I for one would like to see exactly where the 100 million investment in the campus has gone? I had a procedure done there with in the past 2 months. The only new updated thing I saw was the fancy entryway that push done and ofcourse the prominent item was the CEO's name in giant lettering.

The procedure area I waited in was dull, not well light, overall shabby, for example the paint on the air vent above my bed was chipped. The furniture was also shabby. Again where specifically did this 100 million dollar go?

I feel that this goes to the veracity of any comments made by CEW has made.
