

ADVANCING EDUCATION, FINANCIAL STABILITY, AND HEALTH FOR ALL

February 18, 2021

Ms. Courtney Avery, Administrator
Illinois Health Facilities and Services Review Board
525 West Jefferson, Second Floor
Springfield, IL 62761

Dear Ms. Avery,

For over 80 years, United Way of Adams County has addressed issues in our community. In 2013 United Way started addressing the three most critical areas we face: education, financial stability, and healthy living in children and adults. County-wide efforts to promote health and wellness are focused on ensuring residents have access to health and social services, as well as encouraging children and adults to lead healthy lifestyles.

Our healthcare partners are vital to our mission of empowering the people of Adams County to reach their full human potential. We appreciate Quincy Medical Group's focus on improving health by expanding access to high-quality, low-cost care. Quincy Medical Group is a strong supporter and advocate for the United Way Annual Campaign and have representatives on our Board of Directors and on many of our volunteer committees.

Similarly, we applaud Blessing Health System's commitment to provide high-quality care by using advanced technology in state-of-the-art, comfortable facilities. Blessing Health System's employees have served in leadership roles on our Board of Directors and on our volunteer committees. They are also long-standing supporters and advocates of the United Way Annual Campaign.

Our Board of Directors trusts the review process the Illinois Health Facilities and Services Review Board conducts to make informed decisions for community health. We support our regional healthcare providers and their vision to ensure the highest quality and access of healthcare and services without undue duplication.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeremy Wingerter".

Jeremy Wingerter
Executive Director

To inspire, unite, and empower the people of Adams County to reach their full human potential.
