RE: Support letter for Palos Hills Surgery Center, LLC (17-041)

Dear Ms. Olson:

I am a physician specializing in plastic surgery, and I fully support the proposal to expand and modernize the ambulatory surgical treatment center ("ASTC") located at 10330 South Roberts Road, Suite 3000, Palos Hills, 60465, known as the Palos Hills Surgery Center ("PHSC").

ASTCs provide a high quality, low cost alternative for many patients seeking highly specialized care. From a clinical standpoint, ASTCs allow for increased surgeon efficiency due to faster room turnover, specialized focuses, and designated surgical times that are not impacted by emergent and trauma cases like in the hospital setting. Historically, ASTC patients have returned positive patient satisfaction results. PHSC's positive patient satisfaction results, ranging from 94% to 100%, are certainly in line with that historical trend.

PHSC is located in a building with a MidAmerica Orthopaedics ("MidAmerica") practice location, a prolific physician practice responsible for driving surgical volume that is projected to greatly exceed the current capacity of the PHSC. The location of PHSC, in proximity to MidAmerica, provides highly integrated care and superior quality outcomes for patients. As shown in the following table, PHSC's quality results over the last two years document the success of our facility in this regard.

Quality Metric	2016	2017 January - June
Unplanned Hospital Admission Rate	0%	0%
Rate of Prolonged Recoveries >4 Hours	.42%	0%
Rate of Surgery Cancellations After Admission	.08%	.24%
Infection Rate	0%	0%
Number of Adverse Events	0%	0%

Anton J. Fakhouri, MD, FACS, FICS • Gary A. Kronen, MD • Beverlee A. Brisbin, MD • Adam F. Meisel, MD
Sarkis M. Bedikian, D.O. • George E. Charuk, D.O. • Kevin M. Jackson, MD • Prasad Gourineni, MD • Chris Chapman, D.O.
Jeremy T. Bell, PA-C • Kelly J. Hermann, PA-C • Chris Koenig, PA-C • Kristen Veldman, PA-C

I will join MidAmerica in November 2017 and I will focus on treating hand and wrist conditions, as well as reconstructive microsurgery. I am excited and proud to join the integrated care model established by Dr. Kronen, Dr. Fakhouri, and the other PHSC surgeons at PHSC. PHSC has developed a center of excellence in hand and upper extremity injuries in a region where this specialized care is not otherwise readily available to patients. The totality and coordination of expert hand care being housed at a single location for pre-operative, operative, and post-operative services to patients increases quality and patient satisfaction while decreasing costs. Without an expansion, PHSC will not be able to accommodate the surgical growth of the MidAmerica physician practice.

Therefore, for the reasons stated above, I ask the Health Facilities and Services Review Board to approve the proposed expansion.

Sincerely,

Amit Patel, MD

RE: Support letter for Palos Hills Surgery Center, LLC (17-041)

Dear Ms. Olson:

I am an orthopedic surgeon specializing in joint replacement surgery, and I fully support the proposal to expand and modernize the ambulatory surgical treatment center ("ASTC") located at 10330 South Roberts Road, Suite 3000, Palos Hills, 60465, known as the Palos Hills Surgery Center ("PHSC").

ASTCs provide a high quality, low cost alternative for many patients seeking highly specialized care. From a clinical standpoint, ASTCs allow for increased surgeon efficiency due to faster room turnover, specialized focuses, and designated surgical times that are not impacted by emergent and trauma cases like in the hospital setting. Historically, ASTC patients have returned positive patient satisfaction results. PHSC's positive patient satisfaction results, ranging from 94% to 100%, are certainly in line with that historical trend.

PHSC is located in a building with a MidAmerica Orthopaedics ("MidAmerica") practice location, a prolific physician practice responsible for driving surgical volume that is projected to greatly exceed the current capacity of the PHSC. The location of PHSC, in proximity to MidAmerica, provides highly integrated care and superior quality outcomes for patients. As shown in the following table, PHSC's quality results document the success of our facility in this regard.

Quality Metric	2016	2017 January - June
Unplanned Hospital Admission Rate	0%	0%
Rate of Prolonged Recoveries >4 Hours	.42%	0%
Rate of Surgery Cancellations After Admission	.08%	.24%
Infection Rate	0%	0%
Number of Adverse Events	0%	0%

**Anton J. Fakhouri, MD, FACS, FICS • Gary A. Kronen, MD • Beverlee A. Brisbin, MD • Adam F. Meisel, MD
Sarkis M. Bedikian, D.O. • George E. Charuk, D.O. • Kevin M. Jackson, MD • Prasad Gourineni, MD • Chris Chapman, D.O.
Jeremy T. Bell, PA-C • Kelly J. Hermann, PA-C • Chris Koenig, PA-C • Kristen Veldman, PA-C**

I currently perform the majority of my surgeries in the hospital setting. As the cost of healthcare exponentially increases, my patients are continuously looking for lower cost, high quality settings. Recent medical advances allow for more complex, high acuity services (like joint replacement surgery) in the ASTC setting. However, without the proposed expansion of PHSC, I cannot perform these surgeries within PHSC. Consequently, my patients are currently unable to realize the benefits of this lower cost, high quality venue alternative. My current practice panel and historical caseload supports the necessity for this expansion and my patients would certainly welcome this additional option, with the above-referenced added benefits.

