West Suburban / Weiss Hospital

HIGHLY CONFIDENTIAL

As per public news, we learned that the above two mentioned hospitals are sold to some new Michigan Entity called Resilience led by Mr.Manoj K Prasad. As per public records, these two hospitals owes huge money to Illinois State. Hospitals are under huge lost as per public records. Hospitals already got adequate funding from State and Federal.

The new entity or Mr.Manoj K Prasad don't have any experience in handling / owning the facilities. Mr.Manoj K Prasad financial net worth is not even $300K as per public records.
As per Linkedin, he worked as executive or consultant for small hospitals/rehab centers. From past 6 years he was leading small tech firm, that firm don't have any turnover.

The real estate entity which is buying the land and buildings may have some loan facility but needs strong assurance from Land owner. We have every doubt that Mr.Manoj prasad financial strength. Mr.Manoj entities in MI does not have even any turnover from past 5 years.

As citizens we advise you that please take assurance from real estate company and if real estate company is investing in Resilience (Operator), Please go through the document relationship between Resilience and Real Estate company(As per Chicago Tribune news - Ramoco Healthcare Holdings owned by Rathankar Patolla, NJ).

Kindly scrutinize the following in CEO Application.

1) Source of the funds for Mr.Manoj K Prasad - to pay back to Illinois State, Maintain the current employee payrolls and sustain the lost for minimum18 months.

2) The landlord must assure that he cannot declare bankruptcy or close the hospitals saying that Mr.Manoj is not paying the rent or not able to survive.

3) If Landlord is involved in Operational Company, relationship documents must be scrutinized between two parties. And Public must know the relationship.

4) If landlord is investing in operational company, how much fund he is committed for health of the hospitals.

5) What happens if hospitals does not make profit, do they ask public funds?

The reason we are asking you to scrutinize and take commitments from these parties , recently we understood the Galesburg Cottage Hospital incident.

We have full doubt that Mr.Manoj K Prasad and Ramoco Healthcare Holdings will mess these hospitals due to lack of experience and funding , lack of their personal net-worth (Dont know their personal net worth but Mr.Manoj K Prasad net-worth is not more than $300K as per public records).

Pipeline must pay all the debt to Illinois state before they sell the facilities. They are selling the parking lot. Since they got huge funding from State and Federal recently.

If Mr.Manoj Prasad financial ability is completely questionable if he is owning the majority decision maker position for such huge multi million dollars facilities.

We are sending this email with public interest and and also welfare of the current employees. If Pipeline is selling to some national network company, we don't have any problem but they are selling to some unknown consultant who don't have experience in owning even small hospital or having high net-worth.
