**HEALTH FACILITIES &
SERVICES REVIEW BOARD**

**Re: HFSRB Project #: 17-062, Auburn Park
Dialysis**

Dear Mr. Roate:

As we prepared to bring the above-referenced, DaVita Auburn Park dialysis clinic project forward to the April 17 meeting, we reviewed the ratio of stations to population of the geographic services area contained on pages 89-90 of the CON permit application. In reviewing that data, we identified that numerous zip codes and their associated population had been excluded from the population calculation resulting in an error in the overall ratio to station population. This ratio is relevant for the determination of the proposed clinic application's compliance with Section 1110.1430(d) of the HFSRB rules. The population of the relevant geographic service area is much higher than originally identified. We apologize for the oversight in the previously submitted information.

Enclosed please find the listing of Zip Codes that are within the adjusted 30-minute travel time market contour as identified by Microsoft's MapPoint software (**EXHIBIT I**). Please note that the drive time in Chicago is modified pursuant to the HFSRB rules to account for City of Chicago traffic and is 30 minutes/1.25 or 24 minutes. To properly calculate the Zip Code areas within the geographic service area, I pulled the US Census data and that information is also included herein (**EXHIBIT II**). What this data shows is that there are 71 zip code areas within the travel time contour of which 69 are also located within the State of Illinois. Those 69 Zip Code areas have 2,459,948 people within their boundaries. With the State's identified 843 ESRD stations within the adjusted 30-minute travel time, there is a ratio of 1 dialysis station to every 2,918 persons. This calculation shows that there are fewer stations per capita in the geographic service area of the proposed Auburn Park dialysis clinic than when this statistic is measured on a statewide basis. This demonstrates that hemodialysis services in the proposed geographic service area are less accessible to the population planned to be served which is particularly notable given that certain health disparities exist in the population which is planned to be served (which were discussed in the earlier March submission). This updated data demonstrates that the ratio of stations to population is in conformation with Criterion 1110.1430(d).

Mr. George Roate, Project Review

March 20, 2018

Page | 2

Please refer to the following table for the Applicant's resultant Ratio of Stations to Population and the State's ratios. The State has used 2015 estimated population for the calculation so that is provided for your convenience. For consistency, I have also provided the population from the 2016 American Fact Finder profile for the State of Illinois (**EXHIBIT III**) to calculate the ratio based upon common year population.

Table 1110.1430(c)(2)(A) Ratio of Stations to Population			
	Population	Dialysis Stations	Stations to Population
Adjusted 30-minute TT	2,459,976	843	1 : 2,918
State (2016)	12,851,684	4,704	1 : 2,732
State (2015 Est.)	12,978,800	4,704	1 : 2,760

Thank you for considering this updated data in the preparation of the HFSRB staff report. We look forward to having this project considered at the April 17 meeting and believe because this data is self-explanatory that there is no need to extend the review period. We hope you agree and we appreciate your consideration.

Sincerely,

John P. Kniery
Health Care Consultant

ENCLOSURES

C: Mike Constantino
Courtney Avery
Kara Friedman
