Project: (23-024)

Good Day,

I feel that with all of the hundreds of pages, evidence and documents from I. D. P. H concerning S.A.B.A. healthcare, that your board should be held accountable for any and all repercussions ^{that} may happen to our residents, that live here at D.C.R.N.C.

We feel that S.A.B.A. Healthcare should spend their money on improving their facilities and enriching their residential lives.

It doesn't make sense to buy our home while their residents and facilities are doing so ^{poorly} poorly.

Just imagine if this was your loved one, would you feel comfortable having them live under these conditions.

No! No! I would never ever put my love one ^{into} living under these conditions of being so uncomfortable and uncared for. This is no way to have your loved one living that way in their final days.

You know what, when I set here and think about the fear I have worrying what would happen if S.A.B.A taking over our home. I can't help myself but have tears come down my face and cry. I have even woke up at night when I had been dreaming about the hardships it has caused me at this time.

I pray and pray and put it in the hands of "The Lord."

Could you please consider our plea not to give S.A.B.A our home.

When making your final decision.

Please keep our nursing home in your prayers

I thank you

Mary J. Roman

A soon to be a 89 year old concerned resident
(as of July 26.)
