Pain & Spine Institute Surgery Center (Proj. No. 23-033)

Dear Mr. Kniery:

I am writing to express my support for the establishment of the Pain & Spine Institute Surgery Center. As a patient who has experienced the challenges of chronic pain firsthand, I believe that such a center would be a beacon of hope for individuals like me seeking comprehensive and effective pain management solutions.

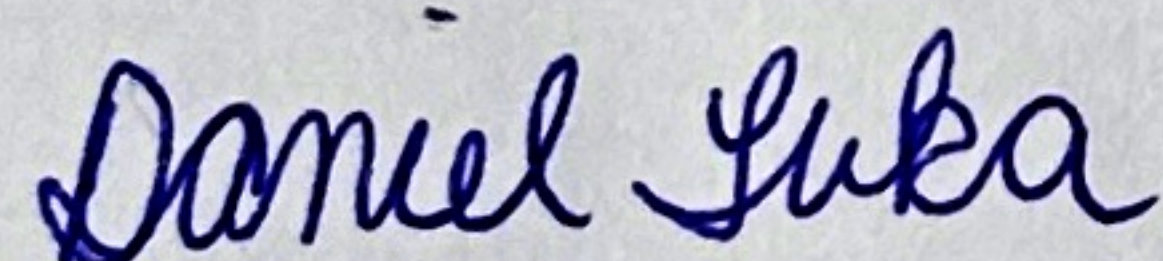

Living with chronic pain is an ongoing struggle that not only affects physical well-being but also takes a toll on mental and emotional health. Having access to specialized facilities that focus on interventional pain management can make a significant difference in the lives of patients who are dealing with the difficulties of chronic pain conditions.

The potential of having a dedicated center that prioritizes advanced, evidence-based interventions would be great for the community. From personal experience, I understand the importance of a multidisciplinary approach that goes beyond traditional treatments.

I urge the Illinois Health Facilities and Services Review Board to consider and support the formation of Pain & Spine Institute Surgery Center in Joliet, Illinois. The positive impact of such a center on the lives of patients cannot be overstated, and I believe it would be a valuable addition to our community's healthcare resources.

Please feel free to contact me if you require any further information or if I can provide additional insights based on my experience.

Sincerely,

Daniel Luka
