant shall document that financial resources shall be available and be equal to or exceed the estimated total project cost plus any related project costs by providing evidence of sufficient financial resources from the following sources, as applicable: **Indicate the dollar amount to be provided from the following sources:**

<p><u>\$280,000</u></p> <p>_____</p> <p>_____</p> <p><u>\$1,724,622</u> (FMV of Lease)</p> <p>_____</p> <p>_____</p> <p>_____</p>	<p>a) Cash and Securities – statements (e.g., audited financial statements, letters from financial institutions, board resolutions) as to:</p> <ol style="list-style-type: none"> 1) the amount of cash and securities available for the project, including the identification of any security, its value and availability of such funds; and 2) interest to be earned on depreciation account funds or to be earned on any asset from the date of applicant's submission through project completion; <p>b) Pledges – for anticipated pledges, a summary of the anticipated pledges showing anticipated receipts and discounted value, estimated time table of gross receipts and related fundraising expenses, and a discussion of past fundraising experience.</p> <p>c) Gifts and Bequests – verification of the dollar amount, identification of any conditions of use, and the estimated time table of receipts;</p> <p>d) Debt – a statement of the estimated terms and conditions (including the debt time period, variable or permanent interest rates over the debt time period, and the anticipated repayment schedule) for any interim and for the permanent financing proposed to fund the project, including:</p> <ol style="list-style-type: none"> 1) For general obligation bonds, proof of passage of the required referendum or evidence that the governmental unit has the authority to issue the bonds and evidence of the dollar amount of the issue, including any discounting anticipated; 2) For revenue bonds, proof of the feasibility of securing the specified amount and interest rate; 3) For mortgages, a letter from the prospective lender attesting to the expectation of making the loan in the amount and time indicated, including the anticipated interest rate and any conditions associated with the mortgage, such as, but not limited to, adjustable interest rates, balloon payments, etc.; 4) For any lease, a copy of the lease, including all the terms and conditions, including any purchase options, any capital improvements to the property and provision of capital equipment; 5) For any option to lease, a copy of the option, including all terms and conditions. <p>e) Governmental Appropriations – a copy of the appropriation Act or ordinance accompanied by a statement of funding availability from an official of the governmental unit. If funds are to be made available from subsequent fiscal years, a copy of a resolution or other action of the governmental unit attesting to this intent;</p> <p>f) Grants – a letter from the granting agency as to the availability of funds in terms of the amount and time of receipt;</p> <p>g) All Other Funds and Sources – verification of the amount and type of any other funds that will be used for the project.</p>
<p><u>\$2,004,622</u></p>	<p>TOTAL FUNDS AVAILABLE</p>

APPEND DOCUMENTATION AS ATTACHMENT-36, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

IX. 1120.130 - Financial Viability

All the applicants and co-applicants shall be identified, specifying their roles in the project funding or guaranteeing the funding (sole responsibility or shared) and percentage of participation in that funding.

Financial Viability Waiver

The applicant is not required to submit financial viability ratios if:

1. "A" Bond rating or better
2. All of the projects capital expenditures are completely funded through internal sources
3. The applicant's current debt financing or projected debt financing is insured or anticipated to be insured by MBIA (Municipal Bond Insurance Association Inc.) or equivalent
4. The applicant provides a third party surety bond or performance bond letter of credit from an A rated guarantor.

See Section 1120.130 Financial Waiver for information to be provided

APPEND DOCUMENTATION AS ATTACHMENT-37, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

The applicant or co-applicant that is responsible for funding or guaranteeing funding of the project shall provide viability ratios for the latest three years for which **audited financial statements** are available and for the first full fiscal year at target utilization, but no more than two years following project completion. When the applicant's facility does not have facility specific financial statements and the facility is a member of a health care system that has combined or consolidated financial statements, the system's viability ratios shall be provided. If the health care system includes one or more hospitals, the system's viability ratios shall be evaluated for conformance with the applicable hospital standards.

Provide Data for Projects Classified as:	Category A or Category B (last three years)			Category B (Projected)
Enter Historical and/or Projected Years:				
Current Ratio				
Net Margin Percentage				
Percent Debt to Total Capitalization				
Projected Debt Service Coverage				
Days Cash on Hand				
Cushion Ratio				

Provide the methodology and worksheets utilized in determining the ratios detailing the calculation and applicable line item amounts from the financial statements. Complete a separate table for each co-applicant and provide worksheets for each.

2. Variance

Applicants not in compliance with any of the viability ratios shall document that another organization, public or private, shall assume the legal responsibility to meet the debt obligations should the applicant default.

APPEND DOCUMENTATION AS ATTACHMENT 38, IN NUMERICAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

X. 1120.140 - Economic Feasibility

This section is applicable to all projects subject to Part 1120.

A. Reasonableness of Financing Arrangements

The applicant shall document the reasonableness of financing arrangements by submitting a notarized statement signed by an authorized representative that attests to one of the following:

- 1) That the total estimated project costs and related costs will be funded in total with cash and equivalents, including investment securities, unrestricted funds, received pledge receipts and funded depreciation; or
- 2) That the total estimated project costs and related costs will be funded in total or in part by borrowing because:
 - A) A portion or all of the cash and equivalents must be retained in the balance sheet asset accounts in order to maintain a current ratio of at least 2.0 times for hospitals and 1.5 times for all other facilities; or
 - B) Borrowing is less costly than the liquidation of existing investments, and the existing investments being retained may be converted to cash or used to retire debt within a 60-day period.

B. Conditions of Debt Financing

This criterion is applicable only to projects that involve debt financing. The applicant shall document that the conditions of debt financing are reasonable by submitting a notarized statement signed by an authorized representative that attests to the following, as applicable:

- 1) That the selected form of debt financing for the project will be at the lowest net cost available;
- 2) That the selected form of debt financing will not be at the lowest net cost available, but is more advantageous due to such terms as prepayment privileges, no required mortgage, access to additional indebtedness, term (years), financing costs and other factors;
- 3) That the project involves (in total or in part) the leasing of equipment or facilities and that the expenses incurred with leasing a facility or equipment are less costly than constructing a new facility or purchasing new equipment.

C. Reasonableness of Project and Related Costs

Read the criterion and provide the following:

1. Identify each department or area impacted by the proposed project and provide a cost and square footage allocation for new construction and/or modernization using the following format (insert after this page).

COST AND GROSS SQUARE FEET BY DEPARTMENT OR SERVICE									
Department (list below)	A	B	C	D	E	F	G	H	Total Cost (G + H)
	Cost/Square Foot New	Mod.	Gross Sq. Ft. New	Circ.*	Gross Sq. Ft. Mod.	Circ.*	Const. \$ (A x C)	Mod. \$ (B x E)	
Contingency									
TOTALS									

* Include the percentage (%) of space for circulation

D. Projected Operating Costs

The applicant shall provide the projected direct annual operating costs (in current dollars per equivalent patient day or unit of service) for the first full fiscal year at target utilization but no more than two years following project completion. Direct cost means the fully allocated costs of salaries, benefits and supplies for the service.

E. Total Effect of the Project on Capital Costs

The applicant shall provide the total projected annual capital costs (in current dollars per equivalent patient day) for the first full fiscal year at target utilization but no more than two years following project completion.

