Re: #20-021 - Request for Additional Information 002

Dear Ms. Cooper:

We are still in the process of reviewing the application for permit. Please respond to the following:

1. Page 42 of the Application for Permit has a narrative stating the existing ASTC provides Medicaid care. Yet the information the State Board has for the past five years (2014-2018) shows no Medicaid care was provided. We need an explanation for this.
2. If in 2019 you were approved to provide Medicaid care why was Medicaid certification not sought earlier.
3. It is difficult for the Board members to understand by adding these services improves access when there are a number of ASTCs in the 10-mile area as well as hospitals. The Board needs to know WHY you are adding these services NOW when the facility has been in operation for a number of years.
4. Itemization of consulting and other fees of \$175,000 needs to be provided.
5. A Listing of procedures and fees need to be provided for Dr. Chopra and for Dr. Martin.
6. Page 71 of the Application does not address the requirements of the criterion. Please provide the appropriate charge commitment as required.
7. Page 73 does the ASTC have a peer review program in place or does that letter mean they are going to establish a peer review program.
8. The projected financial information appears to only project for the new procedures and does not take into consideration the facilities current OB/GYN and podiatry. Please Explain.
9. Page 80 indicates that paid in capital has been increased by \$100,000. Please explain.

10. As I mentioned interventional radiology and pain management referrals were from a pregnancy termination center. Pregnancy termination centers are not under State Board review. It appears we will only be able to accept the 30 cases and the 52 hours.

	Cases	Hours per Case	Total Hours	Accepted Hours
Interventional Radiology	157	3	471	0
Pain Management	10	1.25	12.5	0
Otolaryngology	15	1.25	18.75	18.75
Plastic Surgery	15	2.2	33	33
Total	197		535.25	51.75