Therefore, for the reasons stated above, I ask the Health Facilities and Services Review Board to approve the proposed expansion.

Sincerely,

Sarkis M. Bedikian, D.O.

Dear Chairman Olson and Members of the Illinois Health Facilities & Services
Review Board:

I am a patient of Dr. George Charuk and I have received surgical services at Palos Hills Surgery Center ("PHSC"), located at 10330 South Roberts Road, Suite 3000, Palos Hills, IL, 60565. I am writing to express my support of the proposed project to expand this facility.

I am extremely satisfied with the services that I received from Dr. Charuk. Everyone at PHSC was courteous and helpful throughout the process, and I would refer family and friends to this facility in the future. Allowing PHSC to expand and update equipment will only enhance the already excellent patient experience, and will allow more patients in our community to access these meaningful services.

I appreciate your consideration of my opinion in your review of the project application. Please approve this project for the benefit of the patients in our community.

Chairman
Illinois Health Facilities & Services Review Board
525 West Jefferson Street, 2nd Floor
Springfield, Illinois 62761

Dear Chairman Olson and Members of the Illinois Health Facilities & Services
Review Board:

I am a patient of Dr. Adam Meisel and I have received surgical services at Palos
Hills Surgery Center ("PHSC"), located at 10330 South Roberts Road, Suite 3000,
Palos Hills, IL, 60565. I am writing to express my support of the proposed project
to expand this facility.

I am extremely satisfied with the services that my son received from Dr. Meisel.
He had a minor non-invasive surgery when he broke his wrist and everyone at
PHSC was courteous and helpful throughout the process. My son and I were both
very nervous going in, however everyone involved made us so comfortable from
start to finish. I would refer family and friends to this facility in the future.
Allowing PHSC to expand and update equipment will only enhance the already
excellent patient experience, and will allow more patients in our community to
access these meaningful services.

I appreciate your consideration of my opinion in your review of the project
application. Please approve this project for the benefit of the patients in our
community.

Sincerely,

Regina Young

RE: Support letter for Palos Hills Surgery Center, LLC (17-041)

Dear Ms. Olson:

I am a Pediatric Orthopaedic Specialist and fully support the proposal to expand and modernize the ambulatory surgical treatment center ("ASTC") located at 10330 South Roberts Road, Suite 3000, Palos Hills, 60465, known as the Palos Hills Surgery Center ("PHSC").

ASTCs provide a high quality, low cost alternative for many patients seeking highly specialized care. From a clinical standpoint, ASTCs allow for increased surgeon efficiency due to faster room turnover, specialized focuses, and designated surgical times that are not impacted by emergent and trauma cases like in the hospital setting. Historically, ASTC patients have returned positive patient satisfaction results. PHSC's positive patient satisfaction results, ranging from 94% to 100%, are certainly in line with that historical trend.

PHSC is located in a building with a MidAmerica Orthopaedics ("MidAmerica") practice location, a prolific physician practice responsible for driving surgical volume that is projected to greatly exceed the current capacity of the PHSC. The location of PHSC, in proximity to MidAmerica, provides highly integrated care and superior quality outcomes for patients.

I joined MidAmerica and PHSC in June 2017. I treat a significant amount of Medicaid and self-pay patients and have previously encountered difficulty obtaining surgical times at area ASTCs due to this payor mix. Historically, I would be required to perform a majority of my surgeries in the hospital setting. Surgeries performed in the hospital setting carry much higher costs, less convenience, higher infection rates, and a less welcoming atmosphere.

A majority of my patients encounter difficulties paying for healthcare. Absent expansion of PHSC, I fear that my patients' options for treatment venues will be severely limited to the point where patients may postpone vital procedures due to cost. The proposed expansion of PHSC will assist

Anton J. Fakhouri, MD, FACS, FICS • Gary A. Kronen, MD • Beverlee A. Brisbin, MD • Adam F. Meisel, MD
Sarkis M. Bedikian, D.O. • George E. Charuk, D.O. • Kevin M. Jackson, MD • Prasad Gourineni, MD • Chris Chapman, D.O.
Jeremy T. Bell, PA-C • Kelly J. Hermann, PA-C • Chris Koenig, PA-C • Kristen Veldman, PA-C

in providing not only a welcome, but also a needed treatment venue alternative for my patients – the most vulnerable individuals in our society.

Therefore, I ask the Health Facilities and Services Review Board to approve the proposed expansion.

Sincerely,

Prasad Gourineni, MD