APPEND DOCUMENTATION AS ATTACHMENT -39, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

XI. Safety Net Impact Statement

SAFETY NET IMPACT STATEMENT that describes all of the following must be submitted for ALL SUBSTANTIVE AND DISCONTINUATION PROJECTS:

1. The project's material impact, if any, on essential safety net services in the community, to the extent that it is feasible for an applicant to have such knowledge.
2. The project's impact on the ability of another provider or health care system to cross-subsidize safety net services, if reasonably known to the applicant.
3. How the discontinuation of a facility or service might impact the remaining safety net providers in a given community, if reasonably known by the applicant.

Safety Net Impact Statements shall also include all of the following:

1. For the 3 fiscal years prior to the application, a certification describing the amount of charity care provided by the applicant. The amount calculated by hospital applicants shall be in accordance with the reporting requirements for charity care reporting in the Illinois Community Benefits Act. Non-hospital applicants shall report charity care, at cost, in accordance with an appropriate methodology specified by the Board.
2. For the 3 fiscal years prior to the application, a certification of the amount of care provided to Medicaid patients. Hospital and non-hospital applicants shall provide Medicaid information in a manner consistent with the information reported each year to the Illinois Department of Public Health regarding "Inpatients and Outpatients Served by Payor Source" and "Inpatient and Outpatient Net Revenue by Payor Source" as required by the Board under Section 13 of this Act and published in the Annual Hospital Profile.
3. Any information the applicant believes is directly relevant to safety net services, including information regarding teaching, research, and any other service.

A table in the following format must be provided as part of Attachment 43.

Safety Net Information per PA 96-0031			
CHARITY CARE			
Charity (# of patients)	Year	Year	Year
Inpatient			
Outpatient			
Total			
Charity (cost in dollars)			
Inpatient			
Outpatient			
Total			
MEDICAID			
Medicaid (# of patients)	Year	Year	Year
Inpatient			
Outpatient			
Total			

Medicaid (revenue)			
Inpatient			
Outpatient			
Total			

APPEND DOCUMENTATION AS **ATTACHMENT-40**, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

XII. Charity Care Information

Charity Care information **MUST** be furnished for **ALL** projects.

1. All applicants and co-applicants shall indicate the amount of charity care for the latest three **audited** fiscal years, the cost of charity care and the ratio of that charity care cost to net patient revenue.
2. If the applicant owns or operates one or more facilities, the reporting shall be for each individual facility located in Illinois. If charity care costs are reported on a consolidated basis, the applicant shall provide documentation as to the cost of charity care; the ratio of that charity care to the net patient revenue for the consolidated financial statement; the allocation of charity care costs; and the ratio of charity care cost to net patient revenue for the facility under review.
3. If the applicant is not an existing facility, it shall submit the facility's projected patient mix by payer source, anticipated charity care expense and projected ratio of charity care to net patient revenue by the end of its second year of operation.

Charity care" means care provided by a health care facility for which the provider does not expect to receive payment from the patient or a third-party payer. (20 ILCS 3960/3) Charity Care **must** be provided at cost.

A table in the following format must be provided for all facilities as part of Attachment 44.

CHARITY CARE			
	Year	Year	Year
Net Patient Revenue			
Amount of Charity Care (charges)			
Cost of Charity Care			

APPEND DOCUMENTATION AS **ATTACHMENT-41**, IN NUMERIC SEQUENTIAL ORDER AFTER THE LAST PAGE OF THE APPLICATION FORM.

Re: Letter of Intent – Endoscopy Center Lease

Dear Dr. Berkelhammer:

This Non-Binding Letter of Intent sets forth the material terms and conditions pursuant to which [SGNL, LLC] ("Lessor") is prepared to lease the endoscopy center to be located at 678 Cedar Crossing Drive, New Lenox, Illinois 60541 ("Subject Property") to New Lenox Endoscopy, LLC ("Lessee"). This letter shall serve as a Non-Binding Letter of Intent to lease the Subject Property.

Proposed Terms and Conditions

- Space: 6,344 rentable space to be located at 678 Cedars Crossing Drive.
- Lease Term: Initial term will be ten (10) years effective upon the later of the completion of construction or lessee occupancy. Lessor will grant Lessee two (2) renewal options each for a period of five (5) years.
- Lease Rate: The lease rate will be based upon the full amortization of the capitalized costs to construct the medical office building with a reasonable rate of return. The anticipated costs to build the endoscopy center are projected to be \$1,882,463.84.
- Lease Contingency: The lease shall be contingent upon Lessee's receipt of a certificate of need permit for the establishment of a medical office building from the Illinois Health Facilities and Services Review Board.

Re: Historic Preservation Act Determination – New Lenox Endoscopy, LLC

Dear Ms. Leibowitz:

This office represents New Lenox Endoscopy, LLC (the "Requestor"). Pursuant to Section 4 of the Illinois State Agency Historic Resources Preservation Act, Requestor seeks a formal determination from the Illinois Historic Preservation Agency as to whether Requestor's proposed project to establish an ambulatory surgical treatment center to be located at 678 Cedar Crossing Drive, New Lenox, Illinois ("Proposed Project") affects historic resources.

1. Project Description and Address

The Requestor is seeking a certificate of need from the Illinois Health Facilities and Services Review Board to establish an ambulatory surgical treatment center to be located at 678 Cedar Crossing Drive, New Lenox, Illinois. This project will involve the establishment of a new ambulatory surgical treatment center. No demolition or physical alteration of the exterior of any existing buildings will occur as a result of the Proposed Project.

2. Topographical or Metropolitan Map

A metropolitan map showing the location of the Proposed Project is attached at Attachment 1.

3. Historic Architectural Resources Geographic Information System

A map from the Historic Architectural Resources Geographic Information System is attached at Attachment 2. The property is not listed on the (i) National Register, (ii) within a local historic district, or (iii) within a local landmark.

4. Photographs of Standing Buildings/Structure

Photograph of the site of the proposed facility is attached at Attachment 3.

5. Addresses for Buildings/Structures

The Proposed Project will be located at 678 Cedar Crossing Drive, New Lenox, Illinois.

Thank you for your time and consideration of our request for Historic Preservation Determination. If you have any questions or need any additional information, please feel free to contact me at 312-873-3606 or acooper@polsinelli.com

Sincerely,

A handwritten signature in cursive script that reads "Anne M. Cooper".

Section III, Background, Purpose of the Project, and Alternatives – Information Requirements
Criterion 1110.230, Purpose of the Project and Alternatives

1. The Applicants propose to establish an endoscopy center with three procedure rooms. The endoscopy center will be adjacent to the Applicants' affiliated medical group. It will achieve operational efficiencies that cannot be created at other hospitals and ambulatory surgery centers due to limited scheduling slots. Improved efficiency will result in increased access to much needed endoscopy services in this community. Notably, this community has seen significant population growth: New Lenox, Mokena, and Orland Park increased approximately 5.5% from 2010 to 2015.¹ Increased population and screening rates were the basis for a 2009 report by the Lewin Group projecting a shortage of at least 1,050 gastroenterologists in the U.S. by 2020. As the gastroenterologist shortage worsens, it is important to ensure the efficient use of existing gastroenterologists in order to also ensure adequate access to colorectal cancer (CRC) screening.

