Franciscan St. James Health – Chicago Heights (Project Number COE E-08-16)
Franciscan St. James Health – Chicago Heights (Project Number CON 16-005)

Ms. Avery and Members of the Illinois Health Facilities and Services Review Board:

I am writing to you regarding my opposition to the plans for the closure of the emergency room and elimination of critical care services at Franciscan St. James Health in Chicago Heights.

I have a responsibility to the 30,000 residents in Chicago Heights regarding the continuation of accessible health care in the city. This issue is about the compelling need that exists for critical health care services that must be available to our residents and neighboring municipalities to the south and east.

In 2014, there were over 40,000 emergency room visits to the Chicago Heights emergency room; more than 3,600 ambulance transports from Chicago Heights alone, and nearly 7,000 in-patient admissions. This restructuring plan will close the emergency room, eliminate in-patient admissions, and in turn, demolish two-thirds of the campus. Chicago Heights can expect some expanded diagnostics and urgent care service.

Franciscan St. James maintains that this plan is in response to the future of how health care will be delivered; it is not the reality of how southland residents access health care. Over 38% of our patient transports to St. James Chicago Heights are underinsured or uninsured – how does this underserved population access health care at a campus over 4 ½ miles away – with little or no access to transportation? Combine the 40,000 ER transports at the Chicago Heights campus and the 35,000 transports to the Olympia Fields campus during this past year. That adds up to **75,000** ER transports. Franciscan St. James maintains that a large percentage of those patients should seek urgent care not emergency services. At what point is their care redirected? After an emergency room visit is the answer. Franciscan St. James maintains we need to reeducate residents on accessing healthcare services, using urgent care facilities and becoming proactive with our healthcare. In reality, southland residents become the guinea pigs for Franciscan St. James' view of how our current and future healthcare needs will be met.

March 3, 2016

Page 2

St. James is publicizing this plan as a \$137 million dollar investment. Yet, prior to this plan being launched in October 2015, not a single dollar was invested on an impact study on the elimination of emergency room services in Chicago Heights; not a single conversation was held with municipal EMS professionals; not a single meeting with the mayors in Chicago Heights, Sauk Village, South Chicago Heights, Crete, Glenwood - municipalities that will suffer the economic impact of increased demands for EMS transports, increased labor and apparatus costs, and most importantly, the potential cost to human life.

The decision to close the emergency room and eliminate health care at the Chicago Heights campus is, at the very least, a poorly conceived plan. We are not a region or a population of people who should be marginalized on access to quality health care. We are not the learning curve for the future of health care, and we do not have two to three years to wait and see if St. James can deliver on their promises of healthcare services for southland residents.

As a **nonprofit hospital network** with a reported \$450M in surplus revenue in 2015 and over \$1.6 billion in reserves; and, as one of the **top three financially sound hospital networks in the nation**, the decision regarding the Chicago Heights hospital is an economic decision in support of their bottom line. This is not a healthcare plan for the future; this is a business plan for a **nonprofit hospital network**.

Franciscan St. James was founded with a mission to provide health care where there was a need. The need for emergency healthcare exists in Chicago Heights: for the uninsured or underinsured who receive their health care in Chicago Heights; for thousands of residents who are treated for critical care in the emergency room in Chicago Heights. This plan simply does not meet the needs of the people.

I have a responsibility to be the voice for the 30,000 residents I serve. We, as public officials, have a mandate to ensure we are serving the health care needs of all the people where the need exists.

Sincerely,

A handwritten signature in black ink, appearing to read "David A. Gonzalez", written in a cursive style.

Franciscan St. James Health - Chicago Heights (Project Number COE E-08-16)
Franciscan St. James Health - Chicago Heights (Project Number CON 16-005)

Members of the Illinois Health Facilities and Services Review Board:

I am writing to you regarding the plan to close the emergency room and eliminate critical care services at the St. James Chicago Heights hospital campus.

I am vehemently opposed to this plan for closure.

The Chicago Heights Police Department has a force of 80 sworn officers. We are one of the largest police departments in the south suburbs. The Chicago Heights Police Department averages 200 police calls to the St. James Chicago Heights campus per year. Officer(s) are dispatched in response, and I can expect that those officers are out of service in the quadrant they are assigned until the situation is resolved.

The closure of the emergency room in Chicago Heights will not eliminate the necessity to provide assistance for incidents. What it does mean is that this department will be asked to provide mutual aid at the Olympia Fields campus. The corresponding increase to the time my officers are out of service in their assigned quadrants in Chicago Heights, out of the area in Olympia Fields, places an undue burden on the police department and raises very serious concerns about response time – and I know this is a grave concern for the Olympia Fields Police Department as well. In addition to the concern for the health and welfare of our residents, the closure will add a corresponding increase to our labor costs, and adversely affect our vehicle fleet with the additional wear and tear on our squad cars.

Neither I, nor any other police chief in the south suburbs this impacts, were consulted regarding this plan to close the emergency room. The potential impact of closing the emergency room should have been discussed and evaluated before the St. James submitted the application for the elimination of services and Certificate of Need, not after the fact.

Finally, I oppose this closure and ask that an alternate proposal must be considered to provide for the continuation of emergency and critical services in Chicago Heights.

Respectfully,

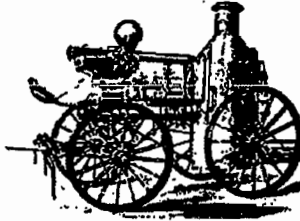

A handwritten signature in black ink, appearing to be "TRB", written over a horizontal line.

Franciscan St. James Health – Chicago Heights (Project Number COE E-08-16)

Franciscan St. James Health – Chicago Heights (Project Number CON 16-005)

Members of the Review Board:

The City of Chicago Heights Fire Department has over 60 sworn full time firefighters and paramedics who respond to all calls for emergency medical assistance for the City of Chicago Heights and the Village of Olympia Fields. Chicago Heights firefighters and paramedics, along with virtually every other first responder in the south suburbs, adamantly oppose the expansion of the St. James Olympia Fields Hospital. This plan is a poor choice when you consider the following facts on the elimination of emergency room and critical care services at the Chicago Heights campus:

- The St. James Chicago Heights Emergency Room had **40,000** patient transports in the past year.
- The Olympia Fields campus treated **35,000** patients in the last calendar year.
- Chicago Heights EMS responders alone were responsible for transporting 3,624 patients to the Chicago Heights campus.
- St. James' proposed restructuring plan reduces total emergency room bays from the current 44 to 32.
- St. James restructuring plan only expands the existing Olympia Fields Emergency Room by approximately 20%, not the 100% they claim.
- The current plan is clearly inadequate to meet the existing need; there is no provision for any increased need. Consequently, we will be met with:
 - Emergency patients who will suffer longer transport times.
 - Emergency patients who will suffer longer wait times until treatment.
 - A risk of increased danger and death.
 - Turn-around time on returning paramedic units to service dramatically increasing, causing further risk to residents.
 - Travel times for suburbs beyond Chicago Heights increasing exponentially.

