Descriptions of Line Items  
In Support of Table Project Costs and Sources of Funds  
MEDICAL OFFICE BUILDING

These costs represent an allocation of capital costs for the development of the proposed new hospital and the associated medical office building. The costs in this report are associated exclusively with the medical office building.

**Site Preparation - \$953,000**

Soil borings	\$20,000
Site excavation and grading	70,000
Drainage and retention	60,000
Roadway construction	480,000
Erosion barriers construction	100,000
Landscaping	150,000
Utility connections	73,000

**Off-site work - \$62,500**

This line item includes parking lot construction and surfacing

**New construction contracts - \$14,305,000**

Construction activity costs include all core and shell costs, general requirements, general conditions, subguard, general liability insurance and contractor's overhead, profit and fee.

Foundations	\$1,550,000
Floor and roof structure	2,575,000
Exterior walls, cladding	2,640,000
Interior partitions, doors, glazing	580,000
Floor, wall and ceiling finishes	149,900
Function equipment	51,975
Stairs and vertical transport	1,347,000
Plumbing systems	798,000
Heating, venting and air conditioning	2,475,000
Electric lighting, power and communication	2,035,000
Fire protection systems	103,125

Clinical component: \$3,025,000; non-clinical: \$11,280,000.

**Contingencies - \$718,000**

Contingencies not exceeding 5% are included for unforeseen circumstances related to construction.  
Clinical contingency: \$145,000; non-clinical: \$573,000.

Construction + contingency for the project is \$15,023,000 ( = \$14,305,000 + \$718,000). For a 36,322 sq ft project, cost per sq ft is \$413.61.

Construction + contingency for the clinical component is \$3,170,000 ( = \$3,025,000 + 145,000). For the 6,785 sq ft of clinical space, cost per sq ft for the clinical component is \$546.79. This amount is a larger number than the average for the medical office building because of the concentration of higher cost PT/OT space and infusion therapy in the clinical services category. The physician offices and exam rooms are non-reviewable/non-clinical and less expensive space.

#### **Architectural/Engineering Fees - \$1,750,000**

A/E services include site planning, preliminary design, schematic design, design development, bid document preparation, interior design, interface with public agencies, project monitoring.

#### **Consulting and Other Fees - \$700,000**

Services include

Interior design	(included in A/E)
IT planning and consulting	(included in equipment)
CON application fee and CON legal/consultant	\$150,000
Legal	30,000
Medical equipment planning	100,000
Security systems planning	110,000
Signage/graphics design	140,000
Project management and commissioning	170,000

#### **Movable and Medical Equipment - \$3,138,685**

The cost estimates by for equipment as follows:

Infusion therapy	\$ 624,535
Outpatient clinic	2,113,065
PT/OT	265,587
Clinic support	135,498

See detailed equipment list following this page.

#### **Other costs to be Capitalized - \$2,387,500**

These costs include: IT/low voltage, furniture and artwork and capitalized moving costs, as itemized in the table of Project Costs and Sources of Funds.