Early Detection of Colorectal Cancer

Colorectal cancer is the third leading cause of cancer-related death in the United States and the second leading cause of cancer-related deaths in Illinois. The American Cancer Society estimates 134,490 new cases of colorectal cancer and 49,190 colorectal cancer deaths in 2016.² Deaths from colorectal cancer in Illinois are on par with the national average. According to the Illinois Cancer Registry, 6,145 individuals were diagnosed with colorectal cancer and there were 2,265 colorectal cancer deaths in 2013.³ Cancer mortality can be reduced by 15 to 25% through recommended screening methods, but only 50% of adults have been properly screened because of a lack of awareness about screening. However, if detected early, it is highly treatable.

One of the core functions of an endoscopy service is to provide colonoscopies, which is the gold standard for screening for and detecting colorectal cancer. While there are other screening methods, such as fecal blood, they are a comparatively poor marker for colorectal neoplasia. Most cancers and the vast majority of polyps will be missed. For a colonoscopy, the physician uses a thin, flexible tube with a light and camera attached to examine the lining of the large intestine. New Lenox Endoscopy will provide such screening to residents of New Lenox and surrounding communities. Beyond screening accuracy, unlike other forms of colorectal cancer screening such as fecal blood test, sigmoidoscopy or barium enema, if a colonoscopy reveals a problem, initial treatment can occur simultaneously with the removal of the suspicious polyps. More than 90 percent of colon cancers start as polyps. The great advantage of a colonoscopy over other testing methods is it makes it possible to remove a suspect polyp or cancer immediately. Finding and removing polyps or other areas of abnormal cell growth is one of the most effective ways to prevent colorectal cancer development. Also, colorectal cancer is generally more treatable when it is found early, before it has had a chance to spread. In fact, effective CRC screening can drastically reduce the number of individuals that are diagnosed with advanced colorectal cancer each year. With timely screening and

³ Ill. Dep't. of Pub. Health, *Cancer in Illinois Statistics 1986- 2013* available at <http://www.idph.state.il.us/cancer/statistics.htm#S> (last visited Oct. 24, 2016).

treatment, advanced stages of the disease can be avoided. In fact, there is an 87% chance for five-year survival in Stage 1 of colorectal cancer compared to only a 12% chance of survival in Stage 4.⁴

The U.S. Preventative Services Task Force (USPSTF) recommends screening for colorectal cancer in adults, beginning at age 50 years and continuing until age 75.⁵ Colonoscopy, which offers visualization of the colon, is preferred to indirect CRC screening methods. In considering the magnitude of benefit from a CRC screening program, the USPSTF has noted with high certainty that there are substantial benefits to screening asymptomatic adults. Yet screening rates lag behind the target screening rate.

One of the reasons endoscopy services have increased is because of the payment policies of the Centers for Medicare and Medicaid Services, which now cover colorectal cancer screening as a preventative service. There are several barriers to effectively screening the population as a whole, despite expanded coverage. While from a public health perspective, there is still a long way to go to reach a more optimal screening rate, enhancing the availability of colonoscopy services and providing a non-hospital based option for such care is progress toward an important public health care goal and saves the government money in the short term and long-term (by avoiding far more expensive cancer care treatment). Only 25% of Medicare beneficiaries were screened for CRC between 1998 and 2004. A recent Centers for Disease Control report found 65 percent of Americans reported being up-to-date on CRC screening — a rate significantly lower than the Healthy People 2020 target of 70.5 percent.⁶ Individuals who do not get CRC screened at all or as often as recommended include low-income individuals, those with a lack of education and those without health insurance.

Current levels of screening in this country lag behind those of other effective cancer screening tests; it has been estimated that attainment of goals for population colorectal cancer screening could save 18,800 lives per year. Colorectal cancer incidence and mortality show health disparities, with a disproportionate burden occurring in certain minority populations, including African Americans, Native Americans and Alaska Natives. The American Cancer Society estimates 134,490 new cases of colorectal cancer and 49,190 colorectal cancer deaths in 2016.⁷ Colorectal cancer is second only to lung cancer as a cause of cancer deaths among American men and women.⁸ Studies show at least 60% of these deaths could be avoided if people 50 and older received regular screening tests.⁹ Screening helps reduce such deaths in two ways: by finding precancerous polyps that can be removed before they become cancer and by finding colorectal cancer early, when treatment is most

effective. Colonoscopy is the "gold standard" for colorectal cancer screening, and can be completed in more than 95% of examinations with negligible risk and is cost-effective.

Role of Endoscopy Centers in CRC Screening

Endoscopy centers play a vital role in ensuring patient access to preventive measures, such as colonoscopies, in a convenient and affordable setting. Today, ambulatory surgery centers perform more than 40 percent of Medicare colonoscopies.¹⁰ They have the capacity to do more. When these life-saving procedures are performed in endoscopy centers, both beneficiaries and the Medicare program save money because endoscopy centers perform the procedures at a lower cost than hospital outpatient departments (HOPDs). According to data from IDPH, the median cost of a colonoscopy performed in one of the local HOPDs ranged from a high of \$9,088 to a low of \$3,235;¹¹ the median cost of a colonoscopy at the proposed New Lenox Endoscopy, LLC is \$1,745, which is approximately half the cost of a colonoscopy at the hospital with the lowest charges. As set forth in the letter from the ASC Advocacy Committee to former Secretary Sebelius regarding implementation of a value-based purchasing system for ambulatory surgery centers, ambulatory surgery centers are efficient providers of surgical services. See Attachment – 12A. Ambulatory surgery centers provide high quality surgical care, excellent outcomes, and high level of patient satisfaction at a lower cost than HOPDs. Surgical procedures performed in ambulatory surgery centers are reimbursed at lower rates than HOPDs and result in lower out-of-pocket expenses for patients. Furthermore, patients often report an enhanced experience at ambulatory surgery centers compared to HOPDs due, in part, to easier access to parking, shorter waiting times, and ease of access into and out of the operating rooms. Finally, surgeons are more efficient due to faster turnover of operating rooms, designated surgical times without risk of delay due to more urgent procedures, and specialized nursing staff. As a result of these efficiencies, more time can be spent with patients thereby improving the quality of care. Given the benefits of ambulatory surgery centers, this facility will benefit area residents.

Improving Access to Colonoscopy to Low Income Patients

New Lenox Endoscopy, LLC firmly believes in giving back to the community and the Endoscopy Center will do the same. The Endoscopy Center will enroll in the Medicare and Medicaid programs. Typical of its affiliated medical practice, the Endoscopy Center projects at least 6% of its endoscopy patients will be Medicaid beneficiaries.

2. The Applicants expect the service area of the planned endoscopy center to be identical to the service area of Southwest Gastroenterology, its affiliated medical practice. A map of that service area is attached at Attachment – 12B. The service area consists of areas within 45 minutes normal travel time of the Endoscopy Center. Travel times to and from Endoscopy Center to the market area borders are as follows:
 - East: Approximately 36 minutes normal travel time to Indiana border.
 - Southeast: Approximately 45 minutes normal travel time to St. George, IL.
 - South: Approximately 45 minutes normal travel time to Bourbonnais, IL.
 - Southwest: Approximately 45 minutes normal travel time to Braidwood, IL.
 - West: Approximately 35 minutes normal travel time to Newark, IL.
 - Northwest: Approximately 45 minutes normal travel time to Batavia, IL.
 - North: Approximately 25 minutes normal travel time to Des Plaines, IL.

¹¹ Illinois Department of Public Health, *Illinois Hospital Report Card and Consumer Guide to Health Care* available at <http://www.healthcarereportcard.illinois.gov/> (last visited Oct. 24, 2016).