FIRE PREVENTION IS EVERYONE'S BUSINESS – WON'T YOU PLEASE COOPERATE

March 1, 2016

Page 2

What will happen when there is only one emergency room?

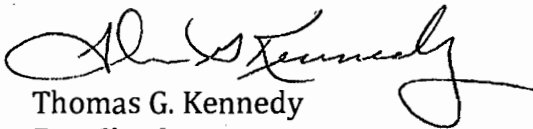

What is the plan?

Where are the answers?

The answer is that there is no plan in place. We cannot effectively deliver services as EMS responders and provide transport to St. James Olympia Fields based on the sheer number of transports from Chicago Heights and the surrounding municipalities.

I urge the Board to deny the closure of the emergency room in Chicago Heights and the St. James Olympia Fields expansion application until provisions are made for the retention of emergency room services at the Chicago Heights campus. Our community and the southland region cannot lose this critical point of care for emergency room services.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "Thomas G. Kennedy", with a stylized flourish at the end.

Re: Franciscan St. James Health – Chicago Heights (Project Number COE E-08-16)
Franciscan St. James Health – Chicago Heights (Project Number CON 16-005)

Members of the Illinois Health Facilities and Services Review Board:

I am submitting this letter of opposition to the application for closure and elimination of critical care services for St. James Hospital in Chicago Heights.

As alderperson for the City of Chicago Heights, I represent the residents in my Ward on issues that impact my constituency, as well as the community as a whole. The emergency room closure in Chicago Heights will have a far-reaching and negative impact on our residents. The Olympia Fields campus is inaccessible via public transportation, which is the only transportation available to many of our residents in the area. In many instances, our residents using the St. James Urgent Care in Chicago Heights cannot be treated at and are redirected to the emergency room. The emergency room in Chicago Heights is overcrowded and understaffed. What can any resident expect from a consolidation if the need for critical care is not being met at the current time?

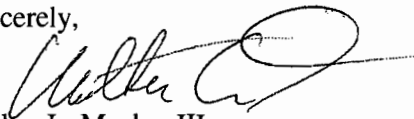

Franciscan St. James has submitted an application that is flawed from its inception. There is no substantive documentation that addresses our profound concern regarding transport times and the combined numbers of emergency visits from two campuses. During public hearings, CEO Arnie Kimmel actually said St. James "...has two years to figure it out..." – and has acknowledged that the infrastructure (streets and roadways), EMS response time, emergency transport and other critical unanswered questions must still be addressed.

Aren't these critical issues part of a process that should be addressed and resolved before we close an emergency room and eliminate critical care?

We continue to see site plans change and portions of a demolished campus renamed after the outcry from our residents; St. James will now add a patient pavilion – which gives residents a larger waiting room. St. James proposes an expanded urgent care and 24/7 service – neither of which addresses the lack of emergency and critical health care where the need exists – in Chicago Heights.

The board must consider the lack of planning and forethought in this application process. We believe an alternate plan for emergency and critical care services that remain in Chicago Heights is a necessity for the delivery of our health care needs.

Sincerely,

Walter L. Mosby, III

Franciscan St. James Health - Chicago Heights (Project Number CON 16-005)

Dear Review Board:

Please find attached the electronic Petition signatures of 500 Bloom Township residents and others opposing the application submitted by Franciscan St. James Hospital for an expansion of the Olympia Fields Campus to be conversely set off by the closure of the St. James Chicago Heights Hospital including all emergency service operations.

Respectfully submitted,

TJ Somer

Really stupid move to make the Chicago Heights location out patient only.

Barry Baker
Park Forest, IL 60466
Feb 28, 2016

Without this hospital emergency room and an area hospital close to thousands of people in nearby communities, many people will not make it to further hospitals in case of emergencies. A big mistake. I was born there, Ive had 2 surgeries there in emergency situations. I might not be here, had I been taken all the distance to Olympia Fields or somewhere else.

The City of Chicago Heights needs access to high quality healthcare. There are already so many disparities for people of color, it is highly unlikely that the residents who live here will make the trip to Olympia Fields because of fear of not being welcomed. I worry especially for those who speak Spanish. The hospital also employs so many people who live nearby and the likelihood that they will be transitioned to the Olympia Fields campus is not guaranteed, furthering this crisis. Olympia Fields seems like a state away when you are not able to afford the fare, please do not patronize the residents of Chicago Heights. We are better than that and we deserve better.

Brenda Konop
Watertown, NY 13601
Feb 17, 2016

As a person that was born and visited this hospital, I strongly believe that it should said open. Not only is it close, it's close enough that one can walk to it. We, South Chicago Heights, Chicago Heights, Steger, Sauk village, Ford Heights and other near by communities, will suffer if this hospital. Sometimes people don't make it to St. James ,Chicago Heights, now it might be even more difficult for people to get to the Olympia Fields location.

Noemi Torres
Steger, IL 60475
Feb 17, 2016

Myself, my mom and my entire family were born at St. James Chicago Heights it would be devastating if that historical landmark was torn down! We also need an ER Trauma Center in that location it is a matter of life and death!

Re: E-008-16 Franciscan St. James Health - Chicago Heights,
Chicago Heights /CON 16-005 Franciscan St. James Health-Chicago Heights

Dear Review Board:

I write to you today as the Superintendent of Bloom Township District 206, to express my heartfelt opposition to the closing of St. James Hospital - Chicago Heights in exchange for an ill planned tradeoff for the expansion of the St. James Olympia Fields that is purportedly designed to provide for the future health care for the region.

Bloom Township District 206 serves over three thousand students of all ages, ethnicities and economic backgrounds. St. James Hospital - Chicago Heights has served a similar mission for over one hundred years providing medical care to those who need it the most and can afford it the least. Providing access to health care for the needy is the very core of the Franciscan Sisters mission statement. Under St. James proposed restructuring, that mission statement will be abandoned and those most susceptible to sickness, disease and injury will be left without access to care or emergency services.

