RE: Springfield Clinic – Springfield Clinic Ambulatory Surgery Center Establishment of Cardiac Catheterization: Letter of Opposition

Dear Chairwoman Savage and Members of the Illinois Health Facilities and Services Review Board:

As Lead Pastor of Union Baptist Church, I spend much of my time ministering to our community on health care and particularly at our Saturday health clinics. For those of us in minority communities, access to health care can be difficult. Far too often we don't have the same options for high quality care we can afford, that our wealthier, Caucasian brothers and sisters have. I appreciate the Illinois Health Facilities and Services Review Board's consideration of my November 21, 2022, letter in opposition of Springfield Clinic's application for a Certificate of Need to establish cardiac catheterization services at its Ambulatory Surgery Center in Springfield. I am writing you again to reiterate my strong opposition to Springfield Clinic's Certificate of Need ("CON") application to establish cardiac catheterizations at the Springfield Clinic Ambulatory Surgery Center. It is my belief that, if approved, this project will lead to substandard care and increased health disparities for our community.

While a cardiac catheterization is a common procedure used to diagnose or treat heart problems, it does not come without risk. Heart attacks, strokes, bleeding, and blood clots are just some of the complications that could arise with the procedure. These risks are why cardiac catheterizations should be performed in a supervised hospital setting where resources are available to minimize the opportunity for them to become major complications, unlike an ambulatory surgery setting.

In addition to this increased chance for patient harm, the approval of this project would also worsen health disparities among people of color and marginalized groups. As you are probably aware, Medicaid is the public health insurance program funding health care for low-income families. It is estimated that 26% of all Illinois residents are covered by Medicaid, and almost 86% of those covered are people of color.

Yet, Springfield Clinic's CON application clearly states patients covered by Medicaid comprise only 5% of their total cardiology visits. Unlike our Illinois hospitals, which provide billions of dollars in true charity care annually and take care of all patients regardless of their ability to pay, Springfield Clinic provides no charity care. In fact, the Safety Net Impact Statement in the application highlights that payment plans would be necessary for those not covered under a third-party insurance plan. Simply put, the increased patient access referenced in several letters of support for this project will not be gained by the Medicaid or uninsured population. Instead, the for-profit Springfield Clinic will redirect commercially insured patients from hospitals well-equipped and most capable to safely provide this service – the same hospitals demonstrating stalwart support and service to their communities before, during, and after the COVID-19 pandemic.

I trust and believe that the Illinois Health Facilities and Services Review Board prioritizes equity, fairness, and quality of care for patients when making decisions that impact the health and well-being of Illinois residents. Accordingly, I encourage you to oppose Springfield Clinic's request for cardiac catheterization services, project #22-027. Thank you.

Sincerely,

T. Ray McJunkins, Lead Pastor