- Northeast Approximately 37 minutes normal travel time to Chicago, IL.
3. This project is needed to improve access to colorectal cancer screening and other gastroenterology procedures to patients residing in New Lenox and the surrounding area. People and communities are unlikely to follow medically sound advice unless they have a trusting relationship with the provider giving it. The physicians of Southwest Gastroenterology nurture strong relationships with their patients and believe patients are most comfortable with the continuity of care provided when the practice is able to meet patients' colonoscopy and other endoscopy requirements on site.

VIA HAND DELIVERY

Secretary Sebelius
The U.S. Department of Health and Human Services
200 Independence Avenue, S.W.
Washington, D.C. 20201

Re: Report on a Value-Based Purchasing System for Ambulatory Surgical Centers

Dear Secretary Sebelius:

Please accept the following comments regarding the report on a value-based purchasing (VBP) program for ASCs, as outlined in the Patient Protection and Affordable Care Act (PL 111-148, PPACA) §3006(f). These comments are submitted by the ASC Advocacy Committee, a joint effort of the ASC Coalition and the ASC Association, representing all types of ASCs; and the ASC Quality Collaboration, a cooperative effort of organizations and companies interested in ensuring ASC quality data is appropriately developed and reported. Together, these organizations include single- and multi-specialty ASCs; physician-owned ASCs, joint ventures between hospitals and physicians, and joint ventures between physicians and management companies; professional societies; and accrediting bodies. Participating ASCs range from the very small to the very large and are located in all 50 states.

Progress towards a Medicare VBP program for ASCs should be incremental: beginning with building a reliable, voluntary quality reporting infrastructure for ASCs, and then measuring performance within the ASC setting. Indicators of quality should include measures such as efficiency, outcomes, patient experience of care, adherence to evidence-based processes. As the culmination of VBP, CMS should develop and implement comparisons of the quality and costs for outpatient surgery in ASCs and hospital outpatient departments (HOPDs). A VBP system for outpatient surgery in these settings could create competition based on quality and efficiency, drive improvement, recognize the highest quality and most efficient providers, and improve transparency.

Some patients in hospital outpatient departments are not comparable to patients who are treated in ASCs. For example, the current HOPD measures include a hospital's emergency room patients. Designing a VBP for ASCs which enables cross-setting comparisons should focus on patients who can be treated appropriately in both ASCs and HOPDs.

Value-based purchasing includes financial and other incentives

One tool of VBP is public disclosure of data on the quality of care and costs to payers. We strongly support increasing the transparency of Medicare rates, patients' out-of-pocket costs, and quality of surgeries and procedures. Confidential feedback to ASCs from quality measurement systems should be used in the first year of VBP. Data should not be publicly reported while a reliable reporting infrastructure is being created and implemented. Building quality measurement on a solid foundation with a high level of reliability may help increase participation and the value of the data for all stakeholders. The following principles should guide public reporting of the VBP measure set:

- Consumers should be able to directly compare providers of outpatient surgical services.
- ASCs should be given the opportunity to review, validate, and appeal measurements and scores prior to publishing.
- There should be a provider narrative section for each provider-specific item to allow the provider to advise the consumer of any concerns the provider has regarding the reliability or accuracy of the information presented.
- In addition to reporting quality measures, other useful information such as facility accreditation status, state licensure and Medicare certification should be made available.

Many private payers incentivize their enrollees to use higher value services by charging lower co-pays or coinsurance for them. The Medicare program already incorporates this VBP tool: because Medicare payments for the same service are lower in ASCs than HOPDs, the copayments for services provided in ASCs are generally lower than in an HOPD. This differential can function as a value incentive for beneficiaries. For example, a patient needing cataract surgery would be responsible for \$193 if it were performed in the ASC; the patient would owe \$496 if the service were provided in the hospital outpatient department, a difference of 61%. Table 1 below illustrates the payment differentials for some common surgeries and procedures for beneficiaries in 2010. VBP could help to build an awareness of these differences and help the Medicare program leverage the choices of its beneficiaries to increase value.

Table 1. Co-payment savings for Medicare beneficiaries in ASCs for some typical procedures

Comparison of 2010 ASC and HOPD beneficiary copayments				
HCPCS	Description	ASC Copay	HOPD Copay	Difference
66984	Cataract surg w/IOL, 1 stage	\$192.49	\$495.96	61%
43239	Upper GI endoscopy, biopsy	\$73.89	\$143.38	48%
45378	Diagnostic colonoscopy	\$76.05	\$186.06	59%
45380	Colonoscopy and biopsy	\$76.05	\$186.06	59%
45385	Lesion removal colonoscopy	\$76.05	\$186.06	59%
66821	After cataract laser surgery	\$46.81	\$104.31	55%
64483	Inj foramen epidural l/s	\$59.20	\$97.09	39%
66982	Cataract surgery, complex	\$192.49	\$495.96	61%
45384	Lesion remove colonoscopy	\$76.05	\$186.06	59%

29881	Knee arthroscopy	\$209.92	\$403.36	48%
63650	Implant neuroelectrodes	\$699.19	\$885.85	21%
29827	Arthroscop rotator cuff repr	\$327.64	\$804.74	59%

The chief tool of VBP is payment differentials for providers: paying more to high-performing providers and to those who have made significant improvements to the quality of care. Provider payment differentials are key pieces of CMS's Premier Hospital Quality Incentive Demonstration, Home Health Pay for Performance Demonstration, and Nursing Home Value Based Purchasing Demonstration. The ASC industry supports payment differentials in VBP for outpatient surgery.

Another VBP tool is shared savings which allows providers to recoup some of the efficiencies they create through lowering cost and improving quality. This VBP tool is used in the private sector and most recently by CMS in its design of the Home Health Pay for Performance Demonstration and the Medicare Physician Group Practice Demonstration. CMS has allowed high quality agencies and group practices to share the savings generated by decreasing hospital admissions and readmissions, and decreasing skilled nursing facility use and the use of other healthcare resources. We support the shared savings model for later phases of VBP for ASCs.

Medicare's VBP for ASCs should encourage widespread participation through incremental implementation. VBP should begin with voluntary data collection, followed by public disclosure of quality information. Improved transparency regarding Medicare's rates and patient co-payments at ASCs and HOPDs should be supplemented with comparable quality data as it becomes available. CMS should provide patients and physicians with a tool to enable apples-to-apples comparisons of outpatient surgery settings. Payment differentials for providers should be built upon a solid foundation of quality measurement. Shared savings should be the final stage of an incremental VBP implementation.

Rewarding ambulatory surgery centers

A VBP for ASCs should acknowledge the role that the facility plays in providing high quality surgical care to patients. ASCs range in size and scope from small, single-specialty facilities focused on endoscopic procedures to large facilities offering a range of surgical sub-specialties in multiple operating rooms. The ASC VBP program will have the greatest impact when it is implemented incrementally and is designed to reach the full spectrum of ASCs in the industry. The Secretary should consider exemptions for ASCs with very low Medicare volume.

ASCs that attain high quality or make substantial improvements should be rewarded. It is important to acknowledge centers that have already applied evidence-based guidelines in their care, implemented structures of care that enhance quality, ensured patient safety, achieved good outcomes, and provided a valuable patient experience. It is also important to acknowledge that some centers may be continuing to progress toward the highest level of quality. VBP should reward ASCs that achieve a high rank or exceed a national threshold as well as ASCs that close the gap between their past performance and the national threshold.

