Re: Advocate Cardiovascular ASTC and Outpatient Center

Dear Chairwoman Savage,

I am writing to request the Illinois Health Facilities and Services Review Board approve Advocate Health Care's Certificate of Need (CON) application for the proposed cardiovascular-focused ambulatory surgical treatment center and clinic in Naperville.

The treatment center would house both primary care and cardiovascular specialty care clinician offices for Advocate Medical Group physicians, enhancing access to high-quality care for DuPage County. With approximately 150,000 residents, the city of Naperville is one of the most populated in our state. The population of this region is both growing and aging, and as a result, is experiencing an increase in cardiovascular disease and associated chronic conditions.

This space will help patients get the right care at the right time, and shifting care to an outpatient setting will allow patients to avoid lengthy hospital stays while receiving care at a much lower cost.

As a State Senator for the 24th District, I am comforted that if approved, the treatment center would greatly serve my constituents, allowing them to receive the much-needed, high-quality care they deserve. I applaud Advocate Health Care's continued investment in the health care services in our region and ask that you approve its Certificate of Need application.

Sincerely,

A handwritten signature in black ink, appearing to read 'Seth Lewis', is located below the 'Sincerely,' text.
