Re: SwedishAmerican Hospital, Rockford, Project #17-019  
**Response to Request for Additional Information**

Dear Mr. Constantino:

This letter responds to your requests for additional information regarding the modification to SwedishAmerican Hospital Project #17-019. The attached documents include the following:

1. A revised Attachment 9 clarifying the existing, proposed, remodeled and as is space. There will be no vacated space in connection with the project and no demolished space. Attachment 9 also reconciles the total clinical cost on the cost space chart to the clinical cost on the project cost and sources of funds statement.
2. A revised Attachment 14 to that also reconciles with Attachment 9. This resulted in a few minor changes from the original modification.
3. The table for department costs and gsf for Attachment 37.
4. The table from the initial modification confirming the existing, proposed and difference in beds. Regarding the ten NICU beds, please note that they were approved on June 7, 2017 in Project E-019-17, and are already included in the Inventory of Health Care Facilities and Services as reflected in the Addendum to the Inventory dated January 10, 2017 (copy attached). The NICU beds approved in Project E-019-17 will be added to the existing facility, then relocated to the women and children's facility proposed by this project (#17-019) when it is completed. For that reason, the ten NICU beds are identified in the attached table as existing beds rather than proposed beds. The key rooms table you sent to me on January 2nd is correct.
5. A revised Project Cost and Sources of Funds reflecting a reduction of \$450,000 in the contingency for clinical contracts and corresponding increase in the clinical equipment. The total project cost is unchanged.

Mr. Michael Constantino  
January 26, 2018

6. A revised Itemization of Project Costs (Attachment 7) reflecting the change noted above in the contingency and equipment line items.

Thank you for your attention to this matter.

Very truly yours,

BARNES & THORNBURG LLP

NICU	10	6,710	671	434	550	121	No

The above table reflects the changes in project square footage based on the reduction of the Pediatric Unit from 28 beds to 10 beds and the reduction of Phase I PACU from 16 to 14. The size of the Pediatric Unit no longer meets the state standard because this is an existing unit in existing space and the reduction in beds from 28 to 10 resulted in a significant increase in the department's square feet per bed.

## Facility Bed Capacity and Utilization

Complete the following chart, as applicable. Complete a separate chart for each facility that is a part of the project and insert the chart after this page. Provide the existing bed capacity and utilization data for the latest Calendar Year for which data is available. Include observation days in the patient day totals for each bed service. Any bed capacity discrepancy from the Inventory will result in the application being deemed incomplete.

## Project Costs and Sources of Funds

Complete the following table listing all costs (refer to Part 1120.110) associated with the project. When a project or any component of a project is to be accomplished by lease, donation, gift, or other means, the fair market or dollar value (refer to Part 1130.140) of the component must be included in the estimated project cost. If the project contains non-reviewable components that are not related to the provision of health care, complete the second column of the table below. Note, the use and sources of funds must be equal.