ASC quality measurement

The VBP system for ASCs should be based on quality measurements which capture many aspects of ASC patient services. These measures include processes, efficiency, outcomes, and patient experience.

Process measures can indicate that the ASC follows guidelines and uses evidence-based practices. The ASC Quality Collaboration has already developed two process measures for ASCs which have been endorsed for outpatient surgery by the National Quality Forum. These capture whether antibiotics given for prevention of surgical site infection were administered on time and the number of patients who have appropriate surgical site hair removal. We support the development of additional process measures which are similarly applicable across a wide range of surgical facilities, such as medication reconciliation.

ASCs are efficient providers. Assessing the value of ASCs should include measures of the ways in which ASCs maximize health care resources and provide high quality surgical care and procedures in lean, well-managed facilities.

ASCs achieve excellent outcomes for patients and high levels of patient satisfaction. The ASC Quality Collaboration has already developed four measures of patient outcomes which have been endorsed by the National Quality Forum. These include patient safety indicators—patient burn; patient fall; and wrong site, side, patient, procedure or implant—and hospital transfers. Figure 1 below is an example of the voluntary outcome measure reporting in which many ASCs currently participate. A variety of patient satisfaction surveys are used throughout the industry to capture some aspects of patient experience.

Figure 1. Example of data available through ASC Quality Collaboration voluntary reporting

Data Summary: Hospital Transfer/Admission

Reporting Period	2Q2009	3Q2009	4Q2009	1Q2010
Number of Participating ASCs	1,294	1,177	1,266	1,185
Number of ASC Admissions Represented	1,528,402	1,396,179	1,490,427	1,334,614
Hospital Transfer/Admission Rate per 1000 ASC Admissions	0.997	1.027	1.010	1.081

Both outcome measures and patient experience measurement for ASCs deserve a greater investment by CMS, the Agency for Healthcare Research and Quality, and other entities. A tool such as the Consumer Assessment of Healthcare Providers and Systems (CAHPS) would be a useful way to measure patient experience and satisfaction and would give patients relevant and easy-to-understand information.

Additionally, new research is needed to support the development of measures that enable fair, valid, and reliable comparison for similar patients in ASCs and HOPDs. In some cases, HOPD patients are not comparable to patients treated in ASCs. Designing a VBP for ASCs which enables cross-setting comparisons is an opportunity to improve transparency. Developing sound, useful comparisons across settings will require an investment in understanding the patient populations which can be compared and identifying and measuring factors that influence

outpatient surgical risks for patients. Improvements are also needed in post-surgical surveillance and case finding to support reliable outcome and patient safety measures.

The ASC Quality Collaboration should be included as a critical stakeholder in quality measurement for outpatient surgery. A role for the ASC Quality Collaboration similar to the role of the Hospital Quality Alliance would improve the VBP development process for all stakeholders. The following principles should guide measure development for VBP:

- Measure collection should minimize burden on ASCs and CMS. ASCs should be given more than one way to report quality data. For example, claims-based reporting should be an option, especially in the initial phases of VBP implementation. ASCs should be able to authorize an agent (e.g. a parent company or a registry) to report on their behalf.
- Where possible, measures should enable comparisons between ASCs and HOPDs. Patients who require care that could be provided in either ASCs or HOPDs should be enabled to identify and choose the setting with the best value through VBP.
- New measures must be credible: they must be based on evidence, broadly understood, and collected reliably across the variety of ASCs that serve Medicare beneficiaries.

We welcome opportunities to explore partnerships with agencies that can assist the industry in growing and enhancing the quality measurement tools for outpatient surgery in ASCs and HOPDs. New quality measurement infrastructure will be a key to evolving the most effective VBP and achieving the best value for Medicare and other payers.

Design a funding mechanism which strengthens VBP

Linking a portion of Medicare's payments to quality will be a significant change in Medicare ASC payment policy. To ensure that all Medicare beneficiaries continue to have access to care, VBP incentives should begin as a small portion of total Medicare spending for ASC services.

Funding should progress in increments, consistent with the phases in other aspects of the program. Full updates should be given to all of the ASCs that make the investment of time and resources to participate in the initial phase of pay for reporting and report valid and reliable data to CMS. The Secretary should consider a bonus for the use of health information technology to gather and report quality data, similar to the bonus for physicians' EHR use in Medicare.

The structure of incentive payments linked to performance should recognize that Medicare's payments to ASCs have been under a payment freeze for many years, and in addition, some payments have been dropping due to transition from the previous grouper payment system. The VBP system may lose acceptance if it is applied as a cost-cutting measure.

In the final phase of VBP, the VBP bonuses should be funded through a shared-savings mechanism. ASCs have already saved the Medicare program billions of dollars by providing a lower-priced setting for outpatient surgeries which can be appropriately performed in an ASC rather than an HOPD. VBP can help to demonstrate the quality and value of ASC services and encourage the continued, appropriate migration of services to the lower-priced setting. We

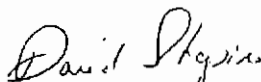

propose that later phases of the VBP for ASCs allow high-quality ASCs to share some of the savings they have produced for the Medicare program. A pool of ASC VBP bonus dollars could be generated from Medicare program's savings on the total amount spent for outpatient surgical services for Medicare beneficiaries that can be supplied in both HOPDs and ASCs. The shared-savings structure aligns the incentives of ASCs and the Medicare program to increase value.

- Building incentives across silos of care was a goal set by the Medicare Payment Advisory Commission in their recommendations for developing VBP.
- Decreasing the growth of Medicare spending on outpatient surgeries by encouraging continued migration to lower-priced settings could generate substantial savings for the Medicare program.
- A shared pool could create competition based on value between settings

* * *

In summary, the report on value based purchasing required by PL 111-148, §3006(f), should map out a VBP system for ASCs which increases transparency and enables patients and physicians to choose the best surgical setting. We look forward to conversations with CMS as they consider the development of VBP. Thank you for providing this opportunity to comment. We appreciate the dialogue and look forward to continued participation in the development process.

Sincerely,

David Shapiro, M.D.
Chairman
ASC Association

Andrew Hayek

Section III, Background, Purpose of the Project, and Alternatives – Information Requirements
Criterion 1110.230, Background, Purpose of the Project and Alternatives

Alternatives

The Applicant explored two options prior to determining to establish the Endoscopy Center. The options considered are as follows:

- Utilize Existing ASTCs and Hospital Outpatient Facilities; and
- Establish an endoscopy center.

After exploring these options, which are discussed in more detail below, the Applicant decided to establish the proposed Endoscopy Center. A review of each of the options considered and the reasons they were rejected follows.

Utilize Existing ASTCs and Hospitals

The Applicant considered utilizing existing ASTCs and Hospitals. This is not a viable option for several reasons. These facilities cannot accommodate the volume of colonoscopies that Southwest Gastroenterology can perform. As such, the physicians would be forced to travel to several facilities using small scheduling blocks, which pose an inconvenience for both the physicians and their patients. By establishing an endoscopy center in the same building as Southwest Gastroenterology, the Applicants' medical practice, the Endoscopy Center will achieve operational efficiencies that cannot be created at other hospitals and ambulatory surgery centers due to limited scheduling slots. While Southwest Gastroenterology physicians intend to continue providing the same level of care at the existing hospitals where they currently perform procedures, providing endoscopy services at a location adjacent to their medical office will allow patients can be treated with reduced wait times. The physicians can also consult with patients at the practice in between surgical procedures, which allows for more efficient use of their time. As the gastroenterologist shortage worsens, it is important to ensure the efficient use of existing gastroenterologists in order to also ensure adequate access to CRC screening.