The St. James plan simply leaves too many unanswered questions. And, it has become grossly apparent that they rushed approval of the plan in hopes of avoiding controversy. The proposed method for the future handling of an additional 45,000 emergency room cases at one facility has been based on arbitrary speculation, is suspect at best and founded in false premise. How many community impact studies were done prior to plan adoption - none. How many Mayors of the affected communities were consulted before plan adoption - none. How many school leaders participated in discussions - none. Was a transportation study to the new facility from the Chicago Heights

BLOOM TOWNSHIP HIGH SCHOOL DISTRICT 206

BLOOM & BLOOM TRAIL HIGH SCHOOLS

location done prior to plan adoption – no. Has there been a proposal for 24 hour access to care for the uninsured and underinsured – no.

What was done? A restructuring plan based solely on profit margin.

The Health Facilities Review Board policy of being able to grant a hospital closure via the statutory exemption must be discontinued or at least amended. Core community interests are at risk of being adversely and irreparably damaged. Minimally, the closure exemption must not be heard or granted until the expansion Certificate of Need hearing and process has been completed, and adequate health care is confirmed for all – not just the insured.

The community and region cannot lose this critical point of health care.

RE: Opposition to Application E-008-16 Franciscan St. James Health-Chicago Heights
Opposition to Application CON 16-005 Franciscan St. James Health-Chicago Heights
To the Members of the Illinois Health Facilities and Services Review Board:

As Mayor of the Village of Crete, I am submitting this letter of opposition regarding an application filed by St. James Health to discontinue emergency and critical health care services in Chicago Heights. It is apparent to me that there are two distinctly different issues that the closing of St. James presents. The first is the access to basic health care for those in need with limited ability to pay, and the second, the elimination of emergency room care for a much larger population. Neither is necessarily more important than the other, just dissimilar in impact, scope and need and should be approached separately for solutions and decisions.

The issue that has the most potential for impacting the Village of Crete and the Crete area is the closing of the emergency room facilities. The Village of Crete and Crete Township has over 24,000 residents that rely on emergency room services to supply treatment and specialized medical care. It is the closest hospital to the Crete area. Closing this facility will in all cases virtually double the travel distance and travel time by forcing ambulance crews to use the facilities at St. James Olympia Fields or St. Margaret's in Dyer, Indiana. Issues with roads and infrastructure complicate transport to Olympia Fields because there is no direct route to that facility from the Crete area.

Transportation issues are an important aspect of emergency care and can be complicated if delayed by blocked railroad crossings in Crete, Steger, South Chicago Heights, Chicago Heights, University Park or Park Forest while enroute to the Olympia Fields facility. Add that to increasing the distance we must travel and a recipe for adverse outcomes for those critically in need of ER intervention has been created.

Transport times for municipal or township fire departments, down time for equipment and personnel at the ER are further complicated by frequent ER bypass declarations at both St. Margaret's in Dyer and St. James Olympia Fields. This places further strain on local resources with no guarantee that this constant problem will be solved. The promise of new facilities is not necessarily the solution if not adequately staffed or large enough to handle the expected patient load. Our investigation has uncovered that the by-pass issue at St. Margaret's is related to the diversion of ER resources to handling scheduled cardiac surgical cases. This is an unacceptable problem that needs to be addressed in a comprehensive and complete manner so ER service is not interrupted by placing the facility on by-pass.

BOARD OF TRUSTEES:

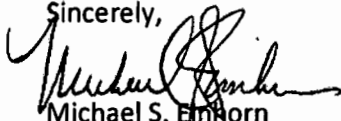

STEVEN BEAUDOIN DEAN GAFFNEY DORIS HARMON-WARREN STEPHEN E. JOHNSON HOLLY MUEBURN MARK WIATLER

Manpower for the Crete Fire Department, as well as other area departments, is at a premium and any additional time spent away from our response area puts the next call in jeopardy of not being answered with adequate manpower. The Crete Fire Department is already understaffed with no additional money available to increase staffing. The promise of providing for quick turnaround times is no substitute for being twice the distance away from our response area. If we are unavailable, by virtue of being too far away to respond, we are left with no alternative but to call a neighboring department for help. In essence this just transfers the problem to another agency.

Additionally, there will be times, that because of patient insurance restrictions, we will be prohibited from going to St. Margaret's, which as you know is in Indiana. This further complicates our current operation by forcing us into a longer path to St. James Olympia Fields. Also, we will only be able to take patients that are in police custody to Olympia Fields, because if they are taken to Indiana, once released they would have to be extradited back to Illinois. This is complicated and costly process at best, and unnecessary under current conditions by using St. James, Chicago Heights.

In closing, I would like to state that I believe this entire problem has been created by poor or inadequate planning on behalf of St. James management over the years and the ill-advised purchase of the Olympia Fields facility. Instead of concentrating on "right sizing" the Chicago Heights facility over the last several decades, they chose to buy the competition. A costly error! Now they are making their problem a problem for the residents of the entire area which we cannot solve. I strongly request that your organization insist that the emergency department be required to remain open and not subject this area to the obvious and significant impacts as described above.

Sincerely,

Michael S. Enkorn
Village President

Re: E-008-16 Franciscan St. James Health – Chicago Heights, Chicago
Heights /CON 16-005 Franciscan St. James Health-Chicago Heights

HIGHWAY COMMISSIONER
JOSEPH PATRICK STANFA

Dear Review Board:

I have the privilege of serving the 90,000 residents of Bloom Township as Township Supervisor. I write today on behalf of those residents in opposition to the application submitted by Franciscan St. James Hospital for an expansion of the Olympia Fields Campus to be conversely set off by the closure of the St. James Chicago Heights Hospital including all emergency service operations.

As an attorney and Corporate Counsel for the City of Chicago Heights, I can't help but question the Health Service Board policy and practice of being able to summarily grant an application for Discontinuation of Services of the Chicago Heights Campus on the grounds that the application was deemed "complete", without first having conducted a complete hearing on the Certificate of Need application for the expansion of the Olympia Fields campus and ensuring that adequate health services are going to be provided for the service area being abandoned.

I believe the "exemption" language of the Health Service Planning Act is on its face "unconstitutional" under the State of Illinois Constitution of 1970. Article Eleven of the State of Illinois Constitution mandates that a healthy environment is a personal right of all citizens of Illinois the deprivation of which may be enforced against any "public or private" entity. Article Two of the Constitution mandates that no person may be deprived of a property right without the "due process" of law. A statute that allows for the elimination of health services on a summary basis and absent a full hearing and determination that the health environment of an entire region will not be adversely affected cannot pass Constitutional muster. The HF&S Board should stay all further consideration of both applications filed by Franciscan St. James until the

constitutionality of the statute is determined or the Act is amended to eliminate the exemption language contained therein.

