Springfield, IL 62716

Re: Opposition to #17-013, Geneva Crossing Dialysis, #17-014 Rutgers Park Dialysis, #17-015 Stone Quarry, #17-016 Salt Creek Dialysis

Applicants: DaVita, Inc. and DuPage Medical Group, LTD

Dear Ms. Olson,

I am writing on behalf of Nephrology Associates of Northern Illinois-Indiana (NANI) in opposition to projects 17-013, Geneva Crossing Dialysis, 17-014 Rutgers Park Dialysis, 17-015 Stony Quarry Dialysis, 17-016 Salt Creek Dialysis and to provide comment on the recently released State Board Staff Reports (SBSR) for the aforementioned projects.

The applicants have elected to provide no new information to the Board to address the serious concerns of several board members. After reviewing the SBSR we believe that we have identified omissions that warrant being brought to the attention of the Health Facilities and Services Review Board (HFSRB).

After conducting research using Google Maps to determine travel time and the Medicare Dialysis Facility Compare website (<https://www.medicare.gov/dialysisfacilitycompare/#search>) we discovered that the SBSR omits crucial information about Health Service Area (HSA) 7 and the current landscape of the ESRD facilities within a 30 minutes of the proposed facility. Our research shows there are multiple ESRD facilities missing from table 8 of the SBSR and when considered proves that there is available capacity among the existing facilities.

When these facilities are considered the applicant's proposal to establish 48 ESRD stations is clearly unnecessary. Table Eight in each of the applications omit several facilities:

- Geneva Crossing is missing 9 that are within 30-minute drive time of proposed facility;
- Rutgers Park is missing 9 facilities within 30-minute drive time of the proposed facility;

- Stone Quarry is missing 43 facilities within a 30-minute drive time of the proposed facility;
- Salt Creek is missing 14 facilities within a 30-minute drive time of the proposed facility.

Attached to this letter is a list pulled from the Medicare Web site outlining the facilities listed above. Unmistakably, there are more facilities in the HSA 7 that should be considered when the HFSRB votes on the four applications before them. Furthermore the majority of these facilities have capacity and can meet the need of HSA 7.

During their testimony at the September HFSRB meeting the applicants made claims that their project was an innovative approach to dialysis care and their projects would increase options in a HSA where there were no other options. Nothing could be further from the truth. When you look at all the facilities within a 30 minute drive time it becomes clear that ESRD patients in HSA 7 have many different options when it comes to choosing a ESRD facility.

- There are 6 different providers within a 30-minute drive time of the proposed Geneva Crossing;
- There are 6 different providers within a 30-minute drive time of the proposed Rutgers Park;
- There are 11 different providers within 30-minute drive time of Stone Quarry;
- There are 8 different providers within a 30-minute drive time of Salt Creek.

The notion that these facilities would increase options to patients is completely false, and the only innovation that the applicants could point to during their presentation was that establishing these facilities would give them the ability to utilize electronic medical records. That is not innovation that is the standard and limitations that DMG places on sharing it's patients medical records with other physicians should not be rewarded with four new facilities. These applications are based upon and designed to advance the interest of the applicant, not the needs of the community or the welfare of the patients, and there is nothing innovative about that.