Establish an ASTC

To better serve the needs of the residents of New Lenox and the surrounding area, the Applicant decided to establish a single-specialty ASTC. The estimated cost of this alternative is \$2,004,622.

Section IV, Project Scope, Utilization, and Unfinished/Shell Space
Criterion 1110.234, Project Scope, Utilization, and Unfinished/Shell Space

Size of the Project

The Project proposes to establish an ASTC with three procedure rooms and nine recovery stations. Pursuant to Section 1110, Appendix B of the HFSRB's rules, the State standard is 1,660 to 2,200 gross square feet per procedure room for a total of 4,980 to 6,600 gross square feet for three procedure rooms and nine recovery stations. The gross square footage of clinical space will be 4,697 gross square feet. Accordingly, the size of the Endoscopy Center is below the State standard.

Table 1110.234(a)				
SIZE OF PROJECT				
DEPARTMENT/SERVICE	PROPOSED BGSF/DGSF	STATE STANDARD	DIFFERENCE	MET STANDARD?
ASTC	4,697	4,980 – 6,600	-283	Below

Section IV, Project Scope, Utilization, and Unfinished/Shell Space
Criterion 1110.234, Project Scope, Utilization, and Unfinished/Shell Space

Project Services Utilization

By the second year after project completion, the Endoscopy Center's annual utilization shall meet or exceed HFSRB's utilization standards. Pursuant to Section 1110, Appendix B of the HFSRB's rules, utilization for ASTCs is based upon 1,500 hours per operating/procedure room. Based upon historical utilization and projected procedures documented in the physician referral letter attached at Appendix - 1, approximately 3,500 procedures will be performed at the Endoscopy Center within the two years after project completion. Based upon current experience, the estimated procedure time, including prep and cleanup, is approximately 52 minutes. As a result, 3,033 surgical hours are projected for the first year after project completion, which is sufficient to support the need for three procedure rooms.

Table 1110.234(b)					
UTILIZATION					
	DEPT./ SERVICE	HISTORICAL UTILIZATION (SURGICAL HOURS)	PROJECTED UTILIZATION	STATE STANDARD	MET STANDARD?
YEAR 1	ASTC	15,614 hours	3,033 hours	3,000+ hours	No

Section IV, Project Scope, Utilization, and Unfinished/Shell Space
Criterion 1110.234(c), Unfinished or Shell Space

This project will not include unfinished space designed to meet an anticipated future demand for service. Accordingly, this criterion is not applicable.

Section IV, Project Scope, Utilization, and Unfinished/Shell Space
Criterion 1110.234(d), Assurances

This project will not include unfinished space designed to meet an anticipated future demand for service. Accordingly, this criterion is not applicable.

Section VII, Service Specific Review Criteria
Non-Hospital Based Ambulatory Surgery
Criterion 1110.1540(b), Background of the Applicant

1. The Applicants do not currently own or operate any health care facilities. Accordingly, this criterion is not applicable.
2. No LLC manager, members or owners of at least 5% of the proposed Endoscopy Center own or operate any health care facilities in Illinois. Accordingly, this criterion is not applicable.
3. The Applicants have not previously owned or operated any health care facilities. Accordingly, this criterion is not applicable.
4. Attached at Attachment – 27A is a certification that no LLC manager, members or owner of at least 5% of the proposed Endoscopy Center:
 - a. has been cited, arrested, taken into custody, charged with, indicted, convicted or tried for, or pled guilty to:
 - i. the commission of any felony or misdemeanor or violation of law, except for minor parking violations; or
 - ii. has been the subject of any juvenile delinquency or youthful offender proceeding;
 - b. has been charged with fraudulent conduct or any act involving moral turpitude;
 - c. has any unsatisfied judgments against him or her; or
 - d. is in default in the performance or discharge of any duty or obligation imposed by a judgment decree, order or directive of any court or governmental agency.
5. An authorization permitting the State Board and Illinois Department of Public Health (IDPH) access to any documents necessary to verify information submitted, including, but not limited to: official records of IDPH or other State agencies and the records of nationally recognized accreditation organizations is attached at Attachment – 27A.
6. The Applicant has not previously submitted an application for permit during this calendar year. Accordingly, this criterion is not applicable.

Kathryn J. Olson
Chair
Illinois Health Facilities and Services Review Board
525 West Jefferson Street, 2nd Floor
Springfield, Illinois 62761

Dear Chair Olson:

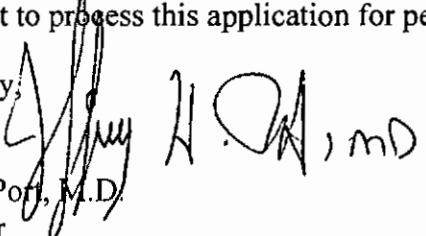

I hereby certify under penalty of perjury as provided in § 1-109 of the Illinois Code of Civil Procedure, 735 ILCS 5/1-109 that no adverse action has been taken against any facility owned or operated by New Lenox Endoscopy, LLC during the three years prior to filing this application.

Neither New Lenox Endoscopy, LLC nor any LLC member or owner of at least 5% of New Lenox Endoscopy, LLC:

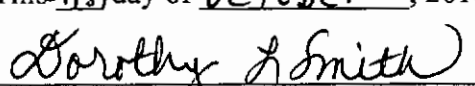

- has been cited, arrested, taken into custody, charged with, indicted, convicted or tried for, or pled guilty to the commission of (1) any felony or misdemeanor or violation of the law, except for minor parking violations or (2) the subject of any juvenile delinquency or youthful offender proceeding; or
- has been charged with fraudulent conduct or any act involving moral turpitude; or
- has any unsatisfied judgments against him or her; or
- is in default in the performance or discharge of any duty or obligation imposed by a judgment, decree, order, or directive of any court or governmental agency.

Additionally, pursuant to 77 Ill. Admin. Code § 1110.1540(b)(3)(J), I hereby authorize the Health Facilities and Services Review Board ("HFSRB") and the Illinois Department of Public Health ("IDPH") access to any documents necessary to verify information submitted as part of this application for permit. I further authorize HFSRB and IDPH to obtain any additional information or documents from other government agencies which HFSRB or IDPH deem pertinent to process this application for permit.

Sincerely,

Jeffrey Port, M.D.
Manager

Section VII, Service Specific Review Criteria
Non-Hospital Based Ambulatory Surgery
Criterion 1110.1540(c), Service to Geographic Area Residents

1. Attached as Attachment – 27B is a map outlining New Lenox Endoscopy Center's intended geographic service area (GSA). The GSA consists of those Illinois areas within 45 minutes normal travel time of New Lenox Endoscopy, LLC, or approximately 35 miles.
2. As set forth in Criterion 1110.230, New Lenox Endoscopy Center will serve residents of New Lenox and surrounding communities within 45 minutes normal travel time of the proposed Endoscopy Center. Accordingly, the intended GSA consists of those areas within 45 minutes normal travel time of the proposed Endoscopy Center.