From a personal and practical perspective, as Township Supervisor I am responsible for the well being of the 90,000 residents of Bloom Township. Bloom has a diverse population with residents of all ages, ethnicities and economic backgrounds. It includes the Village of Ford Heights, which has commonly been described as one of the poorest communities in the nation, Chicago Heights, Sauk Village, Glenwood, Homewood, Olympia Fields, Park Forest, Steger, South Chicago Heights, Lynwood, Lansing and a portion of Flossmoor. Bloom Township's mission is to act as the final safety net for the most needy - those who would otherwise be left without the base essentials such as food, shelter, certainly health care, and most of all, hope.

St. James Hospital - Chicago Heights has served a similar mission for over one hundred years providing medical care to those who need it the most and can afford it the least. Providing access to health care for the needy is the very core of the Franciscan Sisters mission statement. Under St. James proposed restructuring, that mission statement will be abandoned and those most susceptible to sickness, disease and injury will be left without access to care or emergency services.

Unfortunately, St. James process of presenting the restructuring plan has been a continual campaign of misdirection and half truths. Consequently, the veracity of their plan and promises must be viewed with skepticism. As recently as June 2015, St. James published an approved plan that provided for the transfer of most inpatient services to the Olympia Fields Campus, but instituted new in-patient type services at the Chicago Heights campus such as hospice and psychological services. Most importantly, the June plan provided for the retention of the Emergency room. Without further word of modification of the June plan, the Hospital Board announced in October 2015, that it would instead discontinue virtually all services in Chicago Heights including Emergency room services. In December the City received notice and the first site plan that called for the demolition of the hospital except for the two story office portion.

The rush to approval was clearly done with the intent of avoiding public scrutiny. Consequently, the current plan has left too many unanswered questions, i.e., the proposal for the future handling of an additional 45,000 emergency room cases to be consolidated at one facility has been based on arbitrary speculation of reduced service numbers, is suspect at best and founded in false premise and conflicting statements as to the size of the expansion. How many community impact studies were done prior to plan adoption - none. How many Mayors and first responders of the affected communities were consulted before plan adoption - none. How many school leaders participated in discussions - none. Was a transportation study to the new facility from the Chicago Heights location done prior to plan adoption - no. Is there currently public transportation to the Olympia Fields site - no. Will Indiana hospitals accept Illinois Medicaid cards when emergency treatment is necessary there because St. James is on

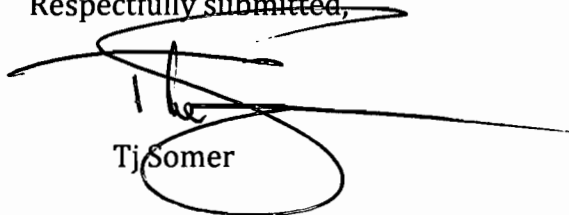

by-pass – no. Has a proposal been made to ensure that the uninsured and underinsured have 24 hour access to care – no.

What was done? A restructuring plan based on the greatest profit margin.

The Health Facilities Review Board policy of entertaining a hospital closure via the statutory exemption must be discontinued. Core community health interests are at risk of being adversely and irreparably damaged. Minimally, the closure exemption application must not be heard or granted until after the Certificate of Need hearing and process regarding the expansion has been completed, and adequate health care is confirmed for all – not just the insured.

The community and region cannot lose this critical point of health care.

Respectfully submitted,

Tj Somer

Chicago Heights /CON 16-005 Franciscan St. James Health-Chicago Heights

HIGHWAY COMMISSIONER
JOSEPH PATRICK STANFA

Dear Review Board:

I write to you today as a Bloom Township Trustee to express my heartfelt opposition to the closing of St. James Hospital - Chicago Heights in exchange for an ill planned tradeoff for the expansion of the St. James Olympia Fields that is purportedly designed to provide for the future health care for the region.

Bloom Township has a diverse population exceeding 90,000 residents of all ages, ethnicities and economic backgrounds. It includes the Village of Ford Heights, which has commonly been described as one of the poorest communities in the nation, Chicago Heights, Sauk Village, Glenwood, Homewood, Olympia Fields, Park Forest, Steger, South Chicago Heights and Lynwood and a portion of Flossmoor and Lansing. Bloom Township's mission is to act as the final safety net for the most needy - those who would otherwise be left without the base essentials such as food, shelter and most of all hope.

St. James Hospital - Chicago Heights has served a similar mission for over one hundred years providing medical care to those who need it the most and can afford it the least. Providing access to health care for the needy is the very core of the Franciscan Sisters mission statement. Under St. James proposed restructuring, that mission statement will be abandoned and those most susceptible to sickness, disease and injury will be left without access to care or emergency services.

The St. James plan has simply left too many unanswered questions in its quest to rush approval of the plan in hopes of avoiding controversy. The

proposal for the future handling of an additional 45,000 emergency room cases at one facility has been based on arbitrary speculation, is suspect at best and founded in false premise. How many community impact studies were done prior to plan adoption - none. How many Mayors and first responders of the affected communities were consulted before plan adoption - none. How many school leaders participated in discussions - none. Was a transportation study to the new facility from the Chicago Heights location done prior to plan adoption - no. Has there been a proposal for 24 hour access to care for the uninsured and underinsured - no.

What was done? A restructuring plan based on profit margin.

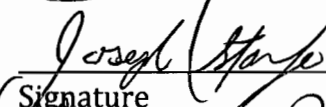

The Health Facilities Review Board policy of entertaining a hospital closure via the statutory exemption must be discontinued or amended. Core community interests are at risk of being adversely and irreparably damaged. Minimally, the closure exemption must not be heard or granted until after the Certificate of Need hearing and process regarding the expansion has been completed, and adequate health care is confirmed for all - not just the insured.

The community and region cannot lose this critical point of health care.

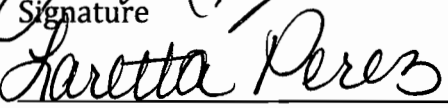

Respectfully submitted on behalf of the 90,000 residents of Bloom Township:

RE: Opposition to Application E-008-16 Franciscan St. James Health-Chicago Heights, Chicago Heights CON 16-005 Franciscan St. James Health-Chicago Heights

To the Members of the Illinois Health Facilities and Services Review Board:

As Fire Chief of the Village of Matteson, I am submitting a letter of opposition regarding an application filed by St. James Health to discontinue emergency and critical health care services in Chicago Heights.