Section VII, Service Specific Review Criteria
Non-Hospital Based Ambulatory Surgery
Criterion 1110.1540(d), Service Demand

A physician referral letter providing the name and number of patients referred to health care facilities within the past 12 months and the projected number of referrals to the Endoscopy Center is attached at Appendix - 1.

Section VII, Service Specific Review Criteria
Non-Hospital Based Ambulatory Surgery
Criterion 1110.1540(f), Treatment Room Need Assessment

1. As stated throughout this application, the Applicants propose to establish an endoscopy center providing gastroenterology services with three procedure rooms. The State Board standard is 1,500 per procedure room, or 3,001 hours for three procedure rooms. As documented in Appendix – 1, Southwest Gastroenterology projects to perform 3,500 surgical procedures in the first year after project completion. The Applicant estimates the average length of time per procedure will be 52 minutes, or 3,033 surgical hours. Accordingly, the proposed number of procedure rooms is necessary to serve the projected patient volume.
2. As documented in Appendix – 1, Southwest Gastroenterology projects to perform 3,500 surgical procedures in the first year after project completion. Based upon historical caseload data, the Applicants estimates the average length of time per procedure will be 52 minutes. This estimate includes 17 minutes for prep and clean up.

Section VII, Service Specific Review Criteria
Non-Hospital Based Ambulatory Surgery
Criterion 1110.1540(g), Service Accessibility

As previously discussed in Criterion 1110.230, the Applicants propose to establish an endoscopy center with three procedure rooms. The endoscopy center will be adjacent to the Applicants' affiliated medical practice. It will achieve operational efficiencies that cannot be created at other hospitals and ambulatory surgery centers due to limited scheduling slots. Improved efficiency will result in increased access to much needed endoscopy services in this community. Notably, this community has seen significant population growth: New Lenox, Mokena, and Orland Park increased approximately 5.5% from 2010 to 2015.¹² Increased population and screening rates were the basis for a 2009 report by the Lewin Group projecting a shortage of at least 1,050 gastroenterologists in the U.S. by 2020. As the gastroenterologist shortage worsens, it is important to ensure the efficient use of existing gastroenterologists in order to also ensure adequate access to CRC screening.

One of the reasons endoscopy services have increased is because of the payment policies of the Centers for Medicare and Medicaid Services, which now cover colorectal cancer screening as a preventative service. There are several barriers to effectively screening the population as a whole, despite expanded coverage. While from a public health perspective, there is still a long way to go to reach a more optimal screening rate, enhancing the availability of colonoscopy services and providing a non-hospital based option for such care is progress toward an important public health care goal and saves the government money in the short term and long-term (by avoiding far more expensive cancer care treatment). Only 25% of Medicare beneficiaries were screened for CRC between 1998 and 2004. A recent Centers for Disease Control report found 65 percent of Americans reported being up-to-date on CRC screening — a rate significantly lower than the Healthy People 2020 target of 70.5 percent.¹³ Individuals who do not get CRC screened at all or as often as recommended include low-income individuals, those with a lack of education and those without health insurance.

Further, HOPDs are more costly, less efficient and less convenient than ambulatory surgery centers. The Endoscopy Center will allow physicians to schedule their surgeries to maximize efficiency. Ambulatory surgery centers provide high quality surgical care, excellent outcomes, and high level of patient satisfaction at a lower cost than HOPDs. Surgical procedures performed in an ambulatory surgery centers are reimbursed at lower rates than HOPDs and result in lower out-of-pocket expenses for patients. Additionally, patients often report an enhanced experience at ambulatory surgery centers compared to HOPDs due, in part, to easier access to parking, shorter waiting times, and ease of access into and out of the operating rooms. Finally, surgeons are more efficient due to faster turnover of operating rooms, designated surgical times without risk of delay due to more urgent procedures, and specialized nursing staff. As a result of these efficiencies, more time can be spent with patients thereby improving the quality of care.

Section VII, Service Specific Review Criteria
Non-Hospital Based Ambulatory Surgery
Criterion 1110.1540(h), Unnecessary Duplication/Maldistribution

1. Unnecessary Duplication of Services

- a. New Lenox Endoscopy Center will be located at 678 Cedar Crossing Drive, New Lenox, IL 60451. A map of the proposed facility's market area is attached at Attachment – 27B. A list of all zip codes located, in total or in part, within 45 minutes normal travel time of the site of the proposed facility as well as 2010 census figures for each zip code is provided in Table 1110.1540(h)(1).

- b. A list of all existing and approved health care facilities located within the New Lenox Endoscopy, LLC GSA that provide the surgical services proposed by the project is attached at Attachment – 27C.

2. Maldistribution of Services

- a. Ratio of Stations to Population

As shown in Table 1110.1540(h)(2)(A), the ratio of operating and procedure rooms to population is 42% of the State Average.

Table 1110.1540(h)(2)(A) Ratio of Stations to Population			
	Population	Operating & Procedures Rooms	Operating & Procedure Rooms to Population
Geographic Service Area	4,854,307	477	1:10,176
State	12,830,632	2,994	1:4,285

- b. Sufficient Population to Achieve Target Utilization

The Applicants propose to establish an endoscopy center with three procedure rooms. To achieve the State Board standard of 1,500 hours per operating room within the first two years after project completion, the Applicants would need approximately 3,500 patient referrals. As set forth above in Table 1110.1540(d), Southwest Gastroenterology historically performs 18,156 procedures annually. Once the Endoscopy Center is operational, Southwest Gastroenterology anticipates performing an adequate volume of procedures at the facility to reach target utilization after the second year of project completion.

3. Impact to Other Providers

- a. The Endoscopy Center will not have an adverse impact on existing facilities in the GSA.
- b. The proposed facility will not lower the utilization of other area providers that are operating below the occupancy standards.

Section VIII, Service Specific Review Criteria
Non-Hospital Based Ambulatory Surgery
Criterion 1110.1540(i), Staffing

New Lenox Endoscopy, LLC will be staffed in accordance with all State and Medicare staffing requirements. New Lenox Endoscopy Center will be staffed as follows:

- Receptionist (2 FTEs)
- Registered Nurse (4 FTEs)
- Endoscopy Nurse (2 FTE)
- GI Technician (1 FTEs)
- Medical Assistant (2FTE)
- Sterilization Technician (1 FTE)
- Endoscopy Manager (1 FTE)

Section VII, Service Specific Review Criteria
Non-Hospital Based Ambulatory Surgery
Criterion 1110.1540(g), Charge Commitment

- a. A list of the procedures to be performed at New Lenox Endoscopy Center with the proposed charges is provided in Table 1110.1540(g) below.

Re: Non-Hospital Based Ambulatory Surgical Treatment Center Assurances

Dear Chair Olson:

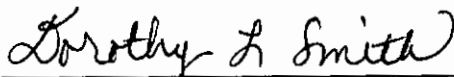

Pursuant to 77 Ill. Admin. Code § 1110.1540(k), I hereby certify the following:

- A peer review program will be implemented at New Lenox Endoscopy that evaluates whether patient outcomes are consistent with quality standards established by professional organizations for the surgical services, and if outcomes do not meet or exceed those standards, a quality improvement plan will be initiated; and
- By the second year of operation after the project completion date, the annual utilization of the surgical/treatment rooms at New Lenox Endoscopy will meet or exceed the utilization standard specified in 77 Ill. Adm. Code 1100.