- The Village of Matteson has over 19,000 residents with over 2250 emergency medical calls per year. Calls are trending increases of 2-4% per year.
- More than doubling the amount of ambulance traffic at the Olympia Fields campus, regardless of improvements, will increase delays in getting ambulances back on the street and back to our community for the next call. As emergency medical providers become delayed, pressure on the entire system results in increase calls for mutual aid thereby increasing the response times to those within our communities dialing 911 for emergency medical rescue.
- More than doubling the amount of ambulances traveling through the Crawford/Governor's/Lincoln Highway intersection will create hazards and increase motor vehicle accidents for all travelers including the ambulance crews and their patients
- More than doubling the amount of ambulance traffic will increase the potential for motor vehicle accidents and delays as all feeder roads around the Olympia Fields campus have only one lane in each direction with no traffic signal control in or out of any of the

Matteson Fire Department

"Serving since 1894"

facility driveways. As a point of reference, the Chicago Heights campus has two lanes in all directions feeding the facility as well as traffic signaling.

- Increased staffing costs to fill the gaps created by increased delays at the emergency department and increased vehicle maintenance and repairs due to higher levels of mutual aid and longer distances to service all 911 calls. Both of these items negatively impact our already stretched operating budget.

As you can see, the impact of this decision can have many consequences that reach far beyond assumptions made in a boardroom. Restructuring hospital operations in order to survive in this healthcare environment is understood and even encouraged, but to eliminate a functioning and vital emergency department leaves a vacuum of service that will have a deleterious effect upon all surrounding communities. A more global solution that includes all stakeholders is needed to provide for those in the most need within our communities prior to any decision regarding a closure.

Respectfully,

Chris Schwalbe, Fire Chief

**RE: Opposition to Application E-008-16 Franciscan St. James Health-Chicago Heights, Chicago Heights
CON 16-005 Franciscan St. James Health-Chicago Heights**

To the Members of the Illinois Health Facilities and Services Review Board:

As Fire Chief for the Village of Park Forest, I am submitting this letter of opposition regarding an application filed by Franciscan St. James Health to discontinue emergency and critical health care services at their Chicago Heights campus.

The Village of Park Forest has 21,975 residents and provides ambulance transport only to the Franciscan St. James Health facilities in Chicago Heights and Olympia Fields. Of the 1,657 total patient transports, 558 of were directed to the Chicago Heights campus in 2015. Redirecting these patients to the Olympia Fields campus along with those of many other providers could overwhelm an already stressed emergency room at that campus.

Relocating services to the Olympia Fields campus would also provide transportation difficulties to our citizens who have limited access to public transportation. Currently there are no public transportation bus routes or avenues that would allow citizens in need to access the Olympia Fields campus directly. This means those patients who may have taken public transportation to St. James in Chicago Heights for minor issues will now have to request ambulance transportation to get to Olympia Fields, further taxing our already strained emergency services.

In addition to transportation difficulties for patients and their families, the overall services available to citizens of our region will once again take a significant hit. A number of years ago the Olympia Fields hospital gave up its status as the only trauma center located in our region and within reach of our ambulance. Now the paramedics and patients are having their ability to quickly and efficiently receive even basic emergency care diminished beyond what we believe to be in anyone's best interest.

Furthermore, we believe even with planned improvements to the emergency room at the Olympia Fields campus, this facility will not be able to handle the potential 75,000 emergency room visits for the region. This crush of patients could force the emergency room to go on by-pass more frequently, requiring ambulances from our Village, and many others, to seek alternates for patient care. Even when the hospital does not go on by-pass, the additional wait times for open cubicles will impact the ability of our personnel to

return to Park Forest in an efficient and timely fashion. Wait times already present issues at times; by eliminating one emergency room in our area, these situation will certainly multiply.

I am also concerned with ancillary factors such as issues with roads and infrastructure as it relates to handling the additional ambulance transports to the Olympia Fields campus for St. James Health. The primary roadway for access to this emergency room is Crawford Avenue, a two lane road already overburdened with everyday traffic. Adding additional ambulance traffic to this low volume roadway could certainly increase the risk of traffic related issues and accidents. A single two car accident could make this emergency room even more difficult to access; increasing patient care and transportation times in its wake.

Should the Chicago Heights campus be allowed to cease emergency services, this will require our fire department to expand our transportation services to other hospitals to provide a back-up location to the St. James Health Olympia Fields campus. The additional transportation time could be critical minutes for the patient and will most certainly result in additional down time for ambulances and EMS personnel at the emergency room.

In addition to the additional down time at the more distant emergency room, return to service time will increase for our EMS units thus increasing the stress on our already strained abilities to provide for our community. Approximately 1 in 4 of our emergency responses are now concurrent calls stretching our minimum staffing to its limits time and time again. Increased transport, emergency room and turn-around times will undoubtedly result in more multiple calls which will further impact our ability to deliver services. If our crews are tied up more frequently due to more distant patient transports, this will require us to rely more on mutual aid thus impacting the surrounding departments and villages. This impact will be like ripples in a pond, reaching farther and farther as subsequent villages and towns aid others and then may need response support themselves.

Park Forest has difficulty meeting our own staffing needs at times; by adding the additional down time and the potential for increased mutual aid to support our neighbors, we will likely be beyond our current staffing capabilities. Much like many, if not all, of the communities in the southeast Cook and Will county area there is no additional revenue to help offset this need for additional staffing thus someone will have to suffer if our resources continue to be spread thinner and thinner.

In conclusion, I cannot support the closing of the emergency room at the Franciscan St. James facility in Chicago Heights. This action would have a multitude of negative impacts and consequences for our community, its citizens and the members of the Park Forest Fire Department. I believe for the greater good of the southeastern region, some other solution to the issues facing the Franciscan Alliance must be explored and undertaken.

Sincerely and with all due respect,

Franciscan St. James Health - Chicago Heights
(Project Number CON 16-005)

To whom it may concern,

As the Bloom Township Executive Senior Services Director working with the senior citizen and disabled populations for the 12 south suburban communities within Bloom Township, I am writing today in my opposition to the proposed closure of St James Hospital in Chicago Heights, IL.

Transportation is one of the leading obstacles for seniors and disabled persons seeking medical services. This vulnerable population lacks the accessibility to transportation as they are least likely to have automobiles or handicapped accessible transportation services to a medical facility. Local paratransit services through PACE are limited to existing service areas and evaporating funding. These additional routes required beyond our service area will adversely impact our Transportation budget and staffing requirements. Pace ADA service is only available ¾ miles from fixed routes. St James Chicago Heights is on a PACE fixed route, Olympia Fields is not. Senior citizens and disabled persons will be burdened with trying to find a family member or friend to get them to their important medical appointments.

Additionally, the proposed elimination of emergency room facilities locally will impact those who are uninsured or underinsured. Illinois Medicaid will not pay for services at an Indiana hospital. Should Medicaid individuals need emergency services and be brought to neighboring Indiana hospitals, they will be responsible for payment not supported the Medicaid Program. Seniors on a fixed, limited income may face the reality of having to choose between paying an outstanding medical bill or pay for their medication, food and housing.

Thank you for your consideration of my objection to the closing of the St James Chicago Heights. I am available for any additional comments or questions that you may have.

Respectfully

To Members of the Illinois Health and Facilities Review Board:

Franciscan St. James Health - Chicago Heights
(Project Number COE E-08-16)
Franciscan St. James Health - Chicago Heights
(Project Number CON 16-005)

I am writing this letter urging you to refuse an application submitted by the Franciscan Health Care Alliance requesting approval to close St. James Hospital in Chicago Heights.

As Superintendent for Chicago Heights School District 170, I can say without hesitation that the proposed closing of that hospital will have a devastating effect on our community.

For well over a century St. James Hospital has been an essential part of life in our city. Whether performing surgical procedures or providing emergency care, whether birthing newborns or providing hospice services to those in need, whether affording our citizens essential laboratory and diagnostic procedures or life changing wellness programs the hospital has been vital to the peoples of Chicago Heights.

Now, however, the administration of St. James Hospital has submitted an application to close the hospital's emergency room and eliminate critical health care services in Chicago Heights.

This request to close St. James Hospital's Chicago Heights Campus is untenable and is a disservice to the citizens of our community. I can't help but wonder if a hospital originally founded on the tenets of St. Francis and dedicated to providing excellent health care to all peoples has lost its focus. I wonder, too, if this is but another example of a medical facility/business entity making a decision solely to maximize its financial "bottom line?"

The facts are clear: with more than 40,000 emergency room visits a year, nearly half of all individuals receiving health care covered by Medicaid, and little or no access to public transportation to the hospital's sister campus in Olympia Fields, it is essential that St. James Hospital's Chicago Heights Campus remain open.

There is, I realize little that I or any other one person can do to affect the outcome of this matter. I can, however, write to say that the closing of St. James Hospital will be a major setback to our city's goal of revitalization and renewal. Without having a viable health care facility in our community, prospective residents, prospective employers, and prospective investors most likely will see Chicago Heights in a negative light. Our community and its wonderful, hard-working and loyal citizens deserve better, and I urge you to help us in keeping St. James Hospital - our hospital - as a key element of life in our city.

Sincerely,

Thomas J. Amadio

Ref: Franciscan St. James Hospital – Closure

I attended the Town Hall hearing at Bloom High school on February 9, 2016. I was disturbed that so much emphasis was placed on how good the medical services that will be provided at the Olympia Fields campus, but did not adequately address how the move will negatively affect the communities surrounding the Chicago Heights facility.

I am extremely concerned of the remnant services that will be left at the Chicago Heights facility that will not adequately address the emergency medical needs of those who do not have nor will have transportation to the Olympia Fields facility in crises.

I am a Police and Fire Chaplain serving several departments in the south suburbs having responded to countless emergency situations where transport to the nearest medical facility for treatment was critical. Not to insult anyone's intelligence, I'm certain you're aware of the definition of "emergency," which is 'an unforeseen combination of circumstances or the resulting state that calls for immediate action.' Managing resources in a crisis is difficult enough alone, but compounded when unnecessary distance and resources must be calculated to provide imminent emergency services.

There are times when seconds are a crucial determinant of life or death and moving emergency services from the Chicago Heights facility will be a detriment not only to our communities, but to the patients and families of patients needing emergency services. Consider how this movement will affect you should you be in our community and develop a situation needing immediate emergency healthcare. Of course, leadership and residents of Olympia Fields and Franciscan employees support the proposed plan as financial gain would be imminent. However, there cannot be a value assessed to a person's life. What is the value of your life in an emergency?

Cordially,

A handwritten signature in cursive script, reading "Bishop Ronald J. White".

The South Suburban Mayors and Managers Association represents 44 communities and 650,000 people in southern Cook and Will counties. Approximately 2 weeks ago our Public Safety Committee chaired by Mayor Bob Kolosh of Thornton held an information meeting on the proposal by Franciscan St. James concerning the Chicago Heights and Olympia Fields campuses. Nearly one hundred Mayors, Village Managers, public safety personnel and others attended this meeting.

Subsequent to that meeting the Executive Committee of SSMMA met to discuss this issue and have authorized me to make the following public statement:

SSMMA very much appreciates the public health service provided by Franciscan St. James Olympia Fields and Chicago Heights and the proposed investments and upgrades to the facilities. We also understand that difficult decisions need to be made.

While SSMMA supports much of what is being proposed by Franciscan St. James, we cannot support the closing of the Emergency Room in Chicago Heights based upon our current information. A number of our Mayors, public and private ambulance operators and our residents have grave concerns that the plan can adequately provide timely access to residents south and east of St. James Olympia Fields and that the proposed ER facility in Olympia Fields will have adequate capacity to serve the doubling of visits to the Olympia Fields ER. Should the expanded Olympia Fields ER not have adequate capacity at times and go on bypass this would create additional time when the ambulances are out of our municipalities and not in service to community residents.

SSMMA would instead propose that the Hospital Facilities Board, all hospitals and health care facilities in the Southland and Cook County Hospitals join with our Mayors, State Legislators, Governor Rauner, President Toni Preckwinkle and County Commissioners to explore the establishment of a Level 1 Trauma Center for the Southland in Chicago Heights.

All reports confirm that the need for a Level 1 Trauma Center in the southern suburbs is great and by working together this can be the opportunity to achieve this critical need. We pledge our support to help make this happen.

PRAIRIE GREEN
AT DIXIE CROSSING
a Senior Lifestyle community

February 18th, 2016

Courtney R. Avery, Administrator
Illinois Health Facilities and Services Review Board
525 West Jefferson Street
Springfield, Illinois 62761

Franciscan St. James Health - Chicago Heights (Project Number COE E-08-16) Franciscan St. James Health - Chicago Heights (Project Number CON 16-005)

Ms. Avery and Members of the Review Board:

I am writing this letter in regards to the closing of St. James Hospital in Chicago Heights. Prairie Green at Dixie Crossing is a supportive living community with 144 seniors living with us. We use St. James often for our 911 emergencies and also just for when our residents need to be checked out at the hospital due to a fall or non-life threatening emergency.