Sincerely,

Jeffrey Port, M.D.
Manager
New Lenox Endoscopy, LLC

Section VIII

Criterion 1120.120, Availability of Funds

The project will be funded entirely with cash and cash equivalents and a lease with SGNL, LLC. A letter from Standard Bank and Trust Co. evidencing sufficient cash on hand to fund the project is attached at Attachment – 36A. A copy of the letter of intent to lease the endoscopy center is attached at Attachment – 36B.

NON-BINDING REAL ESTATE LEASE LETTER OF INTENT

October 14, 2016

Debbie Leung, PA-C
Fahmida Khatoon, PA-C
Taylor Aldridge, PA-C

Dr. Charles Berkelhammer
Manager
New Lenox Endoscopy, LLC
678 Cedar Crossing Drive
New Lenox, Illinois 60541

Re: Letter of Intent – Endoscopy Center Lease

Dear Dr. Berkelhammer:

This Non-Binding Letter of Intent sets forth the material terms and conditions pursuant to which [SGNL, LLC] ("Lessor") is prepared to lease the endoscopy center to be located at 678 Cedar Crossing Drive, New Lenox, Illinois 60541 ("Subject Property") to New Lenox Endoscopy, LLC ("Lessee"). This letter shall serve as a Non-Binding Letter of Intent to lease the Subject Property.

Proposed Terms and Conditions

Space: 6,344 rentable space to be located at 678 Cedars Crossing Drive.

Lease Term: Initial term will be ten (10) years effective upon the later of the completion of construction or lessee occupancy. Lessor will grant Lessee two (2) renewal options each for a period of five (5) years.

Lease Rate: The lease rate will be based upon the full amortization of the capitalized costs to construct the medical office building with a reasonable rate of return. The anticipated costs to build the endoscopy center are projected to be \$1,882,463.84.

Lease Contingency: The lease shall be contingent upon Lessee's receipt of a certificate of need permit for the establishment of a medical office building from the Illinois Health Facilities and Services Review Board.

Attachment – 39A

Section X, Economic Feasibility

Criterion 1120.140(a), Reasonableness of Financing Arrangements

This project will be funded in total with cash and cash equivalents. Accordingly, this criterion is not applicable.

Section X Economic Feasibility

Criterion 1120.140(c), Reasonableness of Project and Related Costs

1. The Cost and Gross Square Feet by Department or Service table below sets forth the modernization cost and square footage allocated to each department of the proposed Endoscopy Center.

COST AND GROSS SQUARE FEET BY DEPARTMENT OR SERVICE								
Department (list below)	A	B	C	D	E	F	G	H
	Cost/Square Foot New	Mod.	Gross Sq. Ft. New Circ.*		Gross Sq. Ft. Mod.	Circ.*	Const. \$ (A x C)	Mod. \$ (B x E)
Clinical								
ASTC		\$240.15			4,697			\$1,127,986
Contingency – Clinical		\$24.01			4,697			\$112,798
Total Clinical		\$264.16			4,697			\$1,240,784
Non-Clinical								
Administration, Waiting Room, Reception, Medical Records		\$232.50			1,614			\$375,260
Contingency – Non-Clinical		\$23.25			1,614			\$37,526
Total Non- Clinical		\$255.75			1,614			\$412,786
TOTALS		\$262.01			6,311			\$1,653,570
* Include the percentage (%) of space for circulation								

2. As shown in Table 1120.310(c) below, the project costs are below the State Standard.

Table 1120.310(c)			
	Proposed ASTC	State Standard	Above/Below State Standard
Modernization Contracts + Contingencies	\$1,240,784	\$264.87 per GSF \$264.87 x 4,697 = \$1,244,094	Below State Standard
Contingencies	\$112,798	10% - 15% x Construction Costs 10% - 15% x \$1,127,986 = \$112,799 - \$169,198	Below State Standard

Attachment – 39C

53566288.1
53566288.1

Table 1120.310(c)			
	Proposed ASTC	State Standard	Above/Below State Standard
Architectural & Engineering Fees	\$53,289	7.76% - 11.66% x Modernization Contracts + Contingencies = \$1,240,784 x 7.76% - 11.66% = \$96,285 - \$144,675	Below State Standard
Consulting & Other Fees	\$22,500	No State Standard	N/A
Equipment	\$194,800	\$461,631.36 per procedure room = \$461,631.36 x 3 = \$1,384,894	Below State Standard
Fair Market Value of Leased Space or Equipment	\$1,294,073	No State Standard	N/A

Section X, Economic Feasibility Review Criteria
Criterion 1120.310(d), Projected Operating Costs

Operating Expenses: \$1,147,500

Procedures: 3,500

Operating Expense per Procedure: \$327.86

Section X, Economic Feasibility Review Criteria
Criterion 1120.310(e), Total Effect of Project on Capital Costs

Capital Costs: \$170,543

Procedures: 3,500

Capital Costs per Procedure: \$48.73

Section XI, Safety Net Impact Statement

1. The Endoscopy Center will improve access to safety net services to the residents of New Lenox and surrounding areas. The Endoscopy Center will enroll in the Medicare and Medicaid programs. Typical of its affiliated medical practice, the Endoscopy Center projects at least 6% of its endoscopy patients will be Medicaid beneficiaries.
2. The establishment of the Endoscopy Center will not impact the ability of other providers or other health care facilities to cross-subsidize safety net services. By establishing an endoscopy center in the same building as Southwest Gastroenterology, the Applicant's medical practice, the Endoscopy Center will achieve operational efficiencies that cannot be created at other hospitals and ambulatory surgery centers due to limited scheduling slots. While the Southwest Gastroenterology physicians intend to continue providing the same level of care at the existing hospitals where they perform procedures, they recognize that they can alleviate some of the burdens of the hospital by offering care to uninsured and indigent patients. The plan moving forward to enroll in Medicaid is consistent with the number of Medicaid patients the existing practice already serves.
3. The Applicant is proposing to establish an endoscopy center. Thus, this criterion does not apply.

Section XII, Charity Care Information

The Applicant is not an existing facility, thus it cannot report charity care data and has no historical payor mix experience.

Appendix 1
Physician Referral Letters

Attached as Appendix 1 is the physician referral letter from Southwest Gastroenterology projecting 3,500 procedures will be performed at the proposed Endoscopy Center by the second year after project completion.

Illinois Health Facilities and Services Review Board
525 W. Jefferson Street, 2nd Floor
Springfield, IL 62761

Debbie Leung, PA-C
Fahmida Khatoon, PA-C
Taylor Aldridge, PA-C

Dear Ms. Olson,

I am writing on behalf my practice, Southwest Gastroenterology, S.C., in support of the proposed New Lenox Endoscopy Center. Over the past 12 months, our seven gastroenterologists have performed 18,156 procedures at 7 facilities. The attached table lists the zip codes of residence for these patients and the facilities where procedures were performed.

With the opening of the proposed New Lenox Endoscopy Center, we anticipate referring 3,500 patients to the New Lenox Endoscopy Center in each of the two years following project completion. Projected patient volume shall come from the proposed geographic service area of New Lenox Endoscopy Center.

These patient referrals have not been used to support another pending or approved certificate of need application.

The information in this letter is true and correct to the best of my knowledge.

Sincerely,

Charles Berkelhammer, M.D.
Gastroenterologist/Owner