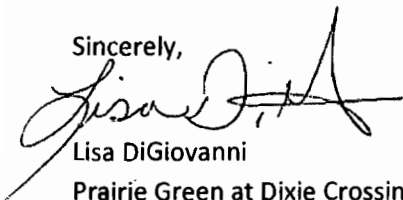

I have been present for talks with Mr. Kimmel and the closing of the hospital. I am not necessarily opposed to the closing of the inpatient part but the Emergency is a much needed part to our community and surrounding communities. When Mr. Kimmel was asked about hospital being on bypass in the last few years he stated it has never been and the Olympia Fields campus once in the last year. When you add 12 more communities to St. James Olympia Fields how many times do you think it will happen? Mr. Kimmel's answer was – "we have 2 ½ years to figure it out." I disagree - he should be figuring it out now.

It will not be nice for our families to know their loved one was on the way to Olympia Fields but then on bypass and we have to figure out which hospital has our resident. He stated that the Urgent Care on Dixie Highway will become 24 hours and be able to help with the over flow of the hospital. Again, this is great but they do not accept Medicaid and that would not help my residents or other people in the surrounding communities that are on Medicaid. Mr. Kimmel said again he has 2 ½ years to get it approved for Medicaid. This is something that should have been considered long before now.

One of my residents went to St. James Urgent Care to seek treatment after a fall. She hurt her wrist so her family took her there. When they were seen by the doctor they told her they could not treat the broken wrist and that she would have to go to St. James Chicago Heights ER. The family did take her and it was wrapped until she could see an orthopedic doctor on Monday. If that Urgent Care can't handle a broken wrist now what is to say it can in 2 ½ years - will there be a change? There is no guarantee as of now.

As I expressed to Mr. Kimmel at the Steger, IL hearing, these things should have been part of a plan and in place now. So maybe the Board can look at having a free-standing emergency with services in place before allowing them to tear down the hospital and make it office space for administrative purposes.

Sincerely,

Lisa DiGiovanni
Prairie Green at Dixie Crossing

RE: Opposition to Application E-008-16 Franciscan St. James Health-Chicago Heights, Chicago Heights /CON 16-005

To the Members of the Illinois Health Facilities and Services Review Board:

As Mayor of the Village of Steger, I am submitting a letter of opposition regarding an application filed by St. James Health to discontinue emergency and critical health care services in Chicago Heights

- The Village of has 9577 residents with 1132 Emergency Visits to St James.
- Transport issues – RR crossing, limited to no public transportation to Olympia Fields.
- Transport times for municipality, down time for equipment and personnel at ER.
- Issues with roads and infrastructure complicate transport to Olympia Fields.
- Impact on village budget for personnel and equipment.
- Lack of Public transportation to Olympia Fields campus.
- The Village has two senior living complexes full to capacity, with a need for more.

As Mayor, as well with all elected officials have a responsibility to provide services to our residents.

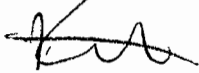

I, along with my Board of Trustees, know the importance to provide professional medical care and police services to all residents and visitors alike. The village has been fiscally responsible to upgrade our services by adding personal to the village's Fire Department. The closure of St. James Chicago Heights Emergency Room will negate the progress the village has made. The cost of this closure is no more than an unfunded mandate.

The village will suffer with manpower shortages and vehicle wear and tear. The time our public safety personnel will "be out of service" is a dangerous amount of time with the additional

"Where Progress is a Fact, Not A Promise"

time it will take to get to the Olympia Fields campus, more important will be the time coming back without the use of lights and sirens. I urge the Illinois Health Facilities and Review Board along with St. James Franciscan to take into consideration the impact to area residents, the region and costs to municipalities to provide required services. Safety will be in jeopardy for the region as well with ambulances traveling mostly on 2 lane roadways compared to the four lanes currently used for the Chicago Heights facility.

Best regards,

Kenneth Peterson Jr.

Franciscan St. James Health - Chicago Heights (Project Number COE E-08-16)
Franciscan St. James Health - Chicago Heights (Project Number CON 16-005)

To the Members of the Illinois Health Facilities and Services Review Board:

As Mayor of the Village of South Chicago Heights, I am submitting a letter of opposition regarding an application filed by St. James Health to discontinue emergency and critical health care services in Chicago Heights.

- The Village of South Chicago Heights has 4139 residents
- There is no public transportation to the Olympia Fields campus. Many of our residents depend on public transportation.
- Our current transportation time to get to the St. James campus is approximately 4 minutes at the most. Our transportation time to the Olympia Fields campus is approximately 10 minutes and the return time to our fire department will be longer because of no vehicle emergency lights and horns are used, thereby keeping my ambulance out of service for a longer period of time.
- The cost to the Village of South Chicago Heights will no doubt go up by; an increase in fuel, longer man hours, and wear and tear on our units. We are a very small non-home rule community and would not be able to recapture these costs.
- Our area should be no less deserving of critical healthcare than any other community. We only want what others have and deserve on the north side and far west side of Chicago.

In closing, the Village of South Chicago Heights and I, oppose the application by St. James Hospital to close the Chicago Heights campus.

Sincerely,

David L. Owen
Village President

Re: E-008-16 Franciscan St. James Health - Chicago Heights,
Chicago Heights /CON 16-005 Franciscan St. James Health-Chicago Heights

Dear Review Board:

I write to you today as a member of the Board Member of Bloom High School District 206 to express my heartfelt opposition to the closing of St. James Hospital - Chicago Heights in exchange for an ill planned tradeoff for the expansion of the St. James Olympia Fields that is purportedly designed to provide for the future health care for the region.

Bloom High School serves over three thousand students of all ages, ethnicities and economic backgrounds, including the Village of Ford Heights, which has commonly been described as one of the poorest communities in the nation. Bloom provides an opportunity for an education to those who need it the most and can afford it the least. St. James Hospital - Chicago Heights has served a similar mission for over one hundred years providing medical care to those who need it the most and can afford it the least. Providing access to health care for the needy is the very core of the Franciscan Sisters mission statement. Under St. James proposed restructuring, that mission statement will be abandoned and those most susceptible to sickness, disease and injury will be left without access to care or emergency services.

The St. James plan simply leaves too many unanswered questions. And, it has become grossly apparent that they rushed approval of the plan in hopes of avoiding controversy. The proposed method for the future handling of an additional 45,000 emergency room cases at one facility has been based on arbitrary speculation, is suspect at best and founded in false premise. How many community impact studies were done prior to plan adoption - none. How many Mayors of the affected communities were consulted before plan adoption - none. How many school leaders participated in discussions - none. Was a transportation study to the new facility from the Chicago Heights location done prior to plan adoption - no. Has there been a proposal for 24 hour access to care for the uninsured and underinsured - no.

BLOOM TOWNSHIP HIGH SCHOOL DISTRICT 206

BLOOM & BLOOM TRAIL HIGH SCHOOLS

What was done? A restructuring plan based solely on profit margin.

The Health Facilities Review Board policy of entertaining a hospital closure via the statutory exemption must be discontinued or at least amended. Core community interests are at risk of being adversely and irreparably damaged. Minimally, the closure exemption must not be heard or granted until the expansion Certificate of Need hearing and process has been completed, and adequate health care is confirmed for all – not just the insured.

The community and region cannot lose this critical point of health care.

Respectfully submitted:

Ms. Courtney Avery and Members of the Illinois Health Facilities and Services Review Board:

As President of the Village of Glenwood, I am submitting a letter of opposition regarding an application filed by St. James Health to discontinue emergency and critical health care services in Chicago Heights, Illinois.

The Village of Glenwood has 9,000 residents with over 297 EMS ambulance transports to St. James Hospital in Chicago Heights, Illinois.

Elimination of this facility will drastically increase our transport times in an ambulance due to the limited roadway infrastructure available to the Olympia Fields Campus. There are only single lane roads that connect Glenwood to the Olympia Fields Campus in direct routes. Furthermore, those of my residents who do not need emergency response, would opt for public transportation, but there are no routes connecting Glenwood to the Olympia Fields Campus.

Increased ambulance transport times coupled with this inherent increase of down times at the emergency room in Olympia Fields, will result in lives lost in our town.

My secondary paramount concern is the inevitable need to increase EMS personnel and equipment in our town to accommodate our emergent needs. The Village of Glenwood, as most of our neighbors, can ill afford to shoulder the burden of more budget dollars to accommodate this closure. We are now at the point of scrutinizing our budgets as revenues shrink.

It is my plea that the Emergency Department be maintained at the current Chicago Heights Campus. Our South Suburban EMS System depends on it and any additional load on the system will be disastrous.

Sincerely,

Ronald J. Gardiner
Village President

Re: Franciscan St. James Health Facilities

Dear Mr. Constantino:

Franciscan St. James operates two hospitals in Illinois – one in Chicago Heights and the other in Olympia Fields. The Chicago Heights facility located at 1423 Chicago Road will be reduced in size and will no longer have emergency care or private patient rooms.

My concerns are as follows:

1. St. James is a large employer in Chicago Heights. These jobs will disappear.
2. There was no attempt by the hospital to contact any of the towns in their service area about these changes to the facility.
3. Without emergency room service I worry that the industries in Chicago Heights will not receive prompt response in case of an accident.
4. Chicago Heights is trying to attract new businesses and the reduction in health care services will not help
5. Emergency care will be moved to other area hospitals which are already overloaded
6. Dialog between the cities of Chicago Heights, Steger, Beecher, South Chicago Heights, Park Forest, Crete, Glenwood and Sauk Village and Franciscan St. James is non-existent. It seems the hospital decided to move ahead with this project without regard to the towns it services.

There must be a way to accommodate both the hospital's needs and those of the areas it services. Talking is a first step!

Thank you for this opportunity.

Respectfully-

Robert C. DeBolt

Re: E-008-16 Franciscan St. James Health – Chicago Heights, Chicago Heights
CON 16-005 Franciscan St. James Health-Chicago Heights
Dear Review Board,

I write to you today as a member of the Board of Trustees of Prairie State College – Community College District 515, to express my heartfelt opposition to the closing of St. James Hospital – Chicago Heights in exchange for an ill planned tradeoff for expansion of the St. James Olympia Fields that is purportedly designed to provide for the future healthcare for the region.

Prairie State College serves over twelve thousand community members of all ages, ethnicities, and economic backgrounds. Our community college especially provides the opportunity for higher education to those who need it the most and can afford it the least. St. James Hospital – Chicago Heights has served a similar mission for over one hundred years providing medical care to those who need it the most and can afford it the least. Providing access to healthcare for the needy is the very core of the Franciscan Sisters mission statement. Under St. James proposed restructuring, that mission statement will be abandoned and those most susceptible to sickness, disease, and injury will be left without access to care or emergency services.

The St. James plan simply leaves too many unanswered questions. And, it has become grossly apparent that they rushed approval of the plan in hope of avoiding controversy. The proposed method for the future handling of an additional 45,000 emergency room cases at one facility has been based on arbitrary speculation, is suspect at best and founded in false premise. How many community impact studies were done prior to plan adoption – none. How many school leaders participated in discussions-none. Was a transportation study to the new facility from the Chicago Heights location done prior to plan adoption – no. Has there been a proposal for 24 hour access to care for the uninsured and underinsured – no.

What was done? A restructuring plan based solely on profit margin.

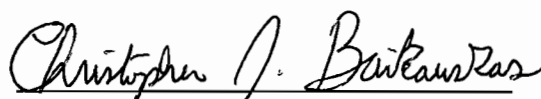

The Health Facilities Review Board policy of being able to grant a hospital closure via the statutory exemption must be discontinued or at least amended. Core community interests are at risk of being adversely and irreparably damaged. Minimally, the closure exemption must not be heard or granted until the expansion Certificate of Need hearing and process has been completed, and adequate health care is confirmed for all – not just the insured.

The community and region cannot lose this critical point of health care.

To the Members of the Illinois Health Facilities and Services Review Board:

As Fire Chief, I am submitting my letter of opposition regarding an application filed by St. James Health to discontinue emergency and critical health care services in Chicago Heights. As you are aware, the emergency room at St. James Hospital provides a vital piece of care within the south suburbs.

The loss of an emergency room will directly impact ambulance response times, and potentially have devastating result with pre-hospital care. Longer response times, and additional wait times at other facilities will hamper getting ambulances back into service sooner.

I implore you to reconsider maintaining emergency room services at the current location, or provide a free standing emergency room.

If you have any questions please feel free to contact me at 708-849-2122.
